TALK INTO THE TELEPHONE

TELEPHONE PLANTS are designed to enable the telephone user to talk with ease. The best results are obtained when the lips are very close to the telephone. If the Telephone Company designed its plant to permit of everyone speaking with their lips from six to eight inches away from the telephone, the cost would be more than doubled. Under such conditions, Long Distance talking would be impossible. Besides, the greater cost of the investment would necessarily be met by the telephone-using public.

The Telephone is made to be talked into, not to be talked at.
