SAVED FROM DEATH!!

Ten ony of Ma. NATHAM MATISHWA. a highly respect ble and usualthy citizen of Nescurk, N. J. Da. G. W. Halsart—I believe jour Forest wine and Fills have been the means of saving my life. When I commenced taking them, I had at the point of death, with Dropsy, Piles, and Asthema. My Physicians had given me over as past cure, and my family had lost all hope of my recovery. While in this deadful attuation, your forcest Wine and Fills were procured for me, and before I had finished the first bottle of the Wine, and box of Fills, I experienced great rehef; my hody-and limbs, which were greatly as offen, became sensibly reduced. Hopes of my recovery began now to revive, and after continuing the use of year medicines for about a month, he Files and Asthmas were completely cured. The Dropay, with which my life was placed in such great dange, we's also mearly gone. I have continued the use of your expellent Medicines until the presunt lime, and I now thoy as perfect he lith as ever I did in my life, although I am mute than sixty years of age. I ascrabe my recovery entirely to the use of your expellent Medicines. Several of my neighbors have also used them with similar success in obstinate compaints, and I can cheerfully recommend them to the public.

Yeurs, respectfully, N. MATHEWS.

These Medicines have now been before the public for a period of FIFTEEN YEARS, and during that these have maintained a high character in almost every part of the globe for their extraordinary and immediate power of restoring period health to persons suffering under nearly every kind of disease to which the hump frame is liable.

of certificated instances, they have even rescued sufferers from the very verge of an untimely grave, after all the deceptive nontrums of the day had startly failed; and to many thousands they have permanently secured that uniform enjoyment of health, without which life itself is but a partial blessing. So great, indeed, has their efficacy invariably and infallibly proved, that it has appeared scarcely less than miraculous to those who were acquainted with the beautifully philosophical principles upon which they are compounded, and upon which they consequently act. It was to their munifest and censible action in purifying the springs and channels of life; and enduing them with renewed tone and vigor, that they were inducted for their name.

munifest and consible action in purifying the springs and channels of life; and enduling them with renewed tone and vigor, that they were indebted for their name.

Unlike the host of pernicous quackeries which beast of vegetable ingredients, the LIFE MEDICINES are purely and solely regetable; and contain action Mercury, nor Antimony, nor Arsonic, nor any other mineral, in any form whatever. They are entirely composed of extracts from rare and powerful plants, the virtues of which, though long known to several indian tribes, and recently to some eminent pharmaceutical chemists, are altogether unknewn to the ignorant pretenders to medical science; and were never before administered in so happily efficacious a combination.

The first operation is to loces from the coats of the stomach and bowels the various impurities and crudities constantly setting round them; and to remove the hardcased fances which collect in the convolutions of the small intestines. Other medicines only partially cleanuse these, and leave such collected masses behind to produce habitual Contivues, with all its train of evils, or sudden Diarrhon with its imminent dangers. This fact is well known to all regular anatomists who examine the numan bowels after death; and hence the projudice of these well-inference men against the quack medicines of the age. The second effect of the VEGETABLE LAFE MEDICINES is to cleanse the kidneys and the bisder; and, by the means, the liver and lungs, the healthful action of which entirely depends upon the regularity of the armary organs. The blood, which takes its red color from the agency of the liver and lungs, before it passes into the heart, being thus purified by them, and nourished by God coming from a clean stomach, counse freely through the veins, ronews every part of the system, and triumphantly mounts the banner of health in the blooming cheet.

The following are among the distressing variety of human diseases in which the veins and acrid kind; FLATULENCY, Loss of Appetite, Heartbura, Heades... Restlea

company and measure of operate more delightfully on these important organs, and hence have ever been found a certain remedy for the worst cases of GRAVEL.

Also Warms, by disledging from the turnings of the bowels the slimy matter to which these treatures address.

Aghma and Consumption, by relieving the air-vessels of the lauge from the muccous which even slight colds will occasion, and which, if not removed, becomes hardened, and preduces these desafted diseases.

Scurry, Ulears, and Invotorate Stree, by the perfect parity which these LIFE MEDICINES give to the blood, and all the humans.

Scurry their alternitive effect upon the fluid that feed the skin, and the morbid state of which becasions all craptive complaints, callew, cloudy, and other diagreeable complexions.

The use of these Files for a very short time will effect an entire cure of SALT RHEUM, and a striking improvement in the clearness of the skin. COMMON COLDS and INFLUENZA will always be care I by one does, or by two even in the worst case.

PILES As remedy for this most distressing and obstinitis malady, the VEGETABLE LIFE MEDICINES deserve a distinct and emphasic recommendation. It is well known to hundreds in this city, that the former proprietes of these valuable bloodience was himself afficied with this complaint for upwards of ventry-rave years; and that he tried in vain every remedy prescribed within the whole company of the Relative Medicine which is now effected by the public, and he was cared in a very short time, after his recovery had been personanced not only impenhable, but absolutely impossible, by any human means.

REDUCED RATES OF PREMIUM—HALF
CREDIT RATES OF PREMIUM.

THE great and decided success which has attended this Institution, has induced the Directors to REDUCE the RATES originally required in Bettish North America, to the ordinary knoppen Rates. The result of such Reduction is to enable parties to avail themselves of the important benefits to Life Assurance at such lesser lates of Premium than those of one other assurance Company I ensecting business in Canada.

The Directors have also resolved to extend to British North America the advantages afforded by the HALF CREDIT RATES of PREMIUM which have been so highly approved, and are so generally adopted by Poicy Holders in the United Kingdom. The most liberal conditions are likewise offered to the Assured in the limits to which they may proceed by sea or land, to other parts of North America without affecting their Interest in their respective Policies.
