#### Police Court News.

A drunk and disorderly in Richard Byrne's saloon was the first arrainged to-day. Mr. Byrne testified that the man, who is a cripple, repeatedly has entered his place and called him the vilest of names, and that he prov ed himself a nuisance right along. He was fined \$10 or 30 days. Three drunks were each fined \$1 o

A disorderly was fined \$2 or

Three stokers, in for safekeeping.

were released yesterday. The defendant in a trivial assaul case was let off on paying costs. The man Leary who assaulted Saml. Butt on Mundy Pond Road last week was arraigned to-day, charge with beating, wounding and ill-treating Butt, who could not appear. His wife, who was present, testified that she was called by a woman named Parsons who told her to go to her husband's aid, and that she found him on the road with Leary upon him as he lay on the ground and pressing his knees into the man's stomach, the while her husband's tongue protruded from his mouth. Dr. Macpherson was called, is stil attending him and her husband, she averred, is still in bed very ill eve since. Leary was remanded for days, but if Butt's condition improve

#### he will be released on bail. Injured Stoker Dead.

Stoker J. W. McLurgh who wa hurt badly about the head by a fal received on board the S. S. Lutetion which ship put in here last week and landed the man, died in the Genera Hospital at 5.30 p.m. Saturday. From the time of the accident up to th time of his death the man never re gained consciousness, still when the Captain visited the hospital with Bow ring Bros. Shipping Clerk Friday night he seemed to be better an Matron Southcott was pleased with his condition. The remains were in terred at 11.30 to-day in the C. I Cemetery, Rev. G. H. Hewitt official ting. He leaves a wife and 2 child ren at South Shields, and Shipping Master Carter will write them pai ticulars of the husband and father's sad death. Mr. Snodgrass, the 3rd Engineer, who was also hurt in the ship is very much better and will a home by the next Allan boat. Whe he arrives in the Old Country he in tends seeing Mrs. McLurgh and giv ing her details of her husband's

# Grape-Nuts

LOOD

Thousands who know the personal value of clear-thinking and vigorous action, make Grape-Nuts a part of their regular diet.

When You Feed Right. You know one always feels "very fit" when the head and nerves swing along peacefully and with that certain sense of power that is unmistakable.
But when overwork or anxiety

in Food

But when overwork or anxiety breaks down the soft gray matter in the brain and nerve cells (anxiety will do it quicker than overwork) faster than the food you have been using replaces it, then to save yourself from that horror of darkness, nervous prostration, you must change food and take on some sure rebuilder. That's the mission of Grape-Nuts, made of the selected parts of wheat and barley containing the natural made of the selected parts of wheat and barley containing the natural Phosphate of Potash which combines with Albumen in the human body and makes the soft gray filling of the brain and nerve centers.

Another thing to be considered is that Grape-Nuts is "processed" in making and the starcy parts converted into a form of sugar, exactly as the process of digestion in the body. So Grape-Nuts has really passed the first act of digestion and therefore the food is quickly assimilated in the most perfect manner by babe or athlete.

#### Queer Driving Power. Bomb Th

There appear to be possibilities in the idea of M. Constantin, a French Italian was inventor, who seriously suggests that be the use of an adoption of the windmill on the head of fast vehicles increase the speed. At first sight the idea seems fanciful and quite impracticable, but M. Constantin has ly given considerable weight to this theory by constructing a model alum- the roof of nium waggon which, according to a house and newspaper cutting, was driven forward with surprising energy by a windmill turned by a headwind. The vindmill is apparently a form of fling onical screw, with the blades inclinl forward. It is placed at the front the waggon and its axis is so geared to the wheels that they are turned forward when the screw is rotated by the breeze it encounters. rested against the mild air current of an ordinary electric fan the model waggon promptly started ahead, soon

developing considerable speed and
