THE GREATER QUESTION

At this season of the year for Farmers with up-to-date ideas is, what are the best means to use to get the best returns from the land.

Fertilizers must be used liberally if large returns are looked for. There are several good chemical fertilizers which may be recommended, but Sulphate of Ammonia has been proved to give the best returns, and is the most valuable and economical source of Nitrogen for agricultural purposes.

For vegetables, grass, and all leafy crops, about one and a half cwt. per acre is the best quantity to use, and this should be applied when the plant is making its growth, as well as before sowing the seed.

If a liquid manure is preferred, a 4 oz. of Sulphate to one gallon of water should be used, and applied once a week for a month. This quantity should not be exceeded.

It is a good plan to reduce the Sulphate to a fine powder, and mix with four or more times its own bulk, for the purpose of diluting the manure, which is very powerful.

For potatoes the following mixture is strongly recommended:—
40 lbs. Superphosphate.
26 lbs. Fine bone meal.
10 lbs. Carbonate of Magnesia.
15 lbs. Sulphate of Potash.
21 lbs. SULPHATE OF AMMONIA.

1 cwt.
Apply at the rate of 10 to 11 lbs. to 43 square yards.

The use of Carbonate of Magnesia in conjunction with Sulphate of Ammonia, is of great importance in potato culture.

For turnips use the following:—
66 lbs. Superphosphate.
13 lbs. Fine bone meal.
13 lbs. Sulphate of Potash.
20 lbs. Sulphate of Ammonia.

1 cwt.
Apply at the rate of 10 to 11 lbs. to square yards.

Sulphate of Ammonia of excellent quality is now made by the St. John's Gas Light Company, and may be obtained on very reasonable terms.

Full particulars may be obtained at the Gas Works, or at the Board of Trade Building. Ask for special booklet on the use of Sulphate, it will be found of great value in securing the heaviest crops.

The manager of hall also gave free use of same, and myself and company gave our best efforts gratis also. The people here are being called upon in many ways to help, which may account for us not getting a larger amount. Trusting our next remittance will be better. Kindly acknowledge receipt of amount we send at each remittance, and pass it on to the central committee. Fully appreciating the efforts you are making for this great cause, I remain yours sincerely,

WASHINGTON, To-day.

The news that even the Constitution- alists' chief regarded the seizure of Vera Cruz by American naval forces

as an act of hostility on the Mexican nation fell like a bombshell on official circles to-night, President Wilson especially disclaimed any hostility of the American people, particularly Gen. Huerta as the object of American operations for offences at Tampico and elsewhere against the American flag, consequently the Washington Government hoped the Constitutionalists would remain silent and not interject themselves in the imbroglio. The Carranza letter, however, confirms the fears of many officials that the Constitutionalists will side with Huerta.

**Sees Menace
In White Bread**

The eminent scientist—Prof. Le Talle, of Paris, recently made a remarkable statement regarding food conditions in France. It is even more applicable to this country—he said:

"France has changed an essential of her nourishment. White bread is made more and more starchy, and is less and less nourishing. The rich products which are extracted go to feed the pigs. The baker now utilizes only fifty per cent of the wheat elements, whereas fifty years ago he utilized eighty-five per cent.

The "rich products" referred to, which are "extracted" from wheat, are the mineral elements—phosphate of potash, iron, sodium, etc. These elements are absolutely essential to proper nutrition of body, nerves and brain, yet they are nearly all thrown out by millers just to make the flour look white and pretty!

The lack of these invaluable phosphates is one of the chief causes of nervous prostration, dullness, languor, constipation and other ills—big and little.

In the making of

Grape-Nuts
FOOD

all the "rich products" of wheat and barley, from which the food is made, are retained.

A regular ration of Grape-Nuts is not only a delicious part of the meal, but admirably supplies the mineral salts which the ordinary diet often lacks.
