

BUILDING IN CANADA MOST SATISFACTORY

Grand Total for 1910 Exceeds That of Year Previous.

SITUATION IN LONDON

Returns for 1910 Show a Small Falling Off, But a Big Increase for December Last.

The grand total for building operations in 1910 reaches to a position of secondary importance, when compared to the enormous investment made in 1910. There is every reason to believe that the year 1911 will be a still greater and more widespread period of activity in every way than the one which has just come to a close. At no time in the past has the country experienced a more satisfactory mid-winter season, nor at any time has it looked forward to a more active and important work as scheduled immediately ahead. The turn of the calendar witnessed precisely the same accelerating tendency, which has been steadily onward in a growth and development which far overshadows the records of previous years in any previous corresponding period.

Official returns submitted to the construction from twenty-four cities located in every province and section of the Dominion record an aggregate total for permits issued, amounting to \$41,124,225, as against \$4,509,629 in the year of 1909. This represents an average gain of 45 per cent, or a volume of work nearly half again as great as was carried out in the preceding twelve months.

Some Losses Recorded.

Although a few more losses are recorded than were noted in the last an-

nual report, the figures in a number of instances fall materially to reflect the full extent of prosperity actually enjoyed.

This is equally true concerning many of the cities which registered gains. Vancouver for instance, where the volume of new building amounted to \$13,150,365, reports that in territory contiguous to the city, and which should in every way come within the scope of its jurisdiction, operations were carried on to the extent of \$4,000,000, of which no record has been kept. Montreal likewise has a valid claim in this respect, and if the work in the suburbs of the city were included, it would substantially add to the handsome total of \$16,815,929 otherwise attained. Montreal's gain as it stands, is 161 per cent, a most splendid showing to say the least, while that of Vancouver (63 per cent), is no less remarkable when one considers the big advance made in the previous year. All in all, Canada can regard its accomplishment for the year with no little degree of satisfaction. Toronto's mighty total of \$21,127,782, in itself, which is approximately three millions more than was noted in the previous figures, attests eloquently to growing commercial and industrial importance, such as possibly cannot be duplicated by any city of like size on the entire continent. Ontario on the whole prospered exceedingly well, although Halifax is a case of decrease noted, fell in the province. Ottawa failed to equal her previous figures by 32 per cent. Port William is behind by 19 per cent, and Windsor and London are in the rear of the list, each of them a per cent. In other named. The amounts registered in all these places, however, are almost double the totals recorded in 1909. On the other hand, Hamilton undertook new work aggregating in cost \$2,404,695 as compared with \$1,623,100 in the year before. Berlin surpassed its former mark by 81 per cent; Brantford shot forward 55 per cent; Peterborough made a gain of 50 per cent, and Port Arthur and St. Thomas advanced relatively 81 and 9 per cent. In all cases, the results noted are gratifying to the extreme.

The West.

In Manitoba, Winnipeg made good the early forecast of a fifteen million

dollar year. Her amount, in fact, is but a trifle better, and, judging from the splendid showing made in the annual report, the aggregate value for permits amounted to close onto a million, operations in the next twelve months will be proportionally greater. Brandon, also, with a total of \$1,224,385 to her credit, representing a gain of 249 per cent, flourished to an unusually marked degree. These figures reflect in a fairly accurate manner the high tension of activity throughout the west in general. Saskatchewan was forced ahead at a lively clip as is evidenced in Regina's total of \$2,351,228, and Prince Albert's advance of 367 per cent, the highest percentage increase noted for the year. The only loss in the entire west occurred in the case of Lethbridge, which failed to equal its former figures by 4 per cent, a decrease considering the heavy investment made in 1909 of very slight proportion indeed. Calgary, on the other hand, has \$5,509,594 to her credit, and Edmonton a total of \$2,161,356, the increase in either case being 139 and 30 per cent respectively. Another gain worthy of note is that of Victoria (35 per cent), which in addition to Vancouver's big increase previously mentioned indicates a most wholesome state of affairs in the Pacific Coast district.

Maritime Provinces.

In the Maritime Provinces, both St. John and Sydney topped their previous figures, although Halifax is in the rear by 25 per cent. St. John and Sydney's increase is 41 and 9 per cent in order named, and the amounts noted show a steady and consistent growth, which is quite representative of the east in general.

Considering the remarkably sound manner in which the year closed, and the larger volume of important work immediately ahead, 1911 will be a bumper in every respect. Of course, the reciprocity factor is something to be reckoned with; and as to what effect is might exert on manufacturing and industrial improvements, remains to be seen. Aside from this one uncertain feature, however, the country has never before beheld such a promising outlook, and the contractors and material firms can well prepare for a period of unparalleled activity and development.

New Books at the Public Library

General Works.
 (Author-Rodger, Guide to Periodical Literature, 1906-1908.
 (Wittaker) The Reference Catalogue of Current Literature. Three volumes, 1910.
Philosophy.
 Munsterberg—American Problems from the Point of View of a Psychologist. A keen, fearless, scientific handling of the following topics: The fear of the nerves, the choice of a vocation, the standing of scholarship, prohibition and temperance, the intervention of the state, the market and the spiritualists, the market and psychology, books and book stores, the world language. By the celebrated Harvard professor.
Religion.
 Orr—The Problem of Old Testament: A volume of lectures, in which Dr. Orr represents the conservative view in his attitude toward modern criticism. A series of essays on the relationship between nature and people, and the respective duties of each.
Sociology.
 Cropper—Ancient and Modern Imperialism: Expansion of an address before the British Association. A study of the history of imperialism, and the opinion of a man eminently qualified to speak on the problems of imperial government. In his analysis and contrast of imperialism in Greece, Rome and modern world, he is both profound and interesting.
 Porteus—A History of the British Empire. Vol. VI. 1807-1815. From the renewal of the Maratha war to the evacuation of Rio de la Platte. Vol. VI, 1815-1818. From the evacuation to Egypt to the battle of Corunna.
Philology.
 Northcott—The Latin Verse.
 Fulton—Vegetarian Cook Book.
Fine Arts.
 Garsche—Art of the Ages, Part I: A compendium of the history and development of art in western civilization from the earliest times down to the present.
Literature.
 Ridpath—The Ridpath Library of Universal Literature. 25 volumes.
 Perry—A Study of the French Revolution: Deals with the history of the revolution, its plot, background, realism, romanticism, the short story.
 Newbolt—Songs of Memory and Hope: By the author of "Admirals All" and "The Island Race."
 Bywater—Arbitrage on the Art of Poetry: A revised text, with critical introduction, translation and commentary. There is here in the world, who carries a weighty equipment of learning that the eminent Oxford professor of Greek, Dr. Bywater—Spectator.
Travel.
 Edwards—Life in the Southern Road: Journeys from Toronto, in Devon, to Arundel, over 200 miles of English highways and byways, partly on foot, but chiefly by means of vehicles whose drivers gave the author a lift.
 Lang—Outposts of Empire: The romance of the western colonies of the British Empire in the West Indies, Central and South America.
 McClintock—The Old North Trail, or Life Legends and Religion of the Blackfoot Indians: A study of the life and legends of the old chief and medicine men, their ancient religion and folklore would fall into the hands of the author, who has investigated and experienced among these people. He cast it in a narrative form, to give a more faithful portrait of their life and customs. The result is a profusely illustrated volume as interesting as it is instructive.
 Johnson—Highways and Byways of the Rocky Mountains: A series of wide-ranging travels through the mountain ranges from North Dakota to Texas, and to the Mormon villages of Utah. Conversations along the route bring out the striking incidents of the settlement and prosperity of the west, and illustrations secured by the author's camera give a glimpse of the present state of civilization.
History.
 McCarthy—The Nineteenth Century. 25 volumes.
 Channing—Elements of United States History.

SEVEN ASPHYXIATED WHILE SLEEPING

Whole Family Dead as Result of Philadelphia Tragedy.

Philadelphia, Feb. 12.—The entire Berkowitz family, numbering seven in all, were asphyxiated at their home early this morning.
 The dead are: Hyman Berkowitz, 42; his wife, Rosa, 38; their daughter, Rose, 12; their son, Michael, 10; their daughter, Rebecca, 8; and their son, David, 6.
 The family was killed by the loosening of a rubber gas tube from a gas pipe and the flooding of the house with gas. The gas was found hanging from the ceiling of the bedroom, and the family was able to get out of bed before being overcome by the fumes, although the three youngest children showed evidence of having tried to escape in a feeble manner to escape the overpowering gas.
 A particularly sad feature of the tragedy was that the oldest child, the daughter, Minnie, was to have been married within a few days. The girl's fiancé was a young man who had been engaged to her for some time, and was found hanging on the second floor, covered with cloth to protect it from the gas. The father, who attended a celebration in the city hall, did not return home until 1 o'clock, and is thought to have accidentally pulled the gas tube loose.

The world's gold output has reached an average of about \$1,250,000,000 each day of the year, and of this total the Transvaal mines furnish upwards of one-third.

Nerves Are Exhausted

AND NERVOUS PROSTRATION OR PARALYSIS ARE CREEPING STEADILY UPON YOU.

DR. CHASE'S NERVE FOOD

You hear of people suddenly falling victims of nervous prostration or some form of paralysis. But when you get all the facts of the case you find that they have had months or years of warning.
 They haven't slept well. There has been frequent attacks of nervousness. They have been irritable, easily worried and excited and have found memory and concentration failing.
 They have been told that they had nervous prostration or some form of paralysis. But when you get all the facts of the case you find that they have had months or years of warning.
 They haven't slept well. There has been frequent attacks of nervousness. They have been irritable, easily worried and excited and have found memory and concentration failing.
