rats especially are very clean. "The more we study about animals the more we come to see that they have human traits and habits. In this matter of neatness and cleanliness they could teach some persons a lear

BEAR WITH A THIRST.

There are probably a number of men n Maine who remember the tame bear that used to live in Redington in days when lumbering was booming in that section. This bear was a 200pounder, kind and doctle, but the possessor of one bad habit. That was

his penchant for intoxicating liquor, Now and then lumbermen would get the bear drunk, which was an exceedingly easy thing to do. Bruin perfered rum, but would drink whiskey if nothing better was at hand. In the morning after a night's debaunch he frequently had a typical "morning after thirst," which he learned to quench by turning a faucet outside the main camp, when he would lap up vater very eagerly that ran from the

No efforts were made at a reformation, although it is not stated that the animal filled a drunkard's grave. As matter of fact he lived at the camps for a number of years without harming a person, although some of the men seemed to antagonize him at times.-From the Maine Woods,

Is there anything in all this world that is of more importance to you than good digestion? Food must be aten to sustain life and must be ested and converted into blood. When ne digestion fails the whole body sufrs. Chamberlain's Tablets are a raional and reliable cure for indigestion 'hey increase the flow of bile, purify he blood, strengthen the stomach, and one up the whole digestive apparatus a natural and healthy action. title that we use at the head of this article, Enfield Joiner writes as folows of some animal toilets: "Most people suppose that when an

imal wakes up in the morning it is Il ready for the day's fun or the day's ork, but in the case of most animals his is a mistake. They, too, have t lress themselves, and though dressing for them consists only of some kind o bath and of smoothing down and aranging their feathers and furs, great many animals are not satisfied with themselves until they have donthat. Some of them are very shy, and seek the loneliest spots early in the norning; others, like the pet dog and cat, will spend hours dressing themelves on the hearth-rug. Birds are perhaps the neatest mem-

ers of the animal world. A great nany birds must have a bath every Some birds use water and some se dirt, and some use both water an The bathers in water are articular about the kind of wate hey use. Everybody who has ever vatched a ret canary will remember ow it would refuse to plunge in un ess the water and the bath-tub we erfectly clean, and also how, obody seemed to be watching, ould first take its bath, arrange i eathers, and then eat the fresh seeds which had been given it for breakfast. Swallows and martins do not bath very day, because the only which they will use is fresh rain-Tame ducks, too, seem ver fond of the rain-water. When a showe falls they ruffle up their feathers and let the rain soak in. Afterward the mooth themselves down carefull; sing an oil which their bodies co ain in order to get the perfectly mooth and even effect in dress which hey desire. Wild ducks, which live by the salt sea, will fly long distances ver the land to get fresh water for heir bath.

"The birds which use earth baths are very careful about the kind of soil hey use. Larks and sparrows choose fine, dry, gritty dust. They splash and flutter in it as other birds do in ne water, and after they have finshed they carefully dress their rumled plumage with their bills. Partidges clean themselves in loam. They cratch out the dirt and shuffile back

McClary's Sunshine Furnace

TATHEN Old Sol swings low and far away he The average furnace is a glutappoints an understudy for the purpose ton for coal-it literally burns of keeping Jack Frost where he belongs- up money. The "Sunshine" Furn-Outside.

and-your "Sunshine" Furnace-Jack Frost's fairest way we know of doing business-does it

Master awaits your orders for the coming winter.

Remember the past winterthe Frost King was very active - He battered us with a three months' siege of snow and ice - Almost conquered the thermometer by chasing the mercury out of sight. But he failed to penetrate thousands of homes, because the Understudy of the Sun -McClary's "Sunshine" Furnace -was on the job in the cellars of these homes.

It's easy to keep Jack Frost at a safe distance with the "Sunshine" Furnace. He may storm and rave outside, but there is no place for him within-because, the Understudy of the Sun has demonstrated its mastery in the home.

LONDON TORONTO VANCOUVER ST. JOHN, N. B.

ace saves money-earns its cost in a very few years because it burns coal sparingly. Years ago McClary's "Sunshine" Furnace, by Call on the McClary agent of your locality and ask reason of its marvelous heating capacity and the him to prove that statement true. If he cannot balmy June air it suffused the house with, was convince you-show you that the "Sunshine" specially appointed Understudy to the Sun. That Furnace will cut your coal bills by a very pleasing appointment has been confirmed year after year, margin we don't want your order. That's the appeal to you?

There are a multitude of reasons why the "Sunshine" Furnace does save fuel-reduce coal bills-reasons that will be printed in the following advertisements. Here is one that should make you call on the McClary agent at oncethe "Sunshine" Furnace has four radiating surfaces-surfaces that gather up the heat greedily and diffuse it liberally all over the house.

But-you just call on the Mc-Clary agent and ask to be shown. If you do not know him write us at our nearest address and we'll tell you.

You certainly owe it to yourself to find out why McClary's "Sunshine" Furnace is called the "Understudy of the Sun."
