feet into the vein and the ore averages 100 feet to make the connection. The shaft shows six feet of ore between two well defined walls and the ore on the hanging wall averages about \$40 per ton. There are now between 75 and 100

little, but are keeping right on at work. The shaft is down 65 feet all in ore. For some distance it has been wider than the workings and is a solid sulphide of fine grain. The perceptage of copper is very uniform, averaging from four to five per cent. Only one assay of silver was ever taken and that went ten ounces. The gold assays run all the way from a trace to \$80, as they do in all the other

big mines of the camp.
The Novelty was sold last Wednesday for \$20,000. This claim is situated on the south slope of Red mountain, adjoining the California on the north. The work of developing the property had just been commenced. The sale was negotiated by J. B. Jones, of Spokane. The work on the California shows a good vein of ore coming into it from the Novelty. The Novelty is crown granted and has therefore a perfect title. It is a large piece of ground and has a strong surface showing.

The east tunnel of the Josie, which originates on the Poorman fraction, now shows ten feet of solid sulphide ore, which averages \$60. It is the handsomest showing the Josie has ever had and has

the Rand Drill Company of Sherbrooke,

Mr. Gordon, of the Trail Mining Company, has been making a number of tests of the ore from the Kootenay mine.

The assays run from \$8 to \$50 and the Kootenay mine.

The assays run from \$8 to \$50 and the Lake of the Woods (Hungarian) per bbl \$5.25 Lake of the Woods (Hungarian) ... 5.25 safe shipping ore.

The O.K. compressor was brought up from Trail Tuesday and is being put in place. As soon as this new plant is in as there is a great quantity of ore to be

A shaft is being sunk on the east end of the Celtic Queen and is down about 30 feet. The first 20 feet was in drift, which is very heavy. The ledge was found wide and strong and some very good ore is in sight. The indications for a body of reasonably high grade ore are

Solid copper ore is now found in the Wallingford, on Record mountain. The improvement in the ore during the last few days has been very marked. There is hardly a doubt now that Record mountain is cut by at least one copper bearing ledge.

Col. S. M. Wharton yesterday showed a Miner representative a letter from F. T. Kelley, one of his partners in the Reco mine near Sandon. In the course of his letter he states that No. 6 tunne has for the past two weeks shown six inches of galena which will ship 700 to 800 ounces in silver per ton. The No. 2 tunnel shows from six to ten inches of ruby silver galena. Mr. Kelly estimate the amount of ore in sight at \$1,000,000

Clive Phillips-Wolley, provincial sanitary inspector, arrived in Rossland He entered on the discharge of his duties at once, and is busily en gaged in putting the town in good sani-

There is a prospect that the West Le Rdi and Josie property will soon be rid of all its entanglements and sold to a strong company. There were large transfers of the company's shares last week and it transpires that the Jones Warren wing have secured control, they now holding over four-fifths of the

shares. The new blast furnace of the Trail smelter has a capacity of 150 tons a day, and when it is in operation the total capacity of the plant will be 450 tons. It is believed this will be sufficient to meet the present requirements of the camp, especially since three of the leading mines are sending their ore to Nelson. The Le Roi would alone be able to keep the Trail smelter running for many months with even its increased capacity of 450 tons a day, if the ore could be treated alone, but it is so silicious that ores having a greater percentage of copper and a greater percentage of iron are running into the Josie from the Poor-

worth nearly \$1.000. have plenty to do, for there are now five priceless value. feet of solid, high grade ore in the Iron

ing a body of good ore. An assay made last week showed \$25 in silver and \$5.50 in gold. The ledge matter is thoroughly mineralized and is improving in char-

acter every day.

The building for the Monte Cristo compressor is approaching completion. The new plant will be complete and in oper-ation in a short time. When it is there will be five compressor plants in Centre Star gulch. A year ago there was not

A despatch to the Times from Canea says: "A large body of Mohammedans, Mohammedan refugees and Bashi Bazouks, many of whom are supplied with None of the assays went below \$50 in gold and many of them went \$100, and tarday to attack the town of Archange. terday to attack the town of Archanes, where thousands of Christian refugees where thousands of Onrightal Archanes are assembled. The people of Archanes have telegraphed the Sultan imploring protection. Several

Bournmouth, where Mr. Herz was visit-ing his son: His death was the result of a surgical operation. He intended to return to New York on Saturday.

A revolutionary conspiracy has been liscovered and frustrated at Gerona, about 50 miles northeast of Barcelona, Spain.

President Alonzo, of Bolivia, has assumed the duties of his office and prospects for a long-continued peace are excellent. The members of his cabinet are as follows: Interior, Gen. Sanguinez; foreign affairs, Manuel Maria Gomez war, Jorge Oblitas; justice, Macario Pinilla: finance, Lisimaco Gutierrez. It is reported that Dr. Nansen intends to conduct an expedition to the Antarctic ocean in search of the South Pole before

returning to the Arctic region. The danger of a cabinet crisis in Germany and the resignation of Chancellor Hohenlohe seem to have been averted by the statement of the Reich-sanzeiger that Emperor William desires a bill to be drawn up and submitted to the bundesrath relative to reform in the criminal procedure of the army. This acceptance of a measure along the lines of the recent speechthe steady pressure of public sentiment has resulted in the defeat of the irresponsible military coterie whose growing influence in the highest quarters had threatened to render the imperial chancellor's position untenable.

SMELTER FOR VANCOUVER.

Construction to Begin in Thirty Days-British and Eastern Capitalists Interested in the Enterprise.

TACOMA, Aug. 26.-W. R. Rust, superintendent of the Tacoma Smelting & Refining company, left the city this mornthe East. One of the results of his trip was the organization of a company which will construct and operate the smelting and refining plant referred to. Mr. Rust

"We expect to be at work on the construction of the new plant within thirty days. It will have a capacity of about 400 tons of ore per day, or four times the present capacity of the Tacoma smelter, and will smelt and refine copper, lead, gold, silver and other metals. Four stacks will be erected and the works will run day and night, employing 250 men steadily. I expect the plant will start up about six months

"The company which will erect and operate the works was organized, during my late visit East, after conferences held at Montreal and New York with capitalists. The head of the syndicate is C. D. Simpson, of Scranton, Pa., one of the most extensive miners in that state, and reputed to be worth \$3,000,000. Other nembers of the syndicate I am not at iberty to name. Neither can I state the names of those whom I will meet at Vancouver to-morrow. The capital stock of the syndicate is one million dollars, and every cent of it is now paid up. The smelting and mining company absolutely necessary. The Le Roi consequently ships a goodly percentage of vania expedition to Babylonia has been will be incorporated under the laws of

"The ore for the new smelter will come from mines in the Rossland and to devote my time to the practice of law maroon and rose glace taffeta, Maroon

Replying to a question why the new smelter is to be erected in British Coand lead ores had considerable to do with it and that Eastern capitalists were timid about investing money in smelting en-terprises until the election is over and they knew what the policy of the gov-

ernment is to be.
A prominent citizen yesterday quoted Mr. Rust as saying that the reason the smelting plant was going to British Columbia was because English capitalists,

who are largely interested in the scheme, would not invest money in the United States, owing to the free silver craze. If McKinley is elected and a sound and stable currency is assured foreign capital will then take hold and be invested for the development of Am-

TO DULK PER PRESENT STATE OF STREET AUGUST THE VICTORIA SEMI-WEEKLY COLONIST THURSDAY AUGUST 27 1896

> erican resources. It is well known that under the Mc Kinley law large smelting plants were established all over the West, and they all prospered because an era of good times reigned, and American workingmen were given a chance to earn honest money. During that period, also, not a single smelter was erected in British Columbia or in any of the Canadian provinces, although then the tariff on lead, silver and copper ores was more than double what it is to-day.

SULTAN OF ZANZIBAR DEAD.

British Sailors Landed to Maintain Order. Washington, Aug. 25 .- The state department received a cable message that the Sultan of Zanzibar died at 11 a.m. yesterday; that Said Ali holds the

palace, that sailors and marines have been landed, and that rioting to-night is ZANZIBAR, Aug. 25.-The Sultan o Khalifa and Burghash, and succeeded to

Seyid Kalid occupied the palace, takcaded himself in the palace with 700

armed Askaris. Sailors from the British warships Philomel, Thrush and Sparrow have been landed to protect property ashore, and all the ladies have been lodged in the British consulate, which is guarded by the sailors. Trouble is feared.

OTTAWA NOTES.

The Dead Meat Scheme Revived-Major Perley Dismissed-Well Known Citizen Dead,

OTTAWA, Aug. 26.—There was a meeting of members of parliament to-day to discuss the Three Rivers or Quebec dead meat scheme. What the promoters want is \$250,000 per year for ten years. It is not likely that the scheme will mature. The promoters will interview the

government to-morrow.

Major Perley, formerly chief engineer of public works, but during the last two years on the engineering staff of the railways and canals department, has been notified that his services are no longer

Wentworth Monk, who has been well known around Parliament hill for years and was noted for his eccentricities, is dead. A great idea of his es of Prince Hohenlohe indicates that was that Great Britain might purchase Palestine and present it to the Jews, and that the Jews might be congregated in their native land and form once more a royal race. This idea he had connected with international arbitration, by which peace was to be assured to the world at

BROWN OF SAN FRANCISCO.

His Friends Endeavoring to Prevent His Prospective Expulsion From the Bay Conference

San Francisco, Aug. 25,—The triends of ex-Pastor Brown are beginning a sysing for Vancouver, B. C., to meet a number of representatives of British and American capitalists. They will select a site in the vicinity of Vancouver, for a overman and Mrs. Tunnel have been made and water of the confessions of Mattie of the vicinity of Vancouver, for a overman and Mrs. Tunnel have been made and water of the confessions of Mattie of the vicinity of Vancouver, for a overman and Mrs. Tunnel have been made and water of the confessions of Mattie of the vicinity of Vancouver, for a overman and Mrs. Tunnel have been made and water of the vicinity of vancouver. tematic effort to prevent his expulsion ence. Since the confessions of Mattie a site in the vicinity of Vancouver, for a large smelting and refining works, of made public, many of the ministers comwhich Mr. Rust will be manager. Mr. posing the Bay Association are outspok-Rust returned last week from a visit to en in their desire that he should at once en in their desire that he should at once be summarily dismissed from the ministry, and were conference convened at once it is probable that such action would find few opponents. The conference, however, cannot legally convene until December, and in the meantime Dr. Brown's friends hope to rally a sentiment in his favor. The conterence is composed of the pastor and two lay delegates from each of the Congregational churches about the bay. Isaac N. Morse flatters himself that he has yet some influence with many of the pastors by reason of his still con-trolling the affairs of the First church, and this is to be exerted to the fullest extent in Brown's interest. A meeting of Dr. Brown's former adherents will be from the ministry will probably be decided upon.

SECRETARY HOKE SMITH.

Washington, Aug. 26. - Secretary Hoke Smith briefly outlined his plans in My resignation was due alone to as being more becoming to the figure. the fact that I intend to support Bryan and Sewell. I have always voted the regular Democratic ticket and shall make make two or three speeches in Georgia ornamented with applications and has a for the State and National ticket, but vest of changeable taffets and a chemisette attention to my professional and private are trimmed with plaited coquilles of gray business will not permit me to enter ac- gauze and the close lower part of the sleaves state.'

Colic Cured. DEAN SIRS, I was very bad last summer with collidated a few doses of Wild Strawberry cured that I am safe in recommending it as the best re nedy ever used. I cannot speak too highly Mrs Alfred Vice, Berlin, Ont.

MILLINERY MATTERS.

Ostrich Feathers on Large Hats—Flower of Fine Quality.

Flowers are worn in profusion, and they ire finer in quality and more perfect in design than any heretofore shown in the parket. It would be difficult indeed to select the natural from the artificial without touching them, so perfect is the imitation. Among the popular flowers are mignonette, cornflowers, poppies, roses and orchids, with an abundance of greenery. Foliage in rich red bronze and autumn leaf colors is much liked.

Feathers are even more favored by the better dressed among fashionable women than flowers are. Rich, thick ostrich plumes, either black or white, are most in ashion. On very large hats the profusion of feathers is preposterous. Sometimes as many as 11 are used to trim. One large clume is carried around the crown, two or three fall over the hair at the back, and 4:37:07. the others stand erect or are laid about in various directions. If the present fancy for feathers continues for any length of time, the business of ostrich farming will be an exceedingly profitable one, as good feathers

STRAW HAT

always bring a high price. Ostrich plumes and aigrets, the feathers are not obtained

Jeweled insects-butterflies and dragon flies in particular—ornament many fashionable articles of headgear. Sometimes these artificial flies, particularly the dragon flies, are wonderfully good imitations of nature. The French nation excels in mimicking insect life, in both genuine and imitation gems and metals, and the most perfect specimens of the art are seldom seen on this side of the Atlantic.

An illustration is given of a hat of crimped straw of a bright poppy red shade. It is trimmed in front with straw colored gauze and at the sides with yellow roses. A cluster of black ostrich plumes is placed near the back. With this is worn a collar of red velvet, above which is a frill of embroidered white gauze. The cravat is also of embroidered gauze.

JUDIC CHOLLET.

extremists the most excitable will always COSTUME OF THE PERIOD. be selected for a leader. Serviceable Lace Dresses—Full Belts on New Parisian Costumes.

coming and every way desirable style, and arrayed in one of these a woman felt herself presentable for almost any occasion. THE CANADIAN TROPHY. International Cup and Purse Won by the Dominion Yacht "Canada."

Toledo, Ohio, Aug. 25.—Yesterday the Canadian yacht Canada defeated the American yacht Vencedor in the first race for the international trophy, making ! the course in 5 hours 40 minutes, or 11

minutes within the limit. The race was for the most part a driftng match with occasional light breezes n which the Canada did the best work. During a 12-mile an hour breeze the Vencedor gained on her rival, but there was not enough of that sort of weather. The following were the figures:

Canada, start 11:00; actual time, 1:01:20; finish, 4:19:08; corrected ime, 4:14:23.

Vencedor, 11:00; 11:00:40; 4:37:07;

This morning the wind was higher, and the course was five miles to windward and return, the course to be sailed twice, making the sail one of 20 miles. The start was delayed half an hour by the Canada carrying away her topmast halyards. The gun was fired at 11:30. The Vencedor got over the line 12 seconds after and the Canada 40 seconds after. The Vencedor was carrying her spinnaker, club topsails, balloon jib and staysail. The Canada, had out her club topsails, big jib topsail and spinnaker. some of the prettiest jockeying ever seen in a yacht contest was displayed before

the start. The wind blew 20 miles an hour with a tendency to shift into the west. Almost unexpectedly the Canada won by 26 seconds; thus taking the trophy. The races were the best two in three, under the New York Yacht Club rules, with a few amendments. The trophy to be sailed for is a cup valued at \$500, which is to go to the club from which the winner shall sail. This latter, according to the conditions imposed by the donors, becomes a perpetual interlake trophy. Besides these prizes there is \$1,500 in cash donated by citizens of Toledo through the international yacht race committee.

THEORY OF POPULISM.

Bourke Cochran Declares Its Conception of Society to Be One of Warfare and Strife.

NEW YORK, Aug. 19.—In the course of his great speech in Madison Square Garden last night on the subject of Opposition to Repudiation, Bourke Cochran, the champion of the gold Demo-

crats, said: "Wherever Populists are assembled you will find discussion proceeding upon the theory that men are hostile to each other in their interests; that the condition of life is one of contest. At Chicago Mr. Bryan declared: 'When you come before us and tell us that we shall disturb your business interests, we reply that you have disturbed our business interests.' I answer that he was right. My friends, when a man loses all sense, he has a right to defy those who possess any. (Laughter.) In a convention of

"I merely desire to call the attention of this gathering to the character of that speech, to the 'Efforts are being made to revive the lace underlying spirit that pervades it, dress, but thus far with only indifferent and to ask the workingmen of success. It was always a comfortable, be this country, to ask the citizens of this We believe the world has operation. even though she pays a good price for it got past the time when men's hands are at each other's throats. We believe today that men should stand shoulder to shoulder working together for a common purpose beneficial to all, and we believe that this attempt to assail wages, which means an attempt to attack the prosperity of all, will be resisted, not by class, but by the whole nation. What labor has gained, that shall it keep. The rate of wages that is paid to it today is the lowest rate we will ever willingly accept. We look forward to a further and further increase in the prosperity of the workingmen, not merely by an increase in the daily wages, but by a further increase in the purchasing power of wages. Men who tell us that the prices of farm products have fallen, and that the farmer for that reason is a sufferer, forgets that while the price of wages has risen off the farm, the efficiency of labor has increased; that the cost of production has been reduced through the aid of machinery, while the wages of the individual laborer may have risen. While wages remain at their present rate. I hope there will be a further and further continual decrease in the

While we have in existence a system of mutual co-operation, which is but another name for civilized society, all are admitted to share in every bounty which stume over a silk lining, there is nothing providence showers upon the earth. The his bench, who never sees a field of A full belt, soft in appearance, but as waving corn, who has never inhaled the perfume of grasses and of flowers, is yet made the participator in all the bounties ment. It is made over a close lining, of of providence, in the purifying influences course, and in order to drape well the maof the sun, when the product of the soil is made cheaper to him every day by the abundance of the harvest. (Applause,) "It is from his share in this bounty that the Populist wants to exclude the American workingman. To him we say, in the name of humanity, in the name of progress, you shall neither press a crown of thorns upon the brow of labor, nor press a scourge upon his back. (Applause.) You shall not rob him of study, f progress in the skill of his craft, and of the careful organization of the members who work with him at the same bench. You shall not obscure the golden prospects of a further improvement in his condition by a further cheapening of the cost of living, as well as by a further depreciation of the dollar which is paid to him. (Applause.)

cost of living.

"The man who raises his hand against the progress of the workingman raises his hand against prosperity. He seeks to restrict the volume of production; he seeks to degrade the condition of the man who is steadily improving himself and in his own improvement is accom-plishing the improvement of all manking, but this attempt will fail.

Why Some People Fail.

The world is full of people who have failed because of Dyspepsia, Biliousness and Constipation, which are responsible for nine-tenths of life's miseries. Burdock Blood Bitters cures these diseases as well as all other diseases of the stomach, liver, bowels and blood in 99 cases out of 100.
