Catarrh - A New Treatment.
From the Weekly (Toronto) Mail, Aug. 24. by the Dixon treatment for catarrh. Out of two thousand patients treated during the past six mannins fully nisety per cent have been cured of this stubborn malady. This is none the less startling whon it is remembered that not five per cent of rations presenting thomselves to the regular practitioner are benefited, while the patent medicines and other advertised cures never record a cure at all. St ring with the claim now generally believed by the most scientific men that the disease is due to the presence of living paresites in the tissue, Mr. Diton at once adapted his cure to their extermination—this accomplished, he claim the caterrh is practically cured and the permanency is unquestioned, as cures effected by him two years ago are cures still No one else has ever attempted to cure estarth in his manner, and no other treatment has ever cured catarrh. The application of the remedy is simple and can be done at home, and the present season of the year is the most favorable for a speedy and permanent cure, the majority of cases being cured at one treatment. Sufferers a huld correspond with Mr. A. H. Dixon 305 and 307 King street west, Toronto, Canada, and enclose stamp for his treatise on estarrh
