

WHEN you require a roof, the measurement will be in squares (100 square feet). A basis for analysis of the costs of Brantford Asphalt Slates is given below:

- 1—INITIAL COSTS OF MATERIALS—Brantford Asphalt Slates are sometimes higher in initial cost for the material.
- 2—NAILS REQUIRED—Brantford Asphalt Slates require ONLY 664 nails to lay a square. Brantford Asphalt Slab Slates require ONLY 450 nails.
- 3—COST OF LAYING—Brantford Asphalt Slab Slates are four on one strip—require only one operation in handling, one operation in spacing—individual slates are 8 x 12 1/2 inches—Cut easily, fit easily, fit on angles and bend over round surfaces. You save 30 to 40 per cent. in laying.
- 4—NO PAINT OR STAIN REQUIRED—The surface of Brantford Asphalt Slates is in nature's permanent colors; green and red, undecolorable, always attractive—requiring no stain to produce artistic effects, no liquid costs to make them fire-resistant.
- 5—SAVING OF INSURANCE—Brantford Asphalt Slates are classed as non-combustible by fire insurance companies—a direct saving of from 10 to 20 per cent. on premiums is effected. In certain localities fire regulations demand asbestos paper under some roof materials, but Brantford Asphalt Slates are fire-resistant and are immune from special regulations.
- 6—COST OF REPAIRS—From the day they are laid Brantford Asphalt Slates roofs show almost 100 per cent. of the original roof untouched. Brantford Asphalt Slates do not curl, split, crack or rot. Complete protection and permanent protection are built into Brantford Asphalt Slate Roofs.

Compare these roof costs with those of any other roofing material; it is your money you are spending and you want value for it—then buy

Brantford Asphalt Slates

THE STANLEY WILSON SUIT

The death of the late Justice Sutherland brings about a strange condition of affairs in regard to cases recently tried in the Supreme Court, Sarnia, and on which no judgment was handed down by the deceased judge. This means that three civil suits must be retried, making very additional costs necessary to the litigants through the reason of the judge's decision being reserved. Most important of these is the action of M. Stanley Wilson against the County of Lambton, in which the plaintiff claims \$10,000 damages for the death of his wife and two children in an auto accident in May, 1921. Seventeen witnesses were called for the plaintiff and 20 for the defendant, and another trial will involve considerable expense. The other two suits were Christina Ranger against Jacob Sproule, an action by the plaintiff for injunction restraining the defendant from continuing an obstruction of the highway on the west half of lot 20, concession 1, Enniskillen Township, also asking damages. The third was the action of Dell Spain against Alfred Alderton to secure performance of agreement.

PIONEERING NEAR ARKONA

J. B. McLachlan, Toronto, writing in "Early Days in Williams" for the London Advertiser says:—"There were several gristing mills driven by water power on the Sauble within the boundary of the township One at Nairn (Miller McIntosh's) was among the first to be erected. There were two about one mile east of Arkona; one owned by a Mr. Henry Saul. They kept each other poor, contesting in the courts the right to the water power. Then lower down the river "Rules" ran another mill, near where the Sauble takes a turn to the north. There is a dam near the same place now, creating electric power for Arkona and vicinity. Further down the stream there was a woolen mill owned by a Mr. Austin, in a line with the 10th concession westward. I remember two of my brothers and myself taking our wool there one season to get carded, carrying the same a distance of about ten miles. One of Mr. Norman Lamont's daughters spun the same into yarn, and old James Watson, a neighbor, wove it into cloth, which finally found its way to cover the fast growing bodies of us youngsters. Let the boys of today look back at this picture and smile. A few years ago, being in Michigan, I met Mr. Austin, still hale and hearty and living in Sanilac County, in that state. Later still a Mr. McLean built a flour mill on Glasgow street, but for some reason was not a success. I fancy the current of the Sauble was too sluggish at that part to develop power enough for the purpose of a mill. However, these and others of the same kind have gone with the past, making way for other motive power."

Two good reliable remedies which guarantee results are RAH-MAH for Asthma and Bronchitis, and T.R.C.s. for Rheumatism, Lumbago, Neuritis, etc., are sold by J. W. McLaren.

THE LATE MRS. R. BAILEY OF WARWICK

Margaret Lawson, relict of the late Robt. Bailey, died on Thursday, May 18th, at the residence of her daughter, Mrs. Robt. McKay, Wyoming. She had been poorly for some time but had only been bed-fast for about a week before her death. She was born in the town of Perth and came to Plympton when quite young where she resided until the time of her marriage to Robt. Bailey of Warwick, who predeceased her ten years ago. She is survived by one son and two daughters: George L. on the home-stead, Mrs. Robt. McKay of Wyoming and Mrs. Wm. Vennings of Plympton. The funeral was held from the residence of her son on Saturday afternoon at Beechwood cemetery, services being conducted by the Rev. W. M. Shore of the Warwick Anglican Church of which church deceased was a life long member. The bearers were D. McLachlan, N. Herbert, D. McKay, A. Archer, C. Wall and R. Sparling.

B. W. FANSHER OF EAST LAMBTON ON LIBERAL BUDGET

Ottawa, May 30.—B. W. Fansher, Progressive member for East Lambton, broke into the limelight yesterday in the house of commons by launching an attack on the protective tariff in general, and on the special tax applied by the budget to the sugar beet industry.

After blaming the fiscal policy of the country for several years past for a large measure of the failure of Canada to progress rapidly, Mr. Fansher said: "In times past our tariff policy has not had that fair consideration at the hands of the electorate that it should have had, for always there has been injected into the issue other issues not relevant at all, and which were introduced to obscure the real issues before the people."

Even since 1911 the demand for a downward revision of the tariff was insistent, the speaker continued, and was admitted necessary by Sir Thomas White. The great war, he believes, was the one thing that prevented a general change.

Mr. Fansher expressed himself pleased with the statement in the budget that all inherent native industries of the country should be encouraged. But he believed that the tariff reductions which were made did not go very far in that direction. He feared also that the sales tax would neutralize the beneficial effect of the cut in the tariff on agricultural implements.

THIN BLOODED PEOPLE

Need a Tonic to Enrich the Blood and Restore the Health.

Some people have a tendency to become thin-blooded, just as others have an inherited tendency to rheumatism, or to nervous disorders. The condition in which the blood becomes so thin that the whole body suffers, comes on so gradually that anyone with a natural disposition in that direction should watch the symptoms carefully. Bloodlessness, or anaemia, as the medical term is, can be corrected more easily in the earlier stages than later. It begins with a tired feeling that rest does not overcome, the complexion becomes pale, and breathlessness on slight exertion such as going up stairs, is noticed.

Dr. Williams' Pink Pills are a home remedy that has been most successful in the treatment of troubles due to thin blood. With pure air and good food these blood-enriching pills are the correct treatment when the symptoms described above are noticed. The value of Dr. Williams' Pink Pills in cases of this kind is shown by the statement of Mrs. M. Chase, of Trenton, Ont., who says:—"I can highly recommend Dr. Williams' Pink Pills to all who suffer from anaemia and nervous exhaustion. For three years I was nearly always troubled with headaches, and until I began taking these pills no treatment seemed to do more than give me temporary relief. I had read of what Dr. Williams' Pink Pills were doing for others and finally decided to try them myself. I further decided to give them a fair trial and kept on taking them regularly for several months and I am glad to say have derived permanent relief. I feel that I can safely and honestly recommend this wonderful medicine."

You can get Dr. Williams' Pink Pills through any dealer in medicine or by mail, at 50 cents a box or six boxes for \$2.50 from The Dr. Williams' Medicine Co., Brockville, Ont.

BIGGEST INTERIOR SET IN NEXT PICKFORD FILM

Mary Saved No Expense in Making Latest Production Most Stupendous of Its Kind

The biggest interior set in the world, built on the biggest motion picture stage in the world, will be one of many features of "Through the Back Door," Mary Pickford's next United Artists' release, to be shown at the Lyceum, Wednesday, June 7th.

This movie set shows five great rooms and a large hallway with stairs that reach to a landing on the second floor. All told, 4300 square feet of floor space are included in this set, exclusive of the area required for "shooting space."

Representing the entire lower floor of a Long Island mansion, this gigantic replica is said to be the most sumptuously appointed set ever built for pictures. The properties displayed upon it were valued at \$100,000. The set was designed by Stephen Goosson, art director for Mary Pickford, and "dressed" by Thomas Little, head of the property department at the Brunton Studio.

In addition to the lower floor of the Long Island home featured in "Through the Back Door," there is also an up-stairs set including three large bed rooms and a hallway in which the stairs go down to the first floor. This structure covers 2000 feet of floor space and like the lower floor is elegantly furnished with genuine oriental rugs and real antiques. The value placed on the furnishings by Thomas Little was \$50,000.

Although the mansions of Southern California furnished most of the exteriors for this Pickford film, two very remarkable reproductions of Belgian farm buildings were put up—one of them on the stage, the other in a field near the studio. So realistic were these Belgian farm buildings that they were pointed out to tourists by "rubber-neck wagon" conductors as real structures that would be sold as residences after they had served their purpose in Miss Pickford's photoplay.

Canada's most Popular Car The Chevrolet 490

PUBLIC favor changes when reasons for a change are obvious. Public opinion as to the most popular car of the future is changing.

Users of low-priced motor transportation are demanding completely equipped automobiles, modern in every respect, with nothing left to buy but the license plate. The new Superior Chevrolet is fully equipped, including modern 3 speed forward and reverse, sliding gear transmission, standard service and hand brakes, electric starter, demountable rims, water and oil pumps and speedometer. In addition to completeness, buyers insist on real economy in four important essentials. They demand low initial cost; low gasoline consumption; low repair costs; and long tire life. The new Chevrolet excels in these particulars. Twenty-five to thirty miles on a gallon of gasoline is not uncommon. It excels in oil economy as well. Repair costs are low, because every Chevrolet part is built to give long life under hard conditions.

You owe it to yourself to examine the new Chevrolet, the car which is establishing a new standard and has become Canada's most popular car.
