## Fairchild Brothers & Foster

---

Specialists in the Applied Chemistry  
of the Digestive Ferments

---

offer preparations of the gastric and pancreatic juices which are true to name, containing the particular digestive enzymes as described and of the particular degree of activity, stated under well-known conditions of assay. These products have invariably been found to possess the properties, and perform the particular service stated as actual digestive agents for the peptonisation of foods—farinaceous, cereal, milk, beef, etc. Thus, every time they have been used they have been actually "tested."

It is an axiom, that "we know digestive enzymes only by their action." In pharmacy and in medicine we deal only with active enzymes capable of demonstrable action; and the test for the presence and activity of an enzyme is as conclusive and demonstrable as the test or reaction for quinine or arsenic.

FAIRCHILD BROTHERS & FOSTER have persistently and consistently sought to advance the application of the digestive enzymes in every useful direction, and to develop their possibilities in medicine. They have, therefore, never made inert, feeble and incompatible preparations. Whenever and wherever dispensed a product of the digestive ferments bearing the name FAIRCHILD will be found reliable in the most unequivocal sense of the word.

Agents for the Dominion :—HOLDEN & CO., Montreal.
