

repetition of questions and answers which mars so many of the compends now in use. Written in systematic form, the consideration of each disease begins with its definition, and proceeds, through the usual sub-headings, to prognosis and treatment, thus furnishing a complete, readable text-book in miniature.

A Text-Book of Physiology. By ISAAC OTT, A.M., M.D., Professor of Physiology in the Medico-Chirurgical College of Philadelphia. With 137 illustrations. Royal octavo, 563 pages. Bound in extra cloth. Price, \$3.00 net. F. A. Davis Company, Publishers, 1914-16 Cherry Street, Philadelphia, Pa.

The volume before us meets all the requirements of a very advanced text-book. It has brought the subject of physiology, which has made such rapid strides in the past few years, up to date. The style of the author is free, which makes the reading very much easier. Technique has been omitted, but the results of experiments are carefully given. It is necessary to the successful practice of medicine to be well grounded in physiology, and a text-book of the quality of Otts' is essential to the better understanding of this more elaborate treatise. We can thoroughly recommend the work to the student of medicine.

Diseases of the Skin. Their Description, Pathology, Diagnosis and Treatment, with special reference to the skin eruptions of children and an analysis of 15,000 cases of skin diseases. By H. RADCLIFFE-CROCKER, M.D. (Lond.), F.R.C.P., Physician for Diseases of the Skin in University College Hospital; Honorary Member of the American Dermatological Society; Membre Correspondant Etranger de la Société Française de Dermatologie; Correspondierendes Mitglied der Wiener Dermatologischen Gesellschaft; Socio Onorario della Società Italiana di Dermatologia e Sifilografia; late Physician to the East London Hospital for Children; Examiner in Medicine, Apothecaries' Hall, London. Third edition, revised, rewritten and enlarged. With four plates, two of which contain 12 colored figures, and 112 other illustrations. Octavo. P. Blakiston's Son & Company, 1012 Walnut Street, Philadelphia. 1,400 pages. Cloth, \$5.00; sheep, \$6.00.

The new third edition maintains the high standard of excellence of the previous edition. The recent progress in dermatology makes an authoritative work upon the subject a positive necessity. It is a safe, accurate, eminently practical and strictly modern treatise, well and clearly written by a man of large experience and most excellent judgment. Though completely scientific, it is written in such a happy manner that the tyro may follow the writer almost as readily as the expert on diseases of the skin. It will be seen, therefore, that it appeals to general practitioners as well as specialists, while to the student it will serve as a valuable guide when he enters upon the more arduous task of practice.

The etiology, symptomatology, pathology and minute anatomy, constitutional conditions, diagnosis and treatment of each disease mentioned is fully entered upon, the therapeutics,
