CINCHO-QUININE.

CINCHO-QUININE holds ALL the important constituents of *Peruvian Bark* in their alkaloid condition. It contains no sulphate of cinchonine or sulphate of quinine, but cinchonine, quinine, quinidine, etc., without acid combinations. It is now nearly four years since it was placed in the hands of physicians for trial, and the verdict in its favor is decisive.

The cut below gives the size of the one ounce phial, and the form of putting up.

At the present price of sulphate of quinine, it is sold at about one-half the price of that agent, and with the testimony offered that it has equal tonic and anti-periodic effects, and that it is less objectionable, there seems to be no good reason why it should not be universally employed by the profession.

Dr. J. A. PERKINS, of Chestertown Md., under date of Feb. 10, 1872, writes us as follows:—"I have used your preparation of Cincho-Quinine during the past summer in a malarious district. I find it entirely reliable as a substitute for the sulphate of quinine. It produces less unpleasant effects on the head, and is much better borne by the stomach. In the cases of children, I have found it to be a very desirable remedy, on account of the much less unpleasant taste. I use it satisfactorily in all cases as a substitute for the sulphate."

I have used one and a-half ounces of the Cincho-Quinine, and I think very favorably of its effects. In a case of intermittent fever (the patient from Tennessee), I found it to operate as well and as promptly as sulphate of quinine, without any unpleasant head symptoms. In no case have I discovered any unpleasant cerebral disturbance, as is often found in the use of the quinine.—J. M. ALDRICH, M.D., Fall River, Mass.

I have used several ounces of Cincho-Quinine with the most complete success. I prefer it to the sulphate of quinine in intermittents, especially with children. I can strongly recommend it to the profession generally.—J. H. FREY, M.D., Perry, Iowa.

The Cincho-Quinine which I have used gave entire satisfaction. It has all the advantages which you claim for it, and doubtless it will in time supersede the use of sulphate of quinine entirely.—SAMUEL W. COONS, M.D., Madison, Ala.

I have used Cincho-Quinine in eight or ten cases, and have reason to think well of the results. I give it as I do the sulphate, 10 grains in five doses during the intermission, and 5 grains one or two hours before a paroxysm is due, and continue to give 5 grains once a week for three weeks. I shall continue to use it, and wish you to send me one ounce by mail—J. C. DOWNING, M.D., Wapping Falls, New York.

After further continued trial of the Cincho-Quinine, I can safely say that it is a most excellent remedy. The absence of cinchonism in its use, its comparatively pleasant taste, its cheapness, with its fully equal tonic and anti-periodic qualities, make it an article which must soon be indispensable in the list of remedies of every intelligent physician.—S. A. BUTTERFIELD, M.D., Indianapolis, Ind.

I have been using the Cincho-Quinine in my practice in intermittents and remittents, and I think well of its I believe it to be quite equal to the sulphate, with all the advantages you claim for it.—J. C. ROSS, M.D., Lincoln, Ill.

I have used an ounce of Cincho-Quinine in some obstinate cases of intermittent neuralgia and ague, and am happy to state that it has thus far sustained in full the anticipation raised by what you have claimed for it. Dr. S. S. CUTLER, of this city, has an extensive general practice, and he informed me a few days ago that the Cincho-Quinine was giving satisfaction.—J. H. BERCH, Coldwater, Mich.

We can now supply SUGAR-COATED CINCHO-QUININE PILLS of three sizes, namely, 1 grain, 2 grains, and 3 grains, in such quantities as are wanted. They are placed in vials holding 100 each. The price is about one-half that of Quinine Pills. Dose the same.

BILLINGS, CLAPP & CO. (Successors to James R. Nichols & Co.)

MANUFACTURING CHEMISTS, BOSTON, MASS.

Manufacturers of Acids, Chloroform, Ether, Preparations of Gold, Silver, Tin, Zinc Lead, Iron, Bismuth, and Pure Chemicals used in Medicine or the Arts.
