

An attractive little general flower house

Greenhouse Building Information How to Secure it First Hand

FROM any one of our representatives, from any one of our nine offices, either by correspondence or through a meeting made at a time and place of your suggestion, is one way.

Another way, is to send for our Greenhouse Book No. 342, just published

It contains direct, definite information, and is freely illustrated with over 100 subjects ranging from small lean-to greenhouses to pretentious ornamental groupings.

Back of the facts we give you, is our greenhouse building experience covering considerably over half a century.
