

Mexico's total forested area can be further subdivided as follows:

TABLE 4  
MEXICO'S FORESTED AREAS  
(million ha, % of total territory)

Forest Type	Area (million ha)	% of Total Territory
Wooded areas	28.2	10.9%
Other forested areas:	104.7	33.4%
- tropical rainforests	11.4	3.8%
- tropical dry forests	29.3	9.4%
- medium forest	9.3	2.9%
- high forest	2.1	0.7%
- latifolia	8.8	2.8%
- conifers & latifolia	18.7	5.9%
- Other forested areas:	104.7	33.4%
- disturbed areas	17.8	5.6%
- hydrophilous vegetation	1.5	0.5%
- dry forest	10.7	3.3%
- microphyllous scrub	32.4	10.1%
- coastal scrub	7.8	2.4%
- mesquite scrub	8.8	2.7%
- evergreen forest	25.1	7.7%
- deciduous forest	25.1	7.7%
- semi-deciduous forest	7.0	2.2%
- thorn scrub	10.7	3.3%
