

Catalogue of Canadian Specimens.

For the convenience of those collectors and others who may wish for single specimens we direct their attention to the following list of Canadian minerals. It is impossible to stipulate any price for individual specimens, as they will vary according to their perfection, rareness, etc. We, however, quote their lowest and highest price, their intermediate prices will depend on size, etc. As we can scarcely expect to have every mineral on hand at the same time, we assure those collectors and others that may favor us with their patronage, that we will endeavor to obtain for them any specimen that may not be in stock at the time their order is received.
