Cobalt Securities Show More Buoy-

ancy With a Turn in the

Money Market.

World Office
Friday Evening, April 10.
The lethargy on the Mining Exchange gives very fair evidence of being shaken off if to-day's markets are any indication of the impending sentiment. Money tightness, which has been a barrier to new purchases for several months past gives every promise of

months past, gives every promise of having lapsed into history. Speculators have become seized of this fact, and

NO COBALT STRIKE.

have become seized of this fact, and are buying in advance of the demand, which they consider is bound to develop. One broker on the Standard Exchange this afternoon had a standing bid thmuout the session for a 25,000 share block of Silver Queen at 1.04. A short time ago this proposition would have been accepted readily, but to-day no one ventured to fill the order. There was good buying of several issues, the chief of which were Crown Reserve, Silver Leaf, Little Nipissing and Silver Queen. The most important item in to-day's

standard silver securities. A rumor was in effect after the close of the market that an important movement was about to develop in Silver Leaf. The mar-kets closed firm with a good all round demand at quoted prices.

# LITTLE NIPISSING MINE THE NEXT NEW SHIPPER

Big Development Work Now Going on at All the Important Properties.

COBALT, April 8.—(From the Man on the Spot.)—Ten Cobalt mines shipped twenty cars or 519.72 tons of ore last week. The La Rose sent out five cars or 119.41 tons; the Trethewey three cars or 91.28 tons, and the Silver Queen two cars or 61.71 tons. The La Rose sent a car of high-grade ore to Perth Amboy and the Trethewey a car to Copper Cliff. La Rose shipped four cars of seconds to Denver, and the Trethewey one there and one to

Carnegie. The week's shipper	s were

This property is being vigorously developed at the present time, and they have uncovered a vein that has attracted the attention of the whole camp. In fact it is the largest and richest vein in the camp to-day. The knowing people are buying this stock for a good substantial advance, and we believe parties buying at the present time should easily double their investment. It is reported that the ten tons shipped to the smelter brought back almost \$100,000. This stock is easily worth double what it is selling at to-day. We have personally inspected the property and advise all our clients to buy some of this stock. Send orders to buy at the market.
