GUARDING OUR TREASURES.

Never in the history of British Columbia have her interests been so closely and jealously guarded as at the present time. The watchdog of the government is continually on the alert lest the people be despoiled of their resources by the greedy trusts of our hungry southern neighbors. No wonder the House is almost stricken dumb by the extraordinary change which has come over Hon. D. M. Eberts, the Attorney-General. In the old days before Mr. Dunsmuir entered the Legislature and the government millions of dollars worth of the heritage has created it. of the people was handed out to promoters, home-grown or alien, almost without examination of the terms and conditions of the same. We are paying governments and their supporters of precaution on the part of the governformer times and for the lethargy of ment in granting charters to railway the Attorney-General who never sleeps companies, and for the regulation of at his post now. Perhaps Mr. Eberts freight and passenger rates by the reis profiting by his experience in the past; pin handy for use when the symptoms of Attorney-General for some evidence of the old malady appear; or again there may be influences at work which are not allowed to appear openly. Whatever the cause, it is proposed to impose conditions on companies desiring for the Midway & Vernor Pailway Bill and the Midway & Vernor tions on companies desiring franchises the Midway & Vernon Railway Bill, and which would never have been thought of which he has given notice he will move in times gone by. To be sure the world do move. The path of the promoter in him out. But there are bona fide en- isfaction of the Lieutenant-Governor-interprises asking for concessions from the Counciland those of some years ago. One of traffic: these is the Crow's Nest Southern Rail-way Company. It asks for nothing from ment to the promoters herein for a line the government but the right to build a railway, and judging by the history of this province railways are very desir-ditions shall be assumed and carried out the proposed in this act, the foregoing conditions shall be assumed and carried out the route proposed in this act, the foregoing conditions shall be assumed and carried out the route proposed in this act, the foregoing conditions shall be assumed as a conable institutions. We confess from the treatment of railway companies in the past by certain members of the present government it is not surprising that they are suspicious of any corporation which from the government side of the House, undertakes to construct a road without a fact which might excite some a bonus from the province large enough suspicion. Mr. Curtis pointed out a and bonding powers sufficiently exten- number of features in the amendment sive to defray the entire cost. It has which he thought could be improved entered the mind of the government of upon and which might make it more ef-Hill's to carry off the millions of tons of has gone over until after recess, and coal to be found in this province and doubtless when it is again taken up Mr. to cripple our industries.
