presided. Dr. Inch said the matter of consolidated schools was new in New Brunswick. In the New England and middle states con-solidated schools had been fairly tried, and so excellent was the result that they have become a firmly established feature of the school system. In Australia a sav-ing of £50,000 yearly had been accom-plished through the adoption of such schools.

The Teacher Salary Question-

In New Brunswick there are 2,000 school districts. Of these about 250 have less than ten pupils each. Here the standard of teaching is not of the best. It is here that of teachers' remuneration in general and told his views concerning it. "When I commenced teaching," said Dr. Inch, " four-fifths of the serious evil, for in my opinion a woman is superior to a man in teaching the kin-dergarten grade. But when the child, a by for instance, becomes older and more

How many men are entering the teaching pro-fession today? You cannot blame them if they choose another occupation in which the remuneration is so greatly superior. In other fields they find far more lucrative sitions. And the same is true of wo

"They may try teaching but it does not take them long to become convinced that the salary is pitifully small. They drift away from the school room. They be-come nurses, enter offices and stores—do anything in fact but teach school. And why? Because they are starved out. "School teaching is different from other occupations in this respect. You begin at what may seem to be a good salary, but there is no advancement. The novice at teaching receives practically as much as the man or woman who has been teaching for years. This knowledge is very dis couraging, and no wonder. "If we had in New Brunswick 100 teach-ers receiving \$1,000 a year, capable men

ers receiving \$1,000 a year, capable men and women would remain in the profes and women would remain in the profes-sion. There are not in the province twenty-five teachers receiving the sum 1 have mentioned. Despite the fact that the expenses of living have increased and that the rate of salary in other pursuits has become higher, the school teachers' income remains unchanged."

The Consolidated School Plan-

Dr. Inch was anxious, and the board of education desirous, he said, to establish consolidated schools throughout the prov-ince. There was every reason why such a school should be established in the Fair-ville district. The pupils would receive better tuition and the school would add Say, Time, quit plucking out with haste unmeet. The only workable basis for a union would consist in a combination of the principal features of hiturgical and non-liturgical worship. It is a very large and an exceedingly intricate question.
