Dear Sirs.—Please send me par ticulars of your guaranteed Curs for Rheumatism to Name.

Our globe would therefore consist of an puter cooled heterogeneous and flexible crust, wish a temperature increasing downward and passing into rocks at and above the melting point in a liquid state, which in turn averile the heated nucleus, kept solid by compression and of the rigidity of steel.

If the crust were undisturbed, the molten sayer upon which it rests would be inactive; but atmospheric agencies, frost and rain, are ceaslessly at work transporting weight from the hills and depositing it under the sea, decreasing the pressure here and adding to it there. The rivers debouch into the sea charged with slit, which is eventually deposited outside the influence of the surf, and the breakers acting like a rasp along the base of the cliffs contribute their quota of sediment, eroding and breaking up the const, the material being carried out by the waves to swell the deposits forming parallel to the shore within the littoral zone. Geology reveals that these deposits may in time reach thousands of feet in thickness. Simultaneously the removal of weight by the breakers impairs the resisting power of the crust along the actual sea margin. Thus two parallel lines are continually forming, the one of increasing resistance.

It the crust so flexible as to be sensible to such readjustments of weight? In a past age when perhaps man was already the provide of the care of the crust is playing the care of the care of the care of the care of the saintly becoming poor, found himself unable to provide for the marriage of his three daughters. The news of his sad plight came to the ears of the saintly becoming poor, found himself unable to such readjustments of weight? In a past age when perhaps man was already

one of these accumulations the whole of one of these accumulations the whole of wales sank beneath the sea level, rising again to its existing height as the ice melted away. In hotter regions masses of coral are forming reefs and atolls, rising in some cases from water hundreds of fathoms deep. The polypes forming the coral can only live in surf near the surface, and unless subsidence had continuously kept pace with deposition no such masses could have been formed. Many of the great rivers empty into have sheltered continuously kept pace with deposition no such masses could have been formed. Many of the great rivers empty into bays sheltered from coast currents and there form deltas which have been proved by borings to be thousands of feet thick, yet each foot has been formed in water a few feet deep, as proved by the angle of bedding, the fauna, drifted land debris and the sorting action of the waves. In all these cases the crust must have sarged under the increasing lead of give way under the additions of weight along added material, and did nit not similarly the littoral zone every island and continent would be surrounded by miles of shoals no deeper than the disturbing motion of the waves. When the crust sags out to sea the column of water over it deepens, augmenting

no deeper than the disturbing motion of the waves. When the crust sags out to sea the column of water over it deepens, augmenting the pressure. The pressure acting on the moliton layer tends to squeeze it, not seaward where the water is deeper, but toward the shore where a line of least resistance is already prepared by the breakers.

The effect of steadily increasing lateral pressure acting on a long and relatively weak shore line of heterogeneous materials must be extremely complex. The moliton matter is able to eat its way upward like a corrosive fluid melting the rocks it successively comes in contact with, until it finds relief in pouring out lava in streams of appalling magnitude. This was the fate of the seaboard of the northeast Atlantic in tertiary times, remains of these eruptions existing in the masses of basalite trap rock in Antrim, the Hebrides, Faroes, Iceland, Splitzbergen and Groenland. But where the superincumbent strata are still thick and massive, and especially where they have been already arched into lines of hills, as, judging by the watershed, must have been the case along the Pacific coast of America, the molten mater would continually and irresistably force the crust upward, producing a chain of mountains, volcanic or otherwise, parallel to the coast. Simultaneously, owing to the pressure being lateral, the molten liquid would force itself along existing cleavage planes and lines of bedding of laminated and stratified rocks, for it must not be overlooked that all sedimentary strata uphgayed above sea level are bent and strained, dried and shrauland infiltrated, everyor immated and stratified rocks, for it must not be overlooked that all sedimentary strata uphqayed above sea level are bent and strain-od, dried and shrunk and infiltrated, everywhere presenting lines of fracture and partings, like masonry on a Cyclopean scale. On these the moiten matter, capable of dissolving as well as penetrating, presses with ever increasing insistence, gathering force perhaps for years, until resistance suddenly yields for the flery liquid is injected with terrific disruptive force along the lines of bedding. Thus the shocks of earthquake which startle civilization and destroy opulent cities are produced at uncertain intervals and without warning. On the west coast of America we are witnessing this majestic action in full force to-day, for the mighty Pacific is slowly deepening along its eaglern margin and raising its long shore line into colossal ridges which now form almost continuous chains of mountains.

Varied Englishman (Pall Mall Gabette.)

The system of inquiring into your nationality when you are embarking on the boat from Boulogne or Calais is a complete farce. Within the last month I have crossed five times. On being asked whether I was a British subject, I have given the following

"Yes."

(c) "I am a Presbyterian."
(d) "I am a Welsh Jew."
(d) "I am a Nonconformist Beaver."
Nothing seems to make any difference.

The United States Census Bureau on the 14th inst., estimated the total wealth of the country in 1904 to be \$106,881,-415,009. This shows an increase in the wealth over the estimates for 1900 of nearly 21 per cent., and of nearly 64 per cent. over the estimate for 1896, when the total wealth was \$65,037,091, 197.

of increasing pressure and the other of decreasing resistance.

It the crust so flexible as to be sensible to such readjustments of weight? In a past the nobleman's window at night, each bag containing a sufficient dowry for one to the elevated regions. Under the modern of St. Nicholas, and when the bankers of prothers, Itely took when the bankers of northern Italy tool up the business of lending money they appropriated it, considering themselves good followers of the generous saint. good followers of the generous saint.

The fact, however, seems to be that the three balls were taken from the lower part of the coat of arms of the Dukes of Midici, from whose dominions the first money lenders emigrated to England. This explains why some of the ancient pawnbrokers used five blue balls, for the coat of arms in heraldic language. for the coat of arms in heraldic language is described as five bezants azure.

Tarred Roads Free From Dust.

(Cleveland Plain Dealer.) An excellent suggestion for the improvement of country roads comes from France. The French as well as all other peoples suffer from the clouds of dust which make travel disagreeable during the summer months. To provide dustless roads an extremely inexpensive application of tar has been used with the most satisfactory results. Not only is the dust prevented but the roadbed is improved. Automobilists may now spin along the dryest French roads without spoiling the millinery of the women, while the householders, relieved from the constant clouds of stifling dust, hall the inmovation as a godsend. excellent suggestion for the improve

> The Great Lakes Fleet. (Outing Magazine.)

A hardy breed of men doing their duty as they find it, the sailors of the Great Lakes are more and more in demand to man the new fleets that are building every year. While the shipyards of the sea coast were wailing over the dearth of business, the shipyards of the lakes booked orders for thirty-one steel vessels for the season of 1906. In size from six to twelve thousand tons capacity, with a total value of \$14,000,000.

Minard's Liniment Cures Diphtheria. Called at the Wrong Place. (Ladies' Home Journal.)
"If you please, mum," said the ancient
here, in an appenling voice, as he stood at
the back door of the cottage on washday,
"I've lest my lest."

"I've lost my leg——"
"Well, I ain't got it," answered the woman fiercely. And the door closed with a bang.

HISTORY OF "FOREIGN DEVIL" Now we are in a position to answer a on at the outset of the paper, as to the origin of the term translated "for eign davil." It is literally "ocean demon," a forcible Chinese term for pirate. The usual term "sea robber" became ocean demon" after this Chinese experi-

ence of unscrupulous foreign pirates who became marauders on shore as well. From the Chinese standpoint, was not the term justified in those days? And not only did the Portuguese nation furnish one or two unworthy specimens of Europeans, but so did Holland, and so did England, in the years which fol-

The China seas, in addition to their

own bands of native pirates, became in-fested in those early years with far-more daring piratical spirits from these three nations. And, at first confined more daring piratical spirits from these three nations. And, at first confined to the coast, the term "ocean demon" or pirate gradually spread into the interior, being propagated from place to place in reports and rumors which doubtless magnified the actual doings of the law-less Europeans into deeds of fiendish atrocity. Then after a generation or so the term "foreign demon" was utilized by mothers with fractious children, much as the name Bonaparte was for a while in England: "If you don't stop that noise, I'll tell Boney to come and take you!" The mention of "ocean fiends" was found to afford a potent sedative for blatant juveniles, and so it has continued in use, since the sixteenth century until the present generation, an interesting if unpleasant instance of Chinese conservatism.

We suggested at the start that it is dying down in many places. Having been so long lived in the past, it is dying hard. And, as all well admit, it has been the missionary foreigners, or the more genial men and women of that class, who have been the chief agents in changing it for something better. Not that the foreign babies have not helped. When in the '60's Dr. Porter Smith, of Hankow, walked in the Chinese streets with his little child on his shoulder the

Hankow, walked in the Chinese streets with his little child on his shoulder the Chinese exclaimed: 'He cannot be a foreign devil. See! he is smiling at his little child."—East of Asia Magazine.

### Your Doctor

# Indispensable in Winter.

A few doses, at the first sign of a cold, will allay all throat irritation—take away hourseness—check the inflammation—strengthen the lungs—ward off the cough.

All the healing, soothing, curative properties of Canadian Spruce Gum—combined with aromatics. Pleasant to take. 25 cts. bottle,

Have you headache, back pains or pains in the chest? Have you that "all-gone" feeling? Do you have fits of acute pain or wind after food?

If so remember that health depends on three main organs— liver, stomach and intestines, and Bileans regulate all three.

Bileans are purely herbal and Nature's remedies are always best. Don't dally! Write for sample box to "Bileans, Toronto." (sending lc. stamp for return postage), or buy a box from your druggist.

Mrs. R. Saville, of Oakwood, Ont. says:—"For headache, debility, indigestion, and biliousness I tried many medicines, but I never met with anything to equal Bileans. They cured me. Of all druggists at 50c. per box.

Last of the Widows.

Last of the Widows.

(Bufflo Exchange.)

A peculiar interest attaches to the death of Mrs. Esther Summer Damon of Plymouth Union, Vt., who died the other day at the age of \$2 years, from the fact that she was the last of the "Revolutionary Widows." That account is now closed on the pension books of the United States.

The War of National Independence ended in 1783, and yet we find a widow of a soldier of that war a pensioner of the Government in 1906. The question will naturally arise, how can it be? Well, according to the records, Esther Sumner, the old lady who has just died, an own cousin of the famous statesman, Charles Sumner, was born at Bridgewater, Vt., August ist, 1814. At the age of 21, she met Noah Damon, a veteran of the Revolution, then 76 years old, and after a courtiship of two weeks they were married. He served more than five years during the war in various organizations, and heard British bullets whistle in several engagements. There is no doubt about that, according to the records of the Pension Bureau at Washington. Why the young woman married the old soldier is a matter of confecture, but she was one of many who about that time made similar matrimonial venture, presumably for the scant pension that congress had decreed to all widows of soldiers of that war. Damon is said to have been impecunious and helpless and his young wife had to aid in his support during the few years that he lived. Then she was awarded \$200 a year by the Vermont Legislature and the Daughters' of the American Revolution in that State contributed to her support during the last few years of her life. But, at best the income was meagre, and she earned a little money by sewing and nursing, until old age made work impossible. She had other offers of marriage, after her veteran died, but refused them all. Mrs. Damon was legally entitled to all she got from the Government. But the law was defective and has now been so mounted, the any inducement to young women to old soldiers, for the pension money.

EVILS OF PAYING IN ADVANCE. Business Man Shows How Many Person

Make a Great Mistake. "Never pay for anything in advance and half the trouble in households and n housekeeping will be avoided," said the manager of a large business house.

"It is a habit on the part of some peo ple, this paying in advance habit, and if you will take the trouble to keep tab on t you will observe that such people are more or less, considerably more than less, in hot water figuratively most of the time. This is particularly true as regards the performance of labor on the part of other individuals, or where car-

part of other individuals, or where car-tain things or articles are to be made for another. It is the indulgent, easy house-keeper who pays her help off before it is due who always sings the saddest and the longest song on the household domestic problem. "Never pay for goods, or a garment, for instance, until you get it and it suits you and not its maker, though this has no reference for goods bought outright in a store which are to be delivered. And

in this class of purchases, if you wish them at a specified time, otherwise they would be of no use to you, pay on deliv-ery; then you will in all probability get them at the hour you and not the other party want them delivered. "If you will take the trouble to observe in lawsuits brought by tradesmen most of them are for balances due rather than for the entire amount of the bill. One of the main reasons why the well-One of the main reasons why the wellto-do seem to get what they want, and
you don't if you are poor, is because
they seldom pay for articles until they
are received, and not then if they don't
suit, but in your case it is you and not
the other fellow who seems to get stuck
on the transaction. This is because thas class of people put into practice the pran-ciple I am expatiating upon of never paying for things in advance.'—Wash

METHOD IN PTO BASHNE Jenkins Fight the Burylars? Not He!

For years poor, overworked Jenkins had registered his nightly "kick" against the incessant playing of the piano by his two girls, aged respectively 16 and 17. He needed rest and quiet, he said, but the madam couldn't see it that way, being much desirous that the girls should

have "as much desirous that the girls about have "as much practice as possible."

About 1 o'clock the other night Jenkins was suddenly awakened by his wife exclaiming in a hoarse tone that she was sure there were burglars in the parlor.
"Nonsense!" growled Jenkins, turning
over preparatory to renewing his slum-

bers.
"But, Richard," persisted his wife, "I "But, Richard," persisted his wife, "I am sure I heard men in the parlor. Some one stumbled against the piano several times, striking the keys!".

Whereupon Jenkins, with demoniacal smile, hastily leaped from the bed and began to slip on his dressing gown, evidently with the intention of immediately interviewing the nocturnal visitors downstairs. Observing his determined air.

interviewing the nocturnal visitors downstairs. Observing his determined air, Mrs. Jenkins began to be uneasy.

"Oh, Richard," she wailed, "don't, for my sake, do anything rash. Remember your family- Don't be rash!"

"Rash!" scornfully repeated Jenkins.
"Depend upon it, I shall do nothing rash, I'm going to help those fellows. You don't suppose that they can get that piano out unassisted, do you!"—Lippin-cott's Magazine.

How to Detect Base Coin.

The foreman of a London jury recently announced a good plan for detecting base coin. At the conclusion of one of the cases he asked the court au-thorities if they would take a sugges-tion from twelve business men who during the year had had to deal with con-siderable sums in silver coin. There was, he said, a very simple test for the detection of base coin. It was to sharp, yet with the milled edge of the good coin against the milled edge of the suspected coin. If the suspected coin were a. spurious one the metal would almost immediately begin to shave off. The test could be carried out anywhere, in a street car or in a store, and was so simple that anyone could apply it. Af-ter a personal test being made in court all who were present readily agreed as to its effectiveness.

ASTONISHED THE DOCTOR. hysician Said She Might Drop Dead at Any Time.

"The Doctor told me I had heart dis-ease and was hable to drop on the street at any time," says
Mrs. Robert Eaton,
of Dufferin, Ont. "I was afraid to raw my breath, it draw my breath, pained me so. I was

so nervous, short of breath and dizziness, smothering and sinking spells, and I could not sleep.

"Sometimes I would have to lie down to be form form falling. My hands and fact."

"Sometimes I would have to lie down to keep from falling. My hands and feet would seem to go to sleep and a sort of numbness would come all over me.

"I began using Dr. Leonhardt's Anti-Pill. From the start I improved. I feel much stronger, look better, and aitogether Anti-Pill has made a new woman of me. "I am entirely cured."

LE ROY PILL CO..

The Year's Mountain Climbing Honors

The year 1906 has been distinguished for performances in mountain climbing. The Duke of Abruzzi, whose ascent of Mt. St. Elias has been eclipsed on the North American combinent by Dr. Cook's more recent feat, succeeded last June in surmounting the second highest (19,024) summit of the Ruwenzori Range in Central Africa. The highest summat (Mt. Kibo), of this range being 19,912. But the achievement of Dr. and Mrs. William H. Workman last August overshadows that of the Italian Duke in

shadows that of the Italian Duke in in Africa, for they succeeded in climbing to 23,394 feet on the peak of the Chago Lungma glacier in the Himalayas. This, I believe, is a record in height; though by no means so difficult an undertaking as McKinley. The Workmans camped for two nights at 21,000 feet, which becomes also a record for a mountaineer's camp.
