What Makes The "Simplex" The Favorite With Farm Folks?

Have you ever asked yourself that question? Let me tell you the secret by telling you a story. Bending over his work in Cremona hundreds of years ago, Stradivarius, the great violin * maker, said: "Other men will make violins, but none will ever make a better." It was this spirit that the manufacturers of

The favorite everywhere it goes. Note its beauty and heavy compact construction, with low-down, handy supply can only 3½ ft, from the floor.

Simplex Blade Separator

put into their work of making separators—to produce the best machines possible. While we do not claim that a better will never be made, we do solicive that the SIMPLEX is as perfect a separator as long superience, paintainking effort and experimentation can make increasing popularizating effort and experimentation can make increasing popularity of the SIMPLEX. The five superience of the superience of the

Impressions of a Successful County Fair Some of the Fratures Which Make Prince Edward County Fair One of the Best of its Kind-Gordon H. Manhard,

ing off in the tendance and a lack of interest. Mostly averyane was of the opinion that it was oving to the terrible war going on, whith no doubt has had a great deal to do with it. Having visited several shows in 9: Unit, would like to note a few things that impressed me forcibly while speadiff, three days at the Prince Edward County, Ont., exhibition, while was chow combucted along the ame lines, and have come to the conclusion that its success is due to the officer; at the head of affairs. They certainly are live wires.

A Parade and a Baby Show.

I will try to give a short description
of the management. The first day up till twelve o'clock was devoted to gettill twelve o'clock was devoted to get-time exhibits in their proper places, which is entered to be done gust as eas-ily as if all day had been taken for it. At one o'clock the gates were open to the public. At the same time ar-rangements were made to have a par-rangements were made to have a parade from the armories to the grounds.
It was headed by the band of 48th
Highlanders. Next came the Machine
Gun Section, 155th Battalion, followed by Cadeta and school children, each school section being well represented, marching in two's, each carrying a flag, and their teachers following in decorated automobiles with guests and decorated automobiles with guests and the directors in charge. A prise was styen for the best decorated automo-bile. The children were not charged ten cents admission. They at once went to the strandstand, saus; a con-went to the strandstand, saus; a con-went to the strandstand, saus; a con-went, and listened to a hard soul-field sports, afterwards spending the field sports, afterwards spending the hibits.

In the evening the band gave a c cert in the armories where a baby show was held. Some 30 odd babies were there competing for the prizes, each and every baby winning a prize, each and every baby winning a brize, so all were hanny even if they did not get the red ribbon. There did not seem to be any hard feelings—each mother went away still thinking her own baby the best

The second day the judeing was about completed. In several places the buildings are closed to the public during judeing time-not so here. The main hall contained a fine dispersion and seeds neath agreement. Attractive Arrangement play of grain and seeds neatly arrang-I might mention that on entering ed. I might median that on entering the building from the west entrance we noticed a man all smiles. Upon inquiry we found him to be the winner of the silver cup for two best cheece. May he keep on smiling and repeat winning again. Through his winning again. Infournout the buildings everything was tratefully ar-ranged to show off the exhibits to the best advantage. The children's work was worthy of special mention. This alone was worth solns to the fair to see, and if I am any judge, some day in the near future Picton will be turn-ing out some high class artists.

The east wing was devoted to buteggs, dressed / poultry, canned ter, cers, dressed, poultry, calment fruit and postry. A usual thing at fairs is to leave butter and dressed poultry in the open, exposed to dupl poultry in the open, exposed to dupl and files. Not so here. They are the directors of some of the open exposed to dupl as thing of the past they are prebably and files. Not so here. They are re-newly arranged on scheley are frigerator case, leaving the second part of the open exposed to duple the difficult of the food fift open at the difficult of the dependent of the open exposed to the difficult of the dependent of the open exposed to the o

WHILE visiting different exhibit-it comes to cooking. There was not tions in Ontario this fall 1 room to accommodate the vegetables that the fall shows were not up to the largest was pitched for this pursuant of the top the commodated and the fall shows were not up to the largest was pitched for this pursuant of the commodated a nice distance of the commodated a nice distance of the commodated as general fall play Here I saw the largest and best ing off in attendance and a lack of in specimens of all vegetables I have treest. Mostly versuan was of the seen anywhere this year. One look York County, Ont. large teat was pitched for this purpose, which accommodated a nice display. Here I saw the largest and best specimens of all vegetables I have seen anywhere this year. One look in the truit building convinced one that the country is a leader in this line also.

The Display of Dairy Cattle The Display of Dairy Cattle.

The cattle barn was one of the principal attractions. A beautiful sight it was to step in at the west entrance of one of the best buildings in the province for the purpose and lo n the long rows of Black ites. I say Black and Whites Whites, I say Black and Whites because they were largely in the majority and mostly all well filled—there being two small herds of Jerseys and Shorthorns. The Holstein state of the service of the servi seys and Shorthorns. The Holatelia w re out in large numbers and most of the classes contained lots of qual-Purtelle and Leavens had an outstanding bull in two-year-old class, beautiful carriage, very large yet not coarse, and the best part is he uleaving some high class calves. I predict this bull will be heard from in the near future. In aged cow class

—13 in number—very large, roomy
cows, very large and straight, but not cows, very large and straight, but not coarse. Two and three-year-old class-es were equally as good. The year-ling helfers I shall never forget—that beautiful row of 12 large, breedy helfbeautiful fow of 1s large, orecely heli-ers, like peas in a pod, so much alite, of the same type as first and second class cows. You could also say the same in the calf classes. It was a treat for any lover of dairy cattle to see this exhibit alone. I was add of see this exhibit alone. I was told afsee this exhibit alone. I was told afterwards the yearlings were all by I-cavena & Purtelle's senior herd size. Coun Series Walker Pietertic alone and second prire cows, but show the series better the second prire cows, but show the second prire cows. uniform a lot of high class stock as uniform a lot of light class stock at this bull has done." Immediately in-oured where he was and was told to had met with an accident and had to he killed. What a pity to lose such a site. One thing I noticed throughout every class was an improvement, and expectably in udders, which is the right made to successful breeding. In the nort building ware seen ha

In the next building were seen the In the next building were seen the horses—not many in number but of best quality. Sheep were out in large numbers, and pigs, while not so numerous, we did not find any culls.

A Suggestion.
On the second day of the fair some s'.teen thousand people passed through the gates to see what I have just outlined, together with some good races and field sports. There was not a fakir or side show on the grounds-here is good proof that a fair can be success without them. I did not even hear after the fair was over, and even hear after the fair was over, ad I was there from first to last, as we often hear: "Same old fair and selling to see." I sometimes think this is a disease, and if you do not so ta send learn something it is easy to fed fault. One thing they have done it lighten was diseased. Picton very deserving of mention is a building called a ladies' rest room, where the tired mother can go and rest with heby beyond the gaze of the rest with baby beyond the lack to make crowds. One thing they lack to make it complete is a suitable place to be fresh one's self with clear, sparking water. But as the drinking habit is
