

HAS USED
DR. FOWLER'S
Extract of
Wild Strawberry
For The Last Fifteen Years

Mrs. Duncan McRae, 62, 6th St. North, Brandon, Man., writes:—"It is much pleasure for me to say that I have used Dr. Fowler's Extract of Wild Strawberry in my home, every Summer, for the last fifteen years.

"I have six children and have used it on every one of them.

"I use it myself and so does my husband. Last summer my baby, seven months old, was taken very sick with Summer Complaint, and we thought he would die. We got a bottle of Dr. Fowler's Extract of Wild Strawberry and started giving it to him in small doses and in three days he got quite well, so we kept on with the medicine for about a week or more and he became as well as ever.

"My little girl, two years old, was taken very bad with the same trouble, and I used two doses of the same medicine and she was completely cured.

"Myself and my husband think there is no other medicine so good for all bowel complaints.

"If anyone wishes to know what an excellent remedy Dr. Fowler's Extract of Wild Strawberry is, I am willing to tell them what it has done for me."

Travelling Salesman
WANTED FOR ONTARIO

Must have a thorough knowledge of the principles of stock-feeding.

The Caldwell Feed Co., Ltd.
DUNDAS, ONTARIO.

ALL THE SPEED HE WANTED.

"Drive like the deuce!" shouted Smith, springing into the taxi.

With a lurch, the car darted forward, and away they went like lightning through the fog. Crash! They took the wheel off a passing wagon. Hi! hi! they missed flattening out a small child by two-ninths of a hair. Clang! They upset a milk cart. People shouted, constables impotently held up their hands as the taxi dashed up one street and down another, taking corners on two wheels and threatening every lamp-post with destruction. At last, after half an hour's furious racing, they slowed up in a narrow thoroughfare, and Smith poked his head out of the window. "Are we nearly there?" he asked, breathlessly.

The chauffeur turned in his seat and shouted: "Where did you want to go, sir?"

QUESTIONS AND ANSWERS.
Miscellaneous.

DITCH BEFORE STORE.

The country road passes in front of a store here. In grading they made a ditch in front of same, where before it was level. Can the overseer be made to tile in front of store or fill it in? The superintendent was asked if it was to be left that way, and he said yes.

Ontario. SUBSCRIBER.

Ans.—No. The matter is one to be arranged by negotiation with the municipal council.

COWS CHEW BONES.

What should a person do for cows chewing sticks and bones? W. L.

Ans.—This is due to lack of phosphates in food, and to a depraved appetite in the cows. Keep salt before them at all times. Feed nitrogenous food, as alfalfa or wheat bran, oil meal or red clover. An application of bone meal or acid phosphate to the pasture sometimes proves beneficial. An ounce of phosphate of lime in a pint of cold water as a drench each night until trouble ceases is recommended. A small amount of wood ashes in the meal once or twice a week is believed to be beneficial.

FLY MIXTURE.

Please give recipe for mixture to put on cattle to keep off flies. Would it do to put on horses, and how would one apply the same? J. L.

Ans.—Several mixtures have been recommended, among which are the following:

1. A mixture of ten parts of lard and one of pine tar stirred thoroughly together and applied twice a week with a brush or cloth to the parts most attacked.
2. Fish oil, $\frac{1}{2}$ gallon; coal oil, $\frac{1}{2}$ pint; crude carbolic acid, 4 tablespoonfuls, mixed and applied to all parts except the udder, once or twice a week. For a spray, kerosene emulsion is sometimes used; $\frac{1}{2}$ of a pound of soap and 1 $\frac{1}{2}$ gallons of kerosene, made up to 15 gallons with water and applied at least once a day. Most homemade fly mixtures are not well suited for application to horses, because they mat or soil the horse's coat. Light fly nets would be better.

MARE WITH COUGH.

1. Mare, five years old, had distemper about five months ago. She has had a grayish discharge from the nose ever since; her glands are slightly swollen, and she coughs somewhat when trotting or when drinking cold water.

2. Would it be right to breed her in this condition? She is in good flesh, and feels good. H. A. L.

Ans.—1. There is some danger of this developing into heaves. Do not feed any dusty or musty feed, and dampen her feed with lime water. Give a ball once daily composed of powdered opium 1 $\frac{1}{2}$ drams; solid extract of belladonna, 2 drams; camphor, 1 dram; digitalis, 20 grains. Add sufficient oil of tar to make plastic; roll in tissue paper, and administer; or dissolve in warm water and give as a drench.

2. No harm should result from breeding her this season, provided the necessary precaution is taken to cure the cough.

ROSE LEAF BLOTCH.

Sprig of rose bush which is affected with some sort of blight. This is the second year. It starts on the leaves like the enclosed, and soon the entire leaves and buds wither and die. Have tried Paris green and bluestone, but neither did any good. H. R.

Ans.—From the specimen sent us, it is rather difficult to say definitely whether it is rose leaf blotch or downy mildew which is attacking the roses, but it is likely the former. Rose leaf blotch produces these spots on the leaves, which give rise to the spores that reproduce the disease. Any standard bluestone spray will control it. This should not be applied at or near blossoming time, but better a few weeks preceding this. The bush roses are more susceptible than climbing roses. If the disease were downy mildew, spots would appear much like these, and a very characteristic fluffy mildew would be found on the under surface of the leaf. For this, apply sulphur to the plants when damp, being careful to sprinkle all portions of the leaves.

Just Landed 45 two-year-old Ayrshire heifers, all bred to freshen in September and October. They are a beautiful, strong lot, with plenty of teat. Also 12 bulls fit for service, and a few yearling heifers.
