

The coal you save

Do you think a cheap range an economy? It may appear so when buying it.

But when you see it eating up the coal—When the oven is slow in heating—When first one part then another requires renewing—Then your cheap range is not an economy, but the very opposite. Then you will see that it wastes enough coal to pay for a good range.

The Monarch Range is a well-designed, strongly constructed range—designed for economy of fuel—constructed for durability and wear.

Ask your neighbor what she thinks of her Monarch. Get her opinion of it as a coal-saver and a baker.

You will find that your cheap stove has actually cost more than your neighbor's well-designed, economical, and convenient Monarch.

MONARCH PENINSULAR RANGE

2½ to 60 h.-p. Semi-portable, as illustrated; stationary and portable.

Always on the Job

Sturdy, compact, substantial, built to withstand the hardest wear and tear, and to perform its task under all Canadian weather conditions, the

Renfrew - Standard

has no peer among gasoline engines. Indeed, users tell us it has no equal—and we believe it. It is the latest type for sale in Canada. Starts easily without cranking in the coldest weather. Runs with clock-like smoothness. Needs

little water for cooling, and has no cooling pumps, fans or complicated contrivances to get out of order. Simple in construction, easy to operate. A great power-producer on a small amount of gasoline. Write for descriptive bulletin.

The Renfrew Machinery Company, Limited

Head Office and Works: RENFREW, ONTARIO

Sales Branches at Winnipeg, Man., and Sussex, N. B.

A Great Record

"Kline" Fanning Mills have earned a great reputation among Canadian farmers. Lately we have run across "Kline" Mills that have been in use from 20 to 35 years and are still giving efficient service. It's really surprising what lasting satisfaction these machines will give and how much money they will save for farmers even in a year.

"Kline" Fanning Mills

are built on correct principles and have several features not found on other fanning mills. They are suited for either hand or power. The prices and terms are such that you will be eager to own a "Kline."

Further particulars will be supplied as soon as we learn your name and address. Agents wanted in unrepresented territory.

Maple Syrup-Makers--Does Your Maple Grove Pay?

You must go at it in the right way to make money out of your maple grove. You are not giving your maple grove a show to bring you good returns by using pots and old pans, which consume a lot of fuel and time and make a very poor grade of syrup. Every farmer who possesses a maple grove should operate it with an up-to-date evaporator. The "Champion" Evaporator will get more syrup out of a given amount of sap, with less trouble than any other evaporator on the market. Any boy 14 years of age with a little common sense can operate a

"Champion" Evaporator and make the highest grade of syrup that will command the highest market price. Write us to-day for our new illustrated catalogue, free.
