clock, suddenly got up, and, without waiting to be dismissed, as Court etiquette demanded, held out his hand and said: "Well, good-bye; I've got to go now, as I have some people coming to dinner." The Turkish Court are always expecting concealed bombs and daggers and firearms, consequently no one is allowed into the Sublime presence with an outer robe. Rhodes, who came to see the Sultan of Turkey, had only an ordinary lounge suit on, and refused to remove his overcoat. This was objected to, for the reason above stated. "All right," said Rhodes, "I won't go in at all." This would never do, so Rhodes was reluctantly allowed to go in as he was.

In our school days we learned that water cover three-fourths of the earth's surface, and land the other fourth. The statement dates back to a time when very little was known about the distribution of land and water in the polar regions, and needs to be considerably revised in the light of recent discoveries. Taking account of the results of the latest polar expeditions, Professor Wagner estimates that the ratio between land and water is as 1 to 2.42—in other words, that about three-sevenths of the earth's surface is land, and the rest water. This estimate assumes that only 10 per cent. of the surface north of latitude 80 degrees north is land—an assumption that may be considerably modified by the forthcoming explorations of the great unknown region north of British America and Eastern Siberia.

News of the Week

On March 26th 2,000 "waterways delegates" waited upon the Premier in Ottawa to urge the necessity for immediately deepening the St. Lawrence to accommodate ocean vessels, also to ask that the projected 6,400 miles of radial lines in Ontario should receive the same Government subsidy that other railways in the Dominion receive.

President Wilson has won in the first fight in regard to the Panama tolls issue, now being threshed out in Washington.

The most furious battle yet fought in Mexico was carried on during four days of last week. As a result practically all of Torreon is in the hands of Gen. Villa's forces.

To meet the situation caused by the resignation of many army officers who resigned last week under the mistaken impression that they were to be actually called upon to fight Ulster, the British Army Council has issued a new army order providing that absolute obedience of officers and men shall be demanded from all ranks. A notable result of the crisis is a marked drawing together of Labor and Liberalism.

At a meeting of the Poplar Borough Council on March 27th scores of bombs filled with evil-smelling chemicals were exploded by suffragettes, who were ejected after a riotous fight with the police, the women fighting with bottles and bludgeons.

30,000 peasants recently made a demonstration before the Royal Palace at Stockholm to protest against the prolongation of military service, and the imposition of new war taxes without consent of the people.

The Beaver Circle

Our Senior Beavers.

Dear Beavers,—I hope some of you are not becoming very very discouraged because your letters have not appeared in the Circle before this. You see all the Beavers have been busy of late—"spring fever" I suppose—writing letters for the Circle. Of course, all the letters cannot go in at once, and some will have to wait quite a great while.

Then there were the competition letters,—they had to go in. Last time we gave you the girls' letters about "Boys," this time we give you the boys' letters about "Girls." The girls,
