

DOCTORS ADMIT.

COSTS NOTHING TO TRY.

According to the expert analysis of government authorities in the United States and Great Britain, Stuart's Dyspepsia Tablets contain the exact elements provided by nature for digesting food in the healthy stomach.

Stuart's Dyspepsia Tablets have saved sufferers from stomach disorders millions of dollars by giving them, in one small 50-cent package, more relief than countless treatments by physicians would bring about at \$3 per visit.

Perhaps you are afflicted with dyspepsia—or some kindred disease arising from a disordered digestion. It may be headaches, heartburn, palpitation, liver trouble, insomnia, nervous debility. They all have their beginning in a stomach which does not secrete the juices or grind the food which is taken into it.

If so, we urge you to send for a free trial package of Stuart's Dyspepsia Tablets. It will cost you nothing and surely will bring us no gain unless you find, after using it, that you are benefited and feel that you need a full-sized package.

There is absolutely no danger in using Stuart's Dyspepsia Tablets. Nothing is contained in them that has not been subjected to the closest scrutiny by the government officials.

Stuart's Dyspepsia Tablets will digest your food without demanding a careful diet. One grain of these Tablets has power to digest 3,000 grains of ordinary food. You can be sure therefore that no matter what your condition, these little tablets taken after each meal will shortly restore your stomach to its normal condition and render it capable of doing its work unassisted.

We withhold the names of hundreds who have written us voluntarily expressing their gratitude to this simple substitute for nature.

Send for trial package to-day. F. A. Stuart Co., 70 Stuart Bldg., Marshall, Mich.

50 cent size package for sale by druggists everywhere.

he invites you inside. You say, "Peace be upon you," or just "Peace," and he says, "Upon you be peace." That sounds very nice, if they mean it.

Inside is a very small yard, with some chickens running about, and perhaps a goat or a cow in the corner. They don't keep chairs, so they bring the bedstead (without any clothes, of course) and you sit on that. It is not an iron bedstead with a spring mattress, and you can't jump up and down on it, for it is made of four pieces of olive wood with short legs, and the wood is not straight, and the legs are not always the same length, and instead of a mattress it is plaited with string, and it only cost one shilling.

The three little boys are just finishing their breakfast; they have a dish of rice in front of them, with some lentils, and one of those funny loaves of bread, like a pancake made

of brown paper! and—would you believe it?—they are not using any knife or fork or spoon! but—can you guess? Isn't it dreadful? But if they are nice clean little boys, they washed their hands before they began! And now they are having some milk before they start for school.

Have they got their books? Yes; here they are, wrapped up in a duster! Yakub is a very little boy, and so he has a flat piece of wood as well. That is his copy-book until he learns English, and then he will have a proper copy-book and learn "up-right handwriting," as I hope you do. His two brothers are already learning English, and are very proud of it, too. They say "Good morning" at all times of the day, just to let you know.

Well, they are ready to start, so their mother gives them a half-penny to buy something to eat, for they won't have any dinner until they get home in the evening, and off we go.

Please mind your head, as the door is very low, and as you step outside take care you don't walk into the nasty, dirty little gutter which goes right down the middle of this "by-way."

What a great deal we have seen, how much we have learned! Boys' names, doorways, the house (don't forget the cow!) bedstead, breakfast, and books!—The Round World.

THE FABLE OF THE HEMLOCK.

Once upon a time a man found a little, dry, dead tree. It was a hemlock, and if that little tree could have lived to be a hundred years old, what a monarch it would have been—how tall and strong and stately and majestic?

But it grew in a bog, and a muskrat, that was digging its hole under the little hemlock, bit off its roots, and so it died.

Now, as this was in the days when trees could talk—even dead hemlocks

—the man was curious to find out why this tree was full of limbs and knots and gnarls, and so he asked Hemlock to tell him the reason.

"Poor Hemlock!" said the man, "I don't wonder that you died! Think of having all these limbs and knots to support!"

"Yes, indeed," said Hemlock, "I have had a hard time. And my roots, you know, were all cut off, and they are the mouths with which I feed."

"But where," asked the man, "do all these ugly limbs come from?"

"Just where all ugly things come from," answered Hemlock, who, by the way, was quite a philosopher.

"I'm pretty much like the men," continues Hemlock. "Find out where my limbs come from, and you find where all human sin comes from."

Now, the man was very curious to know about this matter, so he took the tree at its word.

With his knife he peeled off all the bark, but still the limbs and knots remained.

"You must go deeper than that," said Hemlock.

So the man split and took off layer after layer of wood. But the knots were still there. "Deeper," said Hemlock, "go deeper still."

So the man kept on, and split it all off, until at last the heart of the tree was laid bare. It looked like a long slender rod, about six feet long, and about an inch through at the large end.

And as the man looked he saw, to his surprise, that every single limb and knot and gnarl started in the heart.

Every one of those limbs and knots and gnarls he had puzzled about was there; every one grew out of the heart. And the germ, the starting point of every single one,

was the centre of the heart.—Normal Instructor.

The Canadian Churchman is undoubtedly a first-class advertising medium. It circulates extensively in the homes of the clergy and laity. Our advertisers assure us that it is an excellent paper to advertise in as it brings most satisfactory returns.

There are innumerable lives which need just this reminder, that He is needed, and is willing, to be the Light of the perfectly common day.—Bishop of Durham.

To Maintain Good Health.

Mr. John L. Hickey, now caretaker of the public and high schools, Trenton, Ont., states: "I have used Dr. Chase's Kidney-Liver Pills and have found them the greatest medicine I ever tried. I used them when in the lumber camps and believe by keeping the kidneys and bowels regular and the general health good that they protect a person from catching contagious diseases, which are so common in the camp. I have seen hundreds of men using Dr. Chase's Kidney-Liver Pills in the lumber camps. They buy them by the dozen when going in, and to show how much faith they have in them they buy them when they could get their medicine for nothing by going to the hospital camp. Dr. Chase's Kidney-Liver Pills keep my liver, kidneys and bowels regular and my health good. I would not think of being without them."

Dr. Chase's Kidney-Liver Pills positively cure biliousness, constipation and diseases of the kidneys. One pill a dose, 25c. a box, at all dealers or Edmanson, Bates & Co., Toronto.

RUG = BUYERS

You should not overlook the fact that of all household needs, Rugs—the genuine Oriental kind—are the most useful and ornamental. Hundreds of people buy

Oriental Rugs

the year round at regular prices. How much advantage there is in buying now, this month, to get the special offer we are making, viz. :

25% Reduction

It is advisable to buy early, for first choice is always best.

Tenders for

Pulpwood Concessions

Tenders will be received by the undersigned up to and including the eighth day of March next for the right to cut the pulpwood on a certain area in the District of Nipissing, north of the Townships of Holmes, Burt, Eby, Otto, Boston, etc., and immediately west of the interprovincial boundary line.

Tenderers should state the amount they are prepared to pay as bonus, in addition to such dues as may be fixed, from time to time, for the right to operate a pulp, or pulp and paper industry. Successful tenderers will be required to erect mills on the territory, or at some other place approved by the Lieutenant-Governor-in-Council, and to manufacture the wood into pulp in the Province of Ontario.

Parties making tenders will be required to deposit with their tender a marked cheque, payable to the Treasurer of Ontario, for ten per cent. of the amount of their tender, to be forfeited in the event of their not entering into agreement to carry out the conditions, etc. The highest or any tender not necessarily accepted.

For particulars as to description of territory, capital required to be invested, etc., apply to the undersigned.

F. COCHRANE,

Minister of Lands, Forests and Mines.

Toronto, December 29th, 1906.

No unauthorized publication of this notice will be paid for.
