Burlington Band will be in Attendance Both Days

Adults 25c Children 15c  
Write for Prize List STANLEY DYNES, Sec.

## APPLES

We will receive No. 1, No. 2 and cull apples this year, and will pay the highest market price.

Every apple grown in this district will be needed to keep our factory running.

Every car sold to outside buyers means the factory will shut down two days sooner, less money distributed in Waterdown, and less employment for the workers.

### BY-PRODUCTS.

#### Farmers Are Learning Lesson In Saving Waste.

The packers claim to make all their profits out of the by-products, sources of income which were utterly ignored not many years ago. A good many farmers, says the Scientific American, may be skeptical of this claim in its entirety, but no one doubts that the packers turn by-products to good account. It is interesting to note the great progress farmers have made in a similar direction.

Not many years ago straw stacks were counted valueless, and everywhere burned. Now progressive farmers spread the straw and find it a valuable fertilizer, and while burning is still much too often practiced, it is a dying custom. In some sections of Western Canada the Government has forbidden the burning of straw stacks.

Corn stover has a fluctuating value from year to year, varying with the supply of our roughages and live stock conditions, but its feeding value is definitely known, and for some years past the tendency has been toward wider use of the stalks.

Cottonseed, valuable both as a feed and a fertilizer, was formerly thrown away. It is now a by-product of tremendous importance, not alone to the cotton industry, but to innumerable cattle feeders.

Far West cattle feeders would find it difficult to dispense with ensiled beet tops, nutritious by-product of beet growing for the sugar factories.

Hardly a year passes that some waste product is not utilized in a large way for the first time. One of the newest high-protein chicken feeds is the rinds and waste cuttings of cheese pressed into large bricks. It is now being marketed on a commercial scale. Cattle and sheep feeders in the pinto bean territory, which now takes in practically all of New Mexico and Colorado, and growing areas in Wyoming, Nebraska and Kansas, are fast making bean straw a standard article. Bean growing in this section is undergoing great development, and bean straw will become an important feed. It is used as the sole roughage with satisfactory results, but a better plan, so they who have used it say, is to feed it with ensilage, when its value is close to that of alfalfa.

And no one has forgotten yet that sweet clover, now a valuable legume, was formerly a weed—and still is one, to many farmers.

When one considers the many by-product feeds used by dairymen—low-grade molasses, beet pulp, brewers' grains and a dozen others—it is hard to see how the agricultural industry could get along without them.

Charwomen Form Union.  
Nearly one thousand charwomen employed in the Dominion Government offices at Ottawa have formed a union with a view of obtaining an increase in wages.

Milk In Brick Form.  
In some parts of Siberia milk is frozen and sold in brick form, and soup frozen into balls is sold to travellers to take on sledge journeys.

A combination storm and glare shield that can be clamped on an automobile windshield in front of a driver's seat has been invented.
