sponges obtained from the Bahamas s done from boats belonging to some larger craft. The bases are clipped off the sponges, trimmed with shears, and packed in pressed bales for transportation to New York or England, where they are used largely in the manufacture of pilot cloth, hats, etc. The coarser kind and clippings are used extensively for stuffing mattrasses, etc., in place of hair. sponges are rarely employed for do-mestic purposes. Mr. Pearce then described the various species and their place of growth. The poorest variety of the Mediterranean sponge is always better for domestic purposes than the best corresponding American varieties, being fluer, firmer, and more elastic. About 500 vessels are em ployed in the Bahamas sponge trade The process of cleaning the sponge was described and the eleven sorts of Bahamas sponges classified. The better class of sponges are known as wool, wreath, velvet, and boat, from the manner of their gathering them The lecturer then gave the chemical universally acknowledged that the sponge belonged to the animal king-When the sponge is first gathered at the bottom of the sea it is cover ed with a black or transparent gelatinous substance, among which microscopic white and oviform bodies
