Womanly Ailments Bring Age Before It Is Due

(Monday's Health Talk No. 4.) (By Dr. W. H. MacPherson, D.C., Phc.)

Womanly afiments are generally accompanied by depression and a disposition to view things on the dark side. They are most destructive to youthfulness. Usually an operation i advised as the only means of relief, but fortunately chiropractic is most effective in ailments of this kind.

Where there is chronic disease of pelvic organs it is often hard to judge vithout a spinal analysis, just organs are involved. By a spinal analysis the chiropractor discovers what spinal bones are displaced, and just what group of spinal nerves is involved. He then makes a nerve tracing and thus definitely locates along the line of tender nerves, just where the disease is active. By chiropractic spinal adjustments the spinal bones are realigned and the nerves are freed of pressure. The result is health.

DIAGNOSED AS OVARRANT TUMOR. CASE IS NOW WELL.

"The first doctor said I had ovarian rouble and advised an operation. The second said it was rheumatism. The third said heart trouble and that the sciatic nerve was affected. The fourth said I had tumors and advised an immediate operation as necessary if I was to live much longer. My husband advised the operation, but I objected and tried the chiropractor. I am glad that I did. I began to improve at once. Within three weeks I thought I was well, but continued. I would advise all to try chiropractic."-MRS. EVA GIBSON, Chiropractic Research Bureau, Statement No. 1340W.
