Supt. C. C. Jones of the G. T. R.

Supt. Jones has practically made London his headquarters since the Wanstead wreck. Mr. Jones has the reputation of being one of the most careful, energetic and obliging of the officials on the Grand Trunk. He is a type of the new order of railway officials, who believe that in time of great

public anxiety such as prevails when an accident has happened upon the road, the public should be informed of the facts as quickly as possible, and it was mostly through his courtesy that the press was able to give definite information to the public concerning the three unfortunate accidents which have recently occurred upon his line.

Taken the month of December only, the exports were \$5,000,000 ahead of the same month of the year previous. The gain was in the exports of animals and their products, and in agricultural products.

SAY THAT MINERS HELD UP OUTPUT

Witnesses for Operators Before Coal Commission Blame the Union.

Philadelphia, Pa., Jan. 15.—Most of the testimony presented to the anthracite coal strike commission today was of a corroborative nature, the Erie Company, which has not yet concluded its case, endeavoring to prove that the miners' union is responsible for the alleged restriction of the hard coal production.

During the examination of Edward Hutton, a foreman employed by the Pennsylvania Coal Company, the fact was adduced that the practice of restricting the number of cars to be loaded daily by one man had been in operation as far back as 1886—long before the United Mine Workers of America entered the anthracite region. The union's responsibility, it was asserted, rests with the enforcement of this rule, and not with its inception.

The majority of the witnesses were mine foremen, who testified that the union was detrimental to the coal industry, that mining is a comparatively healthy occupation. The witnesses told of acts of lawlessness committed during the recent strike.

President Mitchell explained to the commission that the union regarded with disfavor the practice of miners securing certain work by proposal. In the first place, he said, the lowest bidder always secured the contract, and he employs as many helpers as he deems necessary, paying the smaller wages than they would otherwise receive. In many cases one contract miner has employed from twelve to fifteen laborers to do his work, while he would act as a superintendent, performing no part of the actual mining.

This union considers injurious to the other men, besides increasing the liability of accidents, as the contract miners could not pay proper attention to so many different jobs. Mr. Mitchell stated also that he had been informed that saloonkeepers sometimes secure these contracts, and never attend the mines, but leave the work to laborers.

Y., Jan. 16. — Joseph Gokey, aged 35, of Ottawa, Ont., employed by the old Sterling Iron and Mining Company, of Antwerp, was blown to pieces last night by a premature explosion of dynamite while preparing for a blast. A MADDLESOME MESSENGER BOY

Caused Wreck of Two Trains and the Loss of Four Lives—Passengers Uninjured.

Cumberland, Md., Jan. 16. — Through the alleged interference of a messenger boy a wreck was caused on the Baltimore and Ohio Railway, east of Cumberland today, in which four employees were killed and three injured.

Dead—W. T. Simms, engineer; W. J. Mora, fireman; H. D. Sheerenger, fireman, and John Butler, engineer.

The wreck was due to the displaying of a false signal, giving a clear track for east-bound passenger train No. 10, when in the next block ahead there was standing a caboose and two engines.

The passenger train was drawn by two engines, and these crashed through the caboose and engines. The train had not attained its full speed. The postal car was derailed, but the coaches

did not leave the track, and the passengers escaped injury. It is asserted that a messenger boy, named Turner, who was in the block tower, upon hearing the whistle for clear tracks, pulled a lever giving the passenger train a clear track signal.
