Rails and Industrials Forge Ahead While Tobacco Issues Slow Up.

Associated Press Despatch.

New York, June 17.—The general upswing gained momentum in later trading. Sporadic short covering carried many stocks higher, although professional attempts to force a reaction were partially successful in a few of the motor and accessory shares. Leading rails, public utilities and industrials forged ahead into higher grounds under the leadership of Baldwin and American Can.

Speculative interest in the tobacco issues was relieved on a large scale, but realizing later brought down the early gains of Woolworth and several other active stocks. Omission of the Kelly-Springfield 6 per cent preferred dividends caused a reaction of 3½ points in these shares, and 2¼ points in the 8 per cent preferred issues. Call money opened at 2 per cent.

Water Power -a Key to Industry

Mining

Millions of dollars worth of Canadian gold, silver, nickel and other minerals would still be lying deep below the surface of the earth but for the availability of economical water power.

Many mines are so unfavorably located that the cost of rail-haul on coal or untreated ore would be prohibitive, but thanks to adjacent water power they are worked at a profit.

This is only one of the many Canadian industries whose growth is being stimulated through the development of our greatest national asset - water power.

We have prepared a new booklet on Canadian Water Powers. Write for a copy
