## COSTS THOUSANDS TO MOVE TEAMS

C. P. R. Under Heavy Expense  
in Sending Trains via  
C. N. R.

Thousands of dollars are being paid by the Canadian Pacific Railway to provide an emergency service for its patrons each day that freshest conditions keep the C. P. R.'s short route from Montreal to St. John blocked at Danforth, Me.

At the C. P. R.'s regular passenger trains between Montreal and St. John as well as dozens of steamship specials—that is special trains to accommodate passengers enroute to St. John to catch Trans-Atlantic steamships—are being routed via C. P. R. lines from Montreal to Quebec and thence via the old Intercolonial line from Levis to Mount Joli, Campbellton and Moncton to St. John.

The cost of each train is said to be several thousand dollars and more than a dozen have gone over the C. N. R. lines in a night, all the spare passenger train locomotives as well as numerous locomotives usually utilized by the C. N. R. for fast freights have been requisitioned to handle these extra passenger trains.

In one period of twenty-four hours sixteen of those C. P. R. trains have crossed the Intercolonial line and with several ships docking there has been a huge volume of business to be taken care of.

Latest reports indicate that it will be the first of next week before the C. P. R. have their own through line from Montreal to St. John in operation. Meanwhile it is taking forty-two instead of seventeen hours for passengers to reach Fredericton from Montreal with the difference so far as St. John is concerned in trips from Montreal not so great, but the C. P. R. has maintained an uninterrupted service for its patrons despite the great cost. The flood therefore means much to the C. P. R. for, in addition to the great expense of operating trains on a tonnage basis over a competitive route's lines, many thousands of dollars are daily being expended in effecting repairs to the great stretches of the roadbed which have been washed out by the freshets.

Much uncertainty existed as to when through trains from Boston to the Maritime Provinces would be in operation again until the C. P. R. arranged temporary service via Houlton. Little has been learned here of the progress being made with repairs on the Maine Central and Boston & Maine lines and until to-day there had been no mail through from Boston and New York since last Saturday, although some passenger have come through from Boston and elsewhere in the New England States but these have all followed a circuitous route to Montreal and thence via the old Intercolonial line to New Brunswick.

## SAVED MY LIFE

So Says Mrs. Cavanaugh in talking of Drego and the Splendid Benefits She Obtained from it.

Mrs. Arnold Cavanaugh of Oronoto, N. B. found that the sufferings of many years, due to a run down digestive system, disappeared quickly and completely with the advent of Drego. Her experience is typical of the benefits this great remedy heretofore gives to those who suffer from internal complaints.

"I was a terrible sufferer from stomach trouble and constipation for many years," says Mrs. Cavanaugh, "and everything I ate would turn sour, causing severe pain. I often had dizzy spells and my appetite was very poor. I was very nervous and could hardly sleep at night. I became alarmed, as my health and strength were greatly run down."

"I tried many remedies and methods of treatment, but nothing gave me relief. Then I read about Drego and after taking only two bottles, am entirely rid of all my troubles. I feel that this great medicine saved my life."

Remarkable as it seemed to Mrs. Cavanaugh, the action of Drego in her case was nothing more or less than what could have been expected. Her troubles were entirely digestive and it is for these troubles that Drego is expressly compounded from twelve different herbs, roots, bark and leaves known for their natural medicinal value. Drego is prepared with scientific exactness and contains no mercury, potash or habit forming drugs.

Drego is being specially introduced in Campbellton by Wren's Drug Store, and is sold by a good druggist everywhere.

"Mummy," said little Harry, "what are those little crinkly things in your hair?"

"Oh, those are called waves, dear," said mother, rather proudly.

Harry turned round and regarded his father solemnly. Then he went over to him and patted his bald head.

"Mummy's got the waves," he said to him, "and you've got the beach."

## Gas From Food

Presses on Heart

If food does not digest it turns into poisons which form gas. This often presses on heart and other organs causing a nervous, restless feeling. Simple buckthorn bark, glycerine, etc., as mixed in Adierka, removes food, leaving food-matter you never thought was in your system which caused gas and pressure on heart. Adierka expels poisons and gas from BOTH upper and lower bowels. EXCELLENT to guard against appendicitis. A. McC. McDonald, Druggist.

## RECOVER BODY OF GAME WARDEN

Disappeared Last November  
While Chasing Poachers in  
Main Woods.

Dover-Foxcroft, Me., May 4.—The body of David E. Brown, of Greenville, Chief Game Warden for Northern Aroostook county, who disappeared last November, while seeking alleged Canadian game poachers, has been recovered.

Word was received here today that it was found yesterday about a mile below Big Egg dam, where the body of Merley E. Johnson, of Patten, another warden who accompanied him, was found Wednesday.

State Game Commissioner Willis E. Parsons, who was at the farm on Moosehead Lake awaiting the return of a party headed by Deputy Sheriff, who had entered the woods to bring out Johnson's body, was informed that members of the party had discovered Brown's body while they were proceeding in canoes up the north branch of the Penobscot river.

He was advised that the body was in an excellent state of preservation, but members of the party expressed no opinion as to whether death had been accidental or at the hands of poachers.

## Quite Likely.

"Have you ever noticed," began the bald gentleman, who liked to entertain the people gathered in his corner of the hotel lounge, "that little men invariably marry large women?"

"It may be so," murmured a mild-eyed fellow guest, "but I had always supposed that it was the other way about—that the large women married the small men."

## Here and There

Seeding in Alberta was two weeks later this year than last.

A second party of Swiss immigrants from the Melita and are en route for the West, where they will engage in agriculture.

Twenty-two thousand immigrants to Canada from the United States were inspected on trains and high-way crossings at the 33 points from Port Arthur to Kingston, B.C., during March of this year.

To date the port of Vancouver has shipped or booked 17,000,000 bushels of wheat to the Orient and America. The railroads expect at least 2,500,000 additional bushels to be shipped this way in the near future.

The memory of the early misadventures of the Obsolete Order will be perpetuated by the Canadian Pacific Railway, and several stations on the extensions of their lines between Kipawa and Quinze will bear names of early members of that organization which did so much for the colonization of the country.

There are thirteen new paper making machines being installed in Canadian paper mills this year. When erected and running full these machines will consume 300,000 additional cords of wood a year. Canada is already annually consuming and exporting 5,000,000 cords of pulpwood, representing the growth of a century or more on 1,250,000 acres of land.

A new service for motor tourists desiring to pass between the mainland and Vancouver Island has been inaugurated between Bellingham and Victoria. The Motor Princeps is a capacity for fifty automobiles and 250 passengers, plus twice daily between the ports. This boat is motor driven and the first of its kind to be operated on the Pacific side of the continent.

In 1922 Canada produced 2418 tons of salt cake, valued at \$54,804, and 1,329 tons of Glauber salts valued at \$42,719, according to government figures. There are a number of immense deposits of Glauber salts in the province of Saskatchewan, which are at the present time only in the initial stages of development, but it is anticipated that the next few years will see a considerable increase in production.

The Canadian exhibit at the British Empire Exhibition to be held in London from April 20th to October 31st, 1924, is to be financed, controlled and directed by the Federal Government. The estimated cost is \$1,000,000. The two Canadian railroads are planning exhibits on adjoining sites, each with a floor space of 10,000 feet. The cost of the Canadian Pacific exhibit is estimated at \$300,000.

The Canadian Pacific steamship "Empress of Russia," upon her last sailing, carried a shipment of Canadian frogs for Japan. Cool space was reserved in the hold of the liner and the travellers were well packed in ice. On being taken ashore at Yokohama these frogs will be gradually warmed until they are ready to be let loose, when they will be liberated on the laws of Japanese importers, with the idea of giving the Japanese a new industry in the production of frog legs.

## SEES WORLD WAR IN SPRING OF 1928

Premier Veniot Says Public  
Works Losses Will Not  
Reach Million.

Toronto, May 4.—The spring of 1928 will see the last great world war fought, according to the prophecy of Lieutenant Colonel W. G. MacKendrick, Toronto, in an address to the Empire Club here yesterday.

Colonel MacKendrick gained distinction with the Canadian forces overseas as a builder of roads for the military.

In the last great war, he said, Turkey, Russia (re-organized by Prussia) and other Balkan countries will be ranged on one side against the Anglo-Saxon nations. He predicted the final disappearance of Turkey from the world as one of the results of the war which he foresees.

He spoke in place of W. J. Cameron, editor of the Dearborn Independent, who was to have addressed the Empire Club, but owing to illness was unable to be present.

Some Good Fortune.

Premier Veniot said that the damage caused to provincial public works in New Brunswick by the two freshets last year amounted to approximately \$450,000. He said, however, that only about \$175,000 had actually been expended upon repair work as a result of the freshets last year; this was explained by the fact that a good deal of the replacing had been done in a temporary way, which had turned out to be a lucky move, as the permanent work would in many cases have been washed out again during the past few days, whereas all the present freshet had destroyed at such places was the temporary work which would have been taken out anyway.

Until the lumber losses are known, which may not be for many months, it will not be possible to compile an accurate statement of the total flood damage in New Brunswick and the attendant expenditures which have been required from Governments, public corporations and the private citizens in the province. Latest estimates place the figures at "several million dollars," which is taken to mean not less than two million and possibly three or four million dollars' damage in New Brunswick.

ILLINOIS MAN IS  
BELIEVED MURDERED

Several Clues Found Point to Violence—Prominent Attorney.

Aurora, Ill., May 2.—A blood-stained bed, found in a greenhouse, a man's pyjamas and a woman's gloves recovered from an old well are clues in the investigation of the disappearance yesterday of Warren J. Lincoln, attorney and distant relative of Abraham Lincoln. It is believed he was murdered.

"Where are you going in such a hurry?"

"To the police station to get a warrant for my wife's arrest."

"On what charge?"

"Rooking me to sleep."

"You can't have your wife arrested for rooking you to sleep."

"Can't I? You should see the rock!"

A Rough Partner

HELPED 1,100 CONVICTS  
BACK TO CITIZENSHIP

Chicago, May 1.—Two hundred men paraded from seven state penitentiaries and Federal prisons during 1922, earned \$98,044, or an average of something more than \$4 a day, according to a statement given out here by the Central Howard Association to which the men were made responsible.

Essential relief was rendered 1,100 men discharged from various prisons during 1922, and 954 wayward boys were restored to homes and given a chance of thrift and wholesome companionship.

In all, 2,454 men and boys were assisted in some way by the association during last year, and 83 per cent. of the men paroled to the association finished their paroles with credit.
