

Shall we hear from YOU this month?

Of course we are always pleased to receive large lists of subscribers, but it is really more gratifying to receive letters like the one below. We receive a great many of them, and it gives us very much pleasure to feel that we have the co-operation of all our subscribers in extending the magazine's circulation.

This gentleman is so modest that he has not even mentioned anything about commission. Perhaps he has more new "subs" in view, and means to attend to the matter of commission when he has his whole list ready. However, whether he sends any more new "subscribers" or not, we will guarantee that he will not go unrewarded for what he has done.
