

There may be a specific for Pneumonia, but we have never heard of it.

TO-DAY the safe and sane method of treating Pneumonia includes the application over the thorax of prolonged, moist heat in the form of

HYGROSCOPIC **ANTIPHLOGISTINE** ANTISEPTIC

Not a specific—but a most valuable adjunct in treating

PNEUMONIA

When the physician sees first the condition of the patient improve slightly—after an hour or two there is a marked abatement of the severity of the symptoms—and later the patient is, apparently, out of danger and eventually recovers, he *must* believe in the therapeutic value of Antiphlogistine in Pneumonia.
