Above is a reproduction of the latest plot of the University grounds. Since it was made there have been added to the University several buildings. The Observatory stands just east of (H) and south of (G); the museum is now established upon its proposed site near (A) and the Lillian Massey Household just east of Avenue Road is now one of the adornments

of the University. On Czar street, just south of (B) is the new Victoria College Library, and the work on the magnificent Men's Residence just north of (C) is being rapidly advanced. The Thermo Dynamics Building of the School of Practical Science is situated just between (O) and (U). The new stack room of the Library extends eastward into the ravine at (L), and just south of it between (M) and the drive around the Parliament

Buildings is the central heating and power plant, which supplies steam and electricity to all the buildings. The Forestry Building is north of (W) at the corner of Grosvenor street. The new athletic field and stadium extend from Bloor Street south to the property reserved for new Residences on the east side of Devonshire Place. The proposed Union will occupy in part the site of the Gymnasium, (G).

UNIVERSITY DINING HALL
Will be Opened To-day—Run on Scientific Basis

The University Dining Hall, conducted by the authorities through Miss Riley, a graduate of several schools of domestic science opens its doors to the ravenous undergraduates today, Wednesday. During the summer a great deal of equipment has been added in the way of coffee and hot water urns, steam vegetable cookers, sinks, dessert wagons, a cup warmer, and an electrical chopper. Two thousand half-gallon jars of fruit and pickles, or six hundred more than last year have been prepared, and contracts placed for the best of everything for the approaching year.

The Dining Hall is run on a strictly scientific basis. Miss Riley has made a remarkable success of her task of providing first class meals at less than fifteen cents each.

Strips of tickets for a week's board may be had for \$3.00 at the Office of the Fees Clerk, in the Main Building. Luncheons alone, six for \$1.15. Luncheons and dinners \$2.25. Hours:—Breakfast, 8-9; Luncheon, 12-1.30; Dinner, 5.30-6.30.

THE NEW STADIUM

Accommodation for 4000 Fans

The new Athletic Field has supplied a long-felt need of the University. The inadequate accommodation for spectators and the poor-playing field of the old grounds were outstanding disgraces to an institution boasting of Canadian Championship teams. The old red fence and the bleachers which were liable to collapse at any stage are now merely hazy memories and in their stead a splendid concrete wall graces the front of our new stadium and a bleachers has been built to accommodate 4,000 of the most enthusiastic rooters.

The covered stand will accommodate 3,200 and is constructed in such a manner that there are three entrances—one to each section. This will be of great benefit in that the separate entrances do away with all crowding there. The stand is on the west side of the field and the bleachers is directly across from it. The old stand now very insignificant besides its successor has been moved across the South-west corner and will serve for over-flow purposes.

The actual playing field is very striking absolutely smooth, with the grass clipped short, it suggests very strongly a billiard table, and from an athlete's point of view is without doubt without a flaw. It strikes one as very long and a trifle narrow but as the football lines have not been laid out, this impression may be erroneous.

The track is narrower than the previous one but is however the same size—namely ¼ mile. Capt. Brock's crew will take keen delight in eating it up on various occasions this fall.

Of course these improvements cannot be made without cost and as the Athletic Directorate have shouldered the responsibility of raising the necessary \$40,000 required, it is up to us all to give them the hearty support that has been given them in the past years. We have the best athletic field in Canada and the best teams in Canada must have the best support.

It is the function of The Varsity to be useful to the student.

The co-operative element is most essential to its well-being.

Therefore, if you learn something that would interest or instruct your fellow student, send it in; if you are in doubt or difficulty, let The Varsity Office help you; if you see just where we can improve, tell us; above all, subscribe for the paper.

It is the official organ of the student body,

Spadina and College Branch

H. FANE D. SEWELL - Manager.

The Royal Military College of Canada

THERE are few national institutions of more value and interest to the country than the Royal Military College of Canada. Notwithstanding this, its object and the work it is accomplishing are not sufficiently understood by the general public.

The College is a Government institution, designed primarily for the purpose of giving instruction in all branches of military science to cadets and officers of the Canadian Militia. In fact it corresponds to Woolwich and Sandhurst.

The Commandant and military instructors are all officers on the active list of the Imperial army, lent for the purpose, and there is in addition a complete staff of professors for the civil subjects which form such an important part of the College course. Medical attendance is also provided.

Whilst the College is organized on a strictly military basis the cadets receive a practical and scientific training in subjects essential to a sound modern education.

The course includes a thorough grounding in Mathematics, Civil Engineering, Surveying, Physics, Chemistry, French and English.

The strict discipline maintained at the College is one of the most valuable features of the course, and, in addition, the constant practice of gymnastics, drills, and outdoor exercises of all kinds, ensures health and excellent physical condition.

Commissions in all branches of the Imperial service and Canadian Permanent Force are offered annually.

The diploma of graduation, is considered by the authorities conducting the examination for Dominion Land Surveyor to be equivalent to a university degree, and by the Regulations of the Law Society of Ontario, it obtains the same examinations as a B.A. degree.

The length of the course is three years, in three terms of 9½ months each.

The total cost of the course, including board, uniform, instructional material, and all extras, is about \$800.

The annual competitive examination for admission to the College, takes place in May of each year, at the headquarters of the several military districts.

For full particulars regarding this examination and for any other information, application should be made to the Secretary of the Militia Council, Ottawa, Ont.; or to the Commandant, Royal Military College, Kingston, Ont.
