

- ▶ **specialized equipment for extraction/processing**, e.g. equipment for wells experiencing declining production rates and specialized equipment for extracting oil sands;
- ▶ **treatment of sour gas**, e.g. gathering and treatment facilities for sour gas;
- ▶ **enhanced recovery techniques**, e.g. computer-controlled automatic coring devices and automated pipe-handling systems; and
- ▶ **world-class training facilities**, e.g. in advanced extraction techniques, in offshore well control techniques, full bridge ship simulation, ballast control, and offshore safety.
