

The chief objection to the gymnasium being on Pine Ave ¹¹
is the extra distance from the Arts and Science Building.
This distance is at the most five minutes each way -
ten minutes of fresh air exercise which should be more
beneficial than the extra ten minutes Gymnasium work.

The other objection I understand is that it is impossible
at the present time to build dining halls in connection with
the hundred rooms for students that it is proposed to
build with the gymnasium - This may be discounted by
the fact that the student who would use these dormitories
would have no further to go for meals than they probably
have at present and if the wish is for increased physical
activity the walk is an advantage.

There is this further objection to building dormitories
on Sherbrooke St. that Sherbrooke St. is one of the ~~noisiest~~
noisiest streets in the city and Pine Ave one of the
quietest - Above Pine Ave students would have practically
the advantages of living in the country with their playing
fields close at hand.

In addition the dressing rooms necessary at the Stadium
would be incorporated with the gymnasium.

Further - on the campus a stone building would
be necessary to be in keeping with the existing
