

THE RULES OF ASEPTIC AND ANTISEPTIC SURGERY.

A PRACTICAL TREATISE FOR THE USE OF STUDENTS
AND THE GENERAL PRACTITIONER.

By **ARPAD G. GERSTER, M. D.,**

Professor of Surgery at the New York Polyclinic ; Visiting Surgeon to the
German Hospital and to Mount Sinai Hospital, New York.

THIRD EDITION, REVISED.

**8vo. Illustrated with Two Hundred and Forty-eight Fine Engravings.
Cloth, \$5.00; sheep, \$6.00.**

The attention of the Medical Profession is invited to the following points of excellence in this work :

It deals only with matters of practical interest to, and questions that are likely to arise daily in the work of the practicing physician. Its scope is a terse yet clear exposition of the principles governing modern operative surgery. It enters into the practical details of all the varying conditions of the application of the antiseptic method as brought about by emergencies. Every important principle is clearly illustrated by citations from actual cases occurring in the author's practice.

It is not intended to take the place of any text-book on surgery, but rather to supply a need which exists in every work on the subject in the English language, by furnishing information on the subject of Asepsis and Antiseptis, with which no book on surgery deals to an extent demanded by modern methods. It is, in short, a supplement to all surgical text-books.

The illustrations are type-gravures, made from photographic negatives taken from life, and are marvels of beauty, artistic elegance, and fidelity ; each illustration being a faithful representation, by the camera, of the details of the application of all important antiseptic dressings and apparatus, approaching nearer to an actual demonstration than has ever before been attempted to be done in any medical work. With the exception of a few bacteriological illustrations taken from Koch, Rosenbach, and Bumm, the illustrations are from negatives made *in the operating-room*, and are of a character now for the first time employed in a medical work.

The work has been adopted by the Medical Department of the United States Army.
