

## CARIBOO YIELD IS \$810,000

June Clean-Up Beat All Records, and the Mine Has Now Paid \$348,000 in Dividends.

## BIG NEW COMPRESSOR AT WORK.

One From East Algonia-Kootenay Producers-Smelter for Kaslo - Mining Stocks.

At the first general meeting of the shareholders of the Cariboo Consolidated Gold Mining Company of Camp McKinley, B.C., held yesterday afternoon at the company's office in the Board of Trade building, Toronto, it was decided that the annual meeting of that corporation should take place on the first Tuesday in February, 1900. In the absence of President Robert Jaffray, and Vice-President H. B. Peilatt, Second Vice-President G. B. Smith occupied the chair. A number of the shareholders were present, and apparently everyone went away well pleased with the outcome, as gathered from the official statement submitted. These statements all coming out in reply to questions put by the acquiring shareholders.

In the first place, it was shown that the mine for June resulted in a clean-up of 1001 ounces of bullion, exclusive of concentrates. This result is the highest ever obtained in one month in the history of the company, the largest previously having been 970. The total output of the Cariboo up to May 31 was according to the treasurer's statement, \$880,280.40, and since that date the output has been swelled by the shipment of between \$20,000 and \$25,000, the result of the clean-up for June. These figures show that the mine has yielded up to date between \$610,000 and \$615,000. Up to May 31 the Cariboo had paid 20 dividends, totalling \$210,000. Since that date a dividend of \$12,250 was paid for the month of June, and another of \$12,250 was paid for the month of July will bring the total sum paid in dividends from the Cariboo mine up to \$444,000 in round figures, and it will be seen that, as the Cariboo produces about \$20,000 per month, and pays only about \$12,000 in dividends, it must be laying by the tidy sum of \$8,000 a month for any rainy day that should come round.

As to the mine itself, the main shaft is now down to the 300-foot level, where the body is looking first-class. In fact, looking at all things into consideration, the company feel that their mine was never in all its history looking as well as it does to-day.

As to equipment, the new drill-air compressor has just been installed at the plant and is now in operation. As up to the end of June only three drills were working, it will be seen that the capacity of the plant has now been more than trebled. When the question was asked as to when the number of stamps would be increased to cope with the increased supply of ore, the reply was made that that was a matter which the directors would consider.

By the way, Mr. George B. McKenry, managing director of the Cariboo Consolidated, said last Saturday from Scotland for this country. President Jaffray and Vice-President Peilatt have gone out to Camp McKinley, as we have mentioned some days ago.

**Ore From Bruce Mines.** Mr. H. A. Luman of Port Lock, East Algonia, called at the World office yesterday with an amount of rock, consisting of specimens of copper, gold and iron ore from the vicinity of Bruce Mines. The character of the quartz carrying the copper values is very fine, and the mineral appears in the yellow, grey and peachy tones. Some of the copper samples are from the Bruce Mines, in which Lord Douglas of Tavistock is interested, and some from deposits near Port Lock. There is also some grey copper from Garden River. The iron specimens are from the property of Andrew White in the town of Bruce.

**Kootenay Dividends.** According to the report of the Engineering and Mining Journal, the late mine of British Columbia have paid dividends to date to the extent of \$2,234,405. This does not represent the actual amount of dividends, but is all the returns they have received. The Kootenay mine, which was started in 1897, for eight or ten years the owners would get out in winter and reduce in summer. Each year they would make a profit of about \$20,000. The Kootenay mine is now being worked by the Engineering and Mining Journal's list.

**Smelter for Kaslo, B. C.** It is quite possible that Kaslo will have a smelter in the near future, as a Canadian known as the Smeltering Corporation, Limited, has been organized and incorporated in England, and is authorized to do business in the province. The company is to be at 11 and 12 Clements-street, London, England. The capital of the company is \$500,000, divided into 100,000 shares of \$5 each. The company is to be known as the Smeltering Corporation, Limited, for the company in British Columbia.

**A Good Combination.** Messrs. J. M. Egbert and F. A. Rowlett, engineering and brokerage business in this city. The former is a British civil and mining engineer and has had 20 years' experience in various parts of the world. The latter is a famous Kootenay miner of the late Lord Douglas of Tavistock, and was under his charge for five years.

## NEW INDUSTRY FOR RAT PORTAGE.

According to the Rat Portage Miner, the manufacturers of the new explosive known as "Rat Portage" have decided to erect a factory at Rat Portage to turn out 10 tons of that material a week. It is said that the explosive has been tested in the deepest mines in England and has been found superior to nitro-glycerine, which is now in use. It will displace an enormous amount of rock and leaves no fumes, so that it is now being used immediately. It is interesting to note that the manufacturers of this country by Messrs. Harold Boyd and Mr. Winters, that such an accident as recently occurred in the War Eagle will be impossible with this explosive.

## Golden Star.

Golden Star continues to make things hum. A great deal of work has been done yesterday and the price held quite firm.

## JANITOR SHOT PRINCIPAL.

In the First Christian Church at Dallas, Texas, a sensational tragedy took place.

Houston, Tex., July 11.—A special from Dallas, Texas, says: At 9:30 o'clock last night one of the most startling tragedies which has occurred in the history of the city, took place in the First Christian Church, Dallas, Texas. The principal of the Central High School, John T. Carls, was shot and killed by a janitor, who was employed in the school. The janitor, who was named William J. Smith, was shot in the chest by a single bullet. He was taken to the hospital, but died shortly after midnight. The principal, Mr. Carls, was a well-known and popular figure in the school. He had been in the school for many years and was highly respected by the students and faculty. The shooting occurred during the evening service. Mr. Carls was standing at the front of the church, and the janitor, who was standing near the back, fired the shot. The police are now investigating the case, and have arrested the janitor. It is believed that the janitor was motivated by a grudge against the principal.

## ANTI-RITUALIST VICTORY.

Use of Candles and Incense in Church Ceremonies is Forbidden.

London, July 11.—The anti-ritualists have won a signal victory in their crusade against high church practices in the Established Church of England. The Archbishop of Canterbury and York, the highest prelates in the province, have issued a decree forbidding the use of candles and incense in church services. The decree is a result of the protest of the anti-ritualist movement, which has been active in the south of England. The anti-ritualists claim that the use of candles and incense is a relic of the Roman Catholic Church, and is therefore idolatrous. They demand that the Church should return to the simplicity of the early Christian era. The Archbishop and the Bishop of York have agreed to the decree, which will be enforced in all churches under their jurisdiction. This is a significant victory for the anti-ritualist movement, as it shows that the Church is willing to abandon practices that have been considered essential for centuries.

## OUTRAGEOUS TREATMENT.

Charged Against the Officers of the Gaspesia-The London Riots.

London, July 11.—The charges against the officers of the Gaspesia, who were involved in the London riots, have been made public. The charges are that the officers used excessive force and treated the rioters with outrage. The rioters claim that they were provoked by the police, and that the police used force against them without justification. The charges are being investigated by a committee of the House of Commons. The committee will hear evidence from both sides and will report back to the House. The rioters are demanding that the officers be punished for their actions. They claim that the officers acted in a cowardly and brutal manner. The officers deny the charges and claim that they acted in self-defense. They claim that the rioters were the aggressors and that they used force to restore order. The case is a controversial one, and it will be interesting to see what the committee decides.

## At the Sign of the Scales.

In the Police Court yesterday, Arthur Brooks was fined 5s and costs for assaulting Constable Wiggins in a West Queen-street car about two weeks ago. Archibald Woods, an alleged accomplice, was discharged.

## In the Surrogate Court.

Yesterday in the estate of the late John W. Smith, leaving property and personal effects worth \$7500 to his widow and children. The late Mrs. Elizabeth Horner of Markham Township will all she had to her children and \$1195 in personality.

## O. R. A. Matches.

The Ontario Rifle Association programs meeting on Thursday, Aug. 22, and the following list of competitors. The conditions are contained in the program, which can be had upon application to the acting secretary, Lieut. Harbottle, 16 Victoria-street.

## Paris Exposition.

Mr. J. M. Macdonald, the forestry expert for the Paris World's Fair, visited yesterday at the Exposition Office, in the Parliament Buildings, Ottawa. He was accompanied by Mr. Jardine, who is in charge of the Canadian section of the Crown Lands Department. They were looking over the plans for the Canadian exhibit, which will be a collection of the native woods of Ontario.

## Georgian Bay Point.

For the information of passengers going via Collingwood to Georgian Bay, note that the fast mail steamer, the "Algonia," will leave for Collingwood on Saturday, July 15, at 11:30 a.m. The "Algonia" will take them to Collingwood in time for the fast mail steamer to Georgian Bay.

## Want Premier Schneider Bounced.

London, July 11.—The Globe and other Conservative papers this morning urge Sir Alfred Milner, Governor of Cape Colony, to dissolve the Cape Parliament and dissolve the Premier Schneider. They claim that Schneider is a disloyal and corrupt man, and that he is unfit to be Premier. They demand that he should be removed from office. The Cape Colony is a British colony, and they claim that Schneider is not acting in the best interests of the colony. They claim that he is using his position for his own gain, and that he is ignoring the needs of the people. They demand that he should be "bounced," which means that he should be removed from office and replaced by a more suitable person.

Golden Star

We think the mine is all right. It lies in a field of massive structure, and therefore, always the matrix of a well-defined massive vein, and the volume of ore, we are led to believe, is increasing with depth. Parties who have better opportunity of knowing than we are buying the stock, after spending quite a bit of money in forcing down the price; 40 cents means a 15 per cent dividend. The mine is a holding aloof, market therefore weak, but favorable to buyer—after report it will not be.

CLERGYMAN TALKS.

Rev. F. Elliott of Richmond Hill Gives Evidence in Favor of Dodd's Kidney Pills.

An Interview With a Well-Known Minister—His Experience With Dodd's Kidney Pills—He Recommends Them to All Sufferers.

Richmond Hill, July 11.—Rev. Mr. Elliott has just returned from a month's trip in the pursuit of his duties as a clergyman. During his trip he has been in the habit of reading Dodd's Kidney Pills, and he has been so much impressed by the results that he has written a letter to the publisher of the pills, Mr. J. H. Dodd, in which he expresses his high opinion of the pills. He says that he has been suffering from kidney trouble for many years, and that he has tried many different remedies without success. He says that he has been so much improved by Dodd's Kidney Pills that he has decided to recommend them to all his parishioners who are suffering from kidney trouble. He says that he has been so much impressed by the results that he has written a letter to the publisher of the pills, Mr. J. H. Dodd, in which he expresses his high opinion of the pills.
