# WHY WATERWORKS BYLAW

Improvement in System Necessary and Urgent for the Civic

The attention paid by the Retail Merchants' Association to the charges preferred by Charles Heal against the waterworks department has aroused interest in the million dollar bylaw upon which the ratepayers of the city will vote on the 23rd instant, a week from Wednesday next. While the action of the merchants will doubtless be reconsidered after the nature of the charges has been explained, realine is kind to large and the publicity given to the statemants of Heal. Whose requests of without considerable and the publicity given to the statemants of Heal. Whose requests of without considerable and the publicity given to the statemants of Heal. Whose requests of without considerable and the property owners to refrain from voting for the bylaw. It has been regretted that should pass such a coportunity for an extendition of the reasons for the shown by the statemants is shown by the fact that it was the coportunity of an extendition of the reasons for the charges. The absurdity of the statemants is shown by the fact that it was said that there was no reason for the charges. The absurdity of the statements is shown by the fact that it was said that there was no reason for the charges. The absurdity of the statements is shown by the fact that it was said that there was no reason for the charges. The absurdity of the statements is shown by the fact that it was said that there was no reason for the charges. The absurdity of the statements is shown by the fact that it was the consumption of the reasons for the charges. The absurdity of the statements is shown by the fact that it was the capacity of the statements is shown by the fact that it was the capacity of the statements is shown by the fact that it was the capacity of the statements is shown by the fact that it was the capacity of the statements is shown by the fact that it was the capacity of the statements is shown by the fact that it was the capacity of the statements is shown by the fact that it was the capacity of the statements is shown by the fact that it was the capacity of the statements in the city of the statements is shown by the fact that it was the capacity of the statements in the city of the statements is shown by the fact that it was the capacity of the statements in the city of the statements is shown by the fact that it was the capacity of the statements at a lower level of the statements at a lower level of the late of the statemen some fear has been expressed that the publicity given to the statements keep up the water supply, both of the engines in use must be kept working at their highest capacity for the full twenty-four hours every day in the week. As everyone knows, this means

twenty-four hours every day in the week. As everyone knows, this means a terrific strain on the machinery, as any engine which is kept working constantly will not last national entires and the week. As everyone knows, this means a terrific strain on the machinery, as any engine which is kept working constantly will not last national entire the promises of their youth, this week duestions celebrifies about their children as a retrific strain on the machinery, as any engine which is kept working constantly will not last nation. Part of the strain of the strain of the machinery as any entire and the machinery as any entire and the machinery. As unwarranted attack.

Another unfortunate circumstance is that a personal attack is made on the engineer, who, under Mr. Fullowes does not possess the necessary certificate as a civil cromechanical engineer, such on the eithy. C. L. Fellowes. It has been stated that Mr. Fellowes does not possess the necessary certificate as a civil cromechanical engineer, such as would qualify him to hold his important position. While this is true, it is not a matter of any moment, for prior to the time that such degrees were granted, Mr. Fellowes and changes of origineer, who, unless than any other person in the city, C. L. Fellowes and changes of origineer, who, unless than any other person in the city, C. L. Fellowes does not possess the necessary certificate as a civil cromechanical engineer, such as would qualify him to hold his important position. While this is true, it is not a matter of any moment, for prior to the time that such degrees were granted, Mr. Fellowes and changes of origineer such as would qualify him to hold his important position. While this is true, it is not a matter of any moment, for prior to the time that such degrees were granted.

Mr. Fellowes and changes of origineer such as would qualify him to hold his important position. While this is true, it is not a matter of any moment, for prior to the time the prior prior to the time the prior prior to the time the pri and in the estimation of the profession is classed with such men as Willis Chipman, W. T. Jennings, Collingwood Schreiber and others of equal calibre.

Mr. Fellowes had charge of the construction of twenty-four sections of the Welland Canal, and was connected the Welland Canal, and was connected with the installation of the Hamilton and London systems of waterworks, and his work has always proved to be of the most substantial and satisfac-

tory character. very fully brought out in the investi-gation of the waterworks department conducted by the late Judge McDougall connection with the Green ec mizer five years ago. In his report the judge spoke of the "able and lu-cid" report prepared by Mr. Fellowes, saying that his strictures on the report of the engineer then in charge of the main pumping station on the consumption of coal were amply sustained by the evidence and his own report satisfactorily verified by independent

Tunnel the Only Way. The chief items in the estimates for the proposed improvements to the waterworks are \$325,000 for a tunnel across the bay and \$200,000 for a sixfoot steel pipe from the shore crib to the tunnel shaft. The tunnel is intended to ensure a supply of pure tended to ensure a supply of pure water from the island to the main-land. The public will easily remember the results of the trouble that ensual upon the breaking of the pipe some years ago and the epidemic of typhoid fever that threatened the city. The fear has not entirely departed that there still exist leaks in the pipe and the sewage of the bay into the water pipe. The tunnel will certainly dissi-pate forever any fear of trouble from that source. The new pipe from the shore crib across the island is abso-lutely required on account of admitted intely required on account of admitted mistake in laying the present pipe. It is on account of the fact that the pipe was not laid at a sufficient depth that when the level of the lake is lowered below a certain point the water will not flow across the island, It is impossible to lower the present pipe because of the great liability of accident whereby the supply of water to the whereby the supply of water to the city might be cut off altogether. The next large amount is \$190,000, to be used in extending the 36-inch main from College and Bathurst-streefs to Rosehill Reservoir, and this is required not only to ensure the necessary supply of water in the reservoir, but to provide fire protection for the rapidly growing northern section of the city.

New Mains Needed. Another sum of \$55,394 is asked to continue the 24-inch main from Front and Church-streets to Sumach and Queen-streets. A 16-inch main will continue this service across the Don to Broadview-avenue at a cost of \$11,-000. It will not be denied that the eastern section of the city demands this service. A further sum of \$2500 will be used to improve the pressure and supply east of the Don. On the extension of other mains thruout the city, especially on one to the exhibition grounds, it is proposed to expend about \$41,600. There is also to be provided a new five million gallon pumping engine, machinery, at a cost of \$50,000. The other items are \$35,000 for concreting the sides and bottom of Rosehill Reservoir, and \$25,000 for the purchase of

Objections have been taken to these last three items, as they have been placed in the estimates for a number of years by the city engineer and thrown out by the board of control. It is feit, however, that when the enfire waterworks system is to be in requirements of the service, especially the great enlargement of the city's limits that is soon to be made takes

'So far as the appropriation for meters is concerned, it has been the experience of the department that these cost incurred very shortly after their installation thru the great saving in the quantity of water consumed and the increased revenue from the rates. sumption of water is very large and the opportunities for waste very great,

THE DIRT AWAY AND BY DISSOLV-NG CLEANSES

Declares He is Not Against Corpora tions, But Wants Justice for Farmers.

Des Moines, Iowa, March 13 .- Repre entative L. L. De Lano, Democrati mber of the house of representative rom Cass County, is the thorn in th esh of railroad men. With a bill fo m speed of twenty miles for liv tock trains, passes for all shippers of

Popularity of His Electric Belt.

Now that it is generally conceded

Laughlin's Electric Belt.

should I not be? I have the gratitude of thousands of people who have been cured by my Electric Belts after the failure of the best

physicians. I am enthusiastic because I know that I offer suffering humanity the surest cure for the least expenditure of money that is

for every patient. My patients are my friends. They are building

regulating device, non-burnable electrodes, reversible battery, and of

increasing the power of my appliance until it is five times as strong as that of any other

electric body appliance on the market. My appliance is conceded to be the only one of the kind which is constructed upon truly scientific lines. Compared with it all other so-called electric belts are the inventions of the blacksmith's hammer.

READ THE PROOF OF MY CLAIMS.

Done What Dectors Failed To Do. Cured of Nervousness and General In Better Health Than Ever Before.

Exhaustion. Dr. McLaughlin

Dr. McLaughlin

Dear Sir: I am very much pleased with the Belt which I purchased at your advice about two months ago. When I began to use it I had just started to work after a six weeks' illness from overwork, strained heart and nervousness, and was very weak. I felt stronger from the very first time I put it on, and now feel as well as ever, and can do a good day's work. I thank you for your kind advice and attention, and wish you future success. I am, sir, yours respectfully, John H. Waterbury, Thessalon, Ont.

Varicocele and Back Cured.

I am specially successful in my treatment of checking drains or losses in men—the one disease most dreaded and which is the means of wrecking so many lives. Losses cannot occur where my Belt is used, and I have known scores of cases where they were checked after three days' use of my appliance.

I don't ask you to take any chances. I am willing to do that because I know my Belt will cure any caseI undertake, if given a fair chance. All I ask is that you secure me while you are using it. Remember,

It Doesn't Cost You a Cent Until Cured.

You read grateful letters from men and women who were cured by my Belt of rhoumatism, back-ache, tumbago, sciatica, stomach, liver, bowel, kidney and bladder troubles. You also see evidence of wonderful cures of tocomotor ataxia and some forms of paralysis. Every day brings fresh evidence of the wonderful cures.

READ WITH CARE. Every patient wearing Dr. Molaughlin's Electric Belt receive free until oured the advice of a physician who understands his case. Agents or

FREE BOOK.—If you can't call, write for my beautiful descriptive book showing how my Belt is used. It explains how my Belt cures weakness in men and women, and gives prices. Send for it to-day. Address-

business is due to my knowledge and the way I treat my patients.

Dr. McLaughlin,
Dear Sir: Yours to hand, and I have to state that I am now in the best of health, and no signs of my old complaint returning. I consider that your Belt has made a lasting cure. With thanks to you for having such a Belt. I remain, yours truly, G. L. Savage, Chesley, Ont.

Dr. McLaughlin,
Dear Sir: The action of your Belt has been most satisfactory. The varicoccle and pains in my back are all gone, and I am gird that I took your advice and purchased the Belt. Wishing you like success in all future cases. I remain, yours very truly, Frank Mitchell, Dunbarton, Ont.

drug stores are not allowed to sell these goods.

Dr. McLaughlin.

Dear Sir: The Belt is simply per-

fection. It did for me this winter

what doctors have been trying to do with medicine for the last four years—that is, to cure my stomach. I am glad to be able to tell you that I am well. I am stronger and better in health now than I have been for years. Our neighbors and relatives are surprised that your Belt has cured my stomach. I am thankful to you. Yours truly, Richard Pincombe, Poplar Hill, Ont.

A Cure Accomplished Some Years Ago.

It is not upon that point, however, that my success has been founded. My immonse

I have gained my success by learning how to treat my patients and then curing them. I know how, others do not. I charge nothing for my knowledge, knowing that it helps my business to do all I can

Having spent twenty-two years in study and experiment, I have found means of perfecting my appliance, of removing defects as fast as they appeared in actual use, and of supplying features, such as a

They cleanse the Blood of long-standing impurities, brace up the Nervous System to a high point of vigor, and effectually chase away every symptom of weariness and depression. Since BEECHAM'S PILLS have cured tens of thousands in this and every country of the globe, just ask yourself why they should not equally prove a boon to you. Renew the power of digestion by using

Sold Everywhere in Canada and U. S. America. In boxes, 250.

I insist that I am not. It is a very short sighted policy of the railroads of the country to antagonize the farmers, feeders and shippers of live stock by delaying the transportation of this very important product of their farms to the market, and if relief is not granted by them, and is denied by the legislature, these railroads will appreciate the work that I am doing for them now, or trying to do, before the end of another four years.

hour and let the live stock of the farmer drag along to market at the rate of ten miles an hour.

PUBLIC AMUSEMENTS. Princess-"A Country Girl."
Grand--"The Burgomaster."
Majestic--"Only a Shop Girl."
Shoa's-Yaudeville.
Star--Merry Maidens Burlesquers.

There are few attractions that can play three times in a season at the same theatre, but so great has become the popularity of "A Country Girl" that the reappearance at the Princess for a whole week, beginning to-night, will be hugely enjoyed. It is the same great company thruout that has been seen and heard in the prévious visits.

To the Grand comes "The Burgomaster," also one of the favorite musical comedies. It is Pixley & Luders' biggest success, and the catchy musical hits are numerous. The company this year includes Ruth White and Oscar Figman and a number of other clever artists.

At Shea's Sabel Johnson wil head a fine bill. She is regarded as the world's high-est soprano. Lew Bloom and Jane Cooper have a funny sketch to present. The Four Bard Brothers have a great acrobatic act. Press Eldridge will give a funny talk. Cal-lahan and Mack are Irish comedians. The Pauztner trio, gymnasts; twin Nices, sing-ing and dancing, and the Kinetograph are others.

At the Majestic Lottle Williams, that pert little comedienne, will be seen in her

en miles an hour.

Crentures of the State.

"These railroads are the creatures of J. Jeffries will be the big attraction next

"The Isle of Spice," coming to the Prin-cess next week, is said to be one of the best extravaganzas on the stage, and is filled with musical successes and staged and produced with much elaborateness.

going to the St. Louis exposition, is one-sixteenth of the actual size. It is a demonstrated fact that a monorai train will not jump the line. The running wheels are in the centre of the train, straddling a Roman "A" shaped structure, at the apex of which shaped structure, at the apex of what is the rail. The underworks of the carriage hang down on either side, and there is an ingenious arrangement on there is an ingenious arrangement on there is an ingenious arrangement on This is, providing there is not analysis of the carriage has seemed. there is an ingenious arrangement on horizontal wheels which run along the guide rails half way down the sides of the Roman "A," with flanges beneath. When the train takes a curve the pressure falls upon these horizontal wheels, and thus there is practically no more risk in turning curves than in running straight. Behr, the inventor, said the speed of the relivary to be built from the model will be 110 miles an
