

The Bulbs Are In

They are all here—the Hyacinths, Tulips, Crocus, Snow Drops, Narcissus, Daffodils, Jonquils, Sacred Lily, Calla Lily, etc.

All the above with the exception of Sacred and Calla Lilies, may be grown out doors for early spring flowers and must be planted in the fall, the earlier the better.

The Dutch and Roman Hyacinths, Tulips, Calla Lily, Sacred Lily, Narcissus and Jonquils are adapted to indoor flowering, and if a few of each kind are potted it can be arranged to have flowers from November 15th until May. We will give you full directions for planting and potting.

Compare These Prices With Any Catalogue

- Dutch Hyacinths in 4 Separate colors 5c. each
- Roman Hyacinths, white only 5c. each

A Full Line of Heavy Winter Dry Goods

W. J. MANN MATTRESSES

The quality of fibre we put in our Mattresses has advanced 45 per cent. Expecting this increase, we purchased a stock to carry us over till another season. This enables us to continue selling clean, sanitary Mattresses at the old price. Making our own Mattresses saves the freight, packing and wholesaler's profit.

Remember—This is the store for LINOLEUMS and OILCLOTHS.

NOTICE TO CREDITORS

OF HARRY FISHER, DECEASED.

Pursuant to Sec. 38 of Chapter 120 of the revised Statutes of Ontario, 1897, notice is hereby given that all creditors and others having claims against the estate of Harry Fisher, late of the Town of Aylmer, County of Elgin, Ontario, who died on or about the 12th day of October, D. 1909, are on or before the 20th day of November A. D. 1909, to send by post, prepaid, to Miller & Backus, Aylmer, Ontario, solicitors for the Administrator of the said deceased their christian names and surnames, addresses and descriptions, the full particulars of their claims, a statement of their accounts and the nature of the securities (if any) held by them, and that after the day last aforesaid the said Administrator will proceed to distribute the assets of the said deceased among the parties entitled thereto having regard only to such claims of which notice shall have been given as above required, and the said Administrator will not be liable for the said assets or any part thereof in the hands of persons of whom a claim or claims notice shall not have been received by him at the time of such distribution. Dated at Aylmer this 19th day of October, A. D. 1909.

Most of Them Made by Supposedly Respectable Mechanics.

Every little while, said a detective recently, the police arrest a man with a set of burglar's tools in his possession, and one naturally wonders where they all come from.

It is easy to buy a gun of any description, and the most reputable person would not be ashamed to be seen purchasing the most wicked looking knife ever made. But who would know where to get a "jiminy" or a device for drilling into a safe or any of the many tools used by the professional burglar in the pursuit of his calling?

There are places in the large cities where these things are made and sold to the users, but such places are exceedingly scarce. It may seem a little strange to learn that most of the tools used in burglaries are made by mechanics who are looked upon as respectable men in the community.

When a burglar wants any particular tool made he goes to a mechanic who can do the job and pays him perhaps five times what it is actually worth for making the tool and keeping quiet about it. Many detectives can recall cases of this kind that have come to light.

One in particular occurred some years ago when an escaped convict named Williams went to a blacksmith and got him to make a lot of drills to be used in safe cracking. He personally superintended the tempering of the steel, but when the job was nearly completed it leaked out, and Williams was arrested. In this instance the blacksmith knew nothing of the use to which the tools were to be put. Most of the tools used by burglars are secured in the same way.—Philadelphia Inquirer.

Shoemaker's Candles.

I well remember some seventy years ago seeing flat candles in use. To produce what was known as the flat candle, which was also sometimes called "shoemaker's candle," two new-made "dips" were pressed close to each other while soft and then again lowered into the hot fat, thus holding them together as one candle with two wicks. The size could then be increased if desired. This flat candle was most generally used by shoemakers and tailors, but was made use of in some households whenever an extra bright light for working or reading was required.—Cor. Dickensian.
