Canada's Position Clear.

"We fully recognize the right of the United States to lay down the conditions upon which she is willing to ratify the treaty and enter the league of nations; but if one of the conditions imposed is that Canada and the other dominions shall be denied their status and voting rights as members of the league, the United States will recognize that it is equally the right of Canada to oppose the acceptance of such a condition. Conditions in Europe and the near east make a final decision as to what nations shall compose the league a matter of the most supreme importance. In order, therefore, to prevent misunderstandings and the delays to which such misunderstandings might give rise, Canada has felt it necessary to make her position perfectly clear to the proper authorities in London, and she has asked them to make her position equally clear to the authorities in Washington. We have taken this course in the interests of a good understanding between the United States and Canada, and. as above intimated, to avoid the nossibility of serious misunderstanding in the future. Our position is that under no conditions will Canada accept or be a party to the acceptance of the first part of the Europe transplant or modified form. Canada can not ahd will not assent to any irwairment of her status or voting rights under the treaty."
