

CANADA BEING MAPPED FROM AIR PICTURES

Royal Canadian Air Force
Achieves Remarkable
Work

PHOTOS DISPLACING
MAPS OF DOMINION

Requests Pour Into Ottawa
for Pictures, Forestry
Protection, Etc.

OTTAWA, Sept. 21.—A Canadian geography is verily "up in the air." Instead of seeking the location of Halifax or Saint John or Montreal or Toronto or Winnipeg or Vancouver and finding them to be mere black dots on a meaningless expanse of green or red map paper the student of the Dominion's splendid distances can now obtain local maps containing actual photographic reproductions of these cities as they actually appear to an aviator at altitudes ranging from 1,000 to 10,000 feet. A bird's eye view of the city has been substituted for a human eye's view of a dot.

PHOTOGRAPHS FURNISHED.

Instead of Canada's official map-makers having to depend upon the costly mathematical surveys of men on the ground and whose meridians and parallels stretched out through the pathless woods and over terrain never traversed by human foot the Topographical Survey branch of the Department of the Interior is now furnished with absolutely accurate photographs, vertical and oblique, thus being able to provide, in return, the students of their country's expanse not only the multitudinous boundary lines but also graphic pictures of the physical features lying within those boundaries.

IS ALL AIR FORCE WORK.

All this is made possible by the increasingly useful work being done by the Royal Canadian Air Force branch of the Department of National Defence. Ever since the Armistice the activities of that branch, as far as civil aviation is concerned, have multiplied rapidly, and today the demands upon the service far exceed the ability to supply. Requests are coming in for survey pictures, for forestry protection, for pictures to be used in connection with school geographies, for hydro-electric power surveys, for land sub-divisions and for other commercial purposes.

ADVANCE IS REMARKABLE.

There has been a remarkable advance in the practical application of a large scale of aerial photography to surveying, exploration and map production and, in addition, to railway location and other engineering problems. An area of well over 40,000 square miles was covered in 1924 by oblique and vertical pictures for the Topographical Survey branch, and it is now fairly claimed that it has revolutionized their system of map production in many respects. The problem of aerial surveying in Canada is different from that existing in the smaller and older civilisations of Europe where ordnance survey maps, correct to the last minute detail, exist. In the Dominion the existing maps are imperfect and great areas have never been surveyed at all. The production of accurate topographical maps to keep pace with the growing demands for land settlement, lumbering operations and other activities is a difficult problem, the Air Branch admits, and despite the efforts of the Survey Services in the past generation map production still lags behind the demand.

GIFTS PRESENTED

Several Showers Are Given in
Honor of Brides of
Autumn.

Mrs. Ethel Mabel Mcavour, daughter of Mr. and Mrs. W. J. Galbraith of Lorneville, who is one of the brides-elect of October, was made recipient of a novelty shower and bridge at the home of Mr. and Mrs. Leonard R. Melvin of West Saint John last evening when 80 friends assembled. The presentation was made by the two young sons of the host and hostess, Ronald and Kenneth Melvin. Mrs. George Reed, Mrs. Roscoe Melvin and the Misses Ruth and Frances Ferguson assisted the hostess in serving refreshments. Music was given by Mrs. Roscoe Melvin and Miss Ethel Rupert. Special guests of honor were Mr. and Mrs. Lorne Ferguson of Boston, the former a brother of the hostess. The prize winners at cards were J. Hersey, Mrs. W. Fuller, R. Melvin and Miss Ruth Ferguson, and Clyde Ferguson consolation.

Mrs. Don Bridges, West Saint John, was hostess last evening at a tin shower for Miss Elizabeth Lynch, who is to be married in the near future. The gifts were wheeled into the room by Little Miss Margaret and Master Don Bridges. The evening was spent in games and music and refreshments were served by the hostess. Miss Katherine Green, who is one of the brides-elect of the week, was given a delightful shower at the home of Miss Edith I. Mason of Grand Bay on Monday evening when friends presented to Miss Green lovely gifts and good wishes for her coming marriage. The presentation was made by a bride and groom, artfully disguised. Cards and music were enjoyed and a dainty supper provided by the hostess.

Same Discomforts.
"Didn't you miss your usual summer camping-out this year?"
"Yes, but keeping our windows wide open and removing the screens we got something of the effect."

Exactly So!
Examiner (at military college)—
"What must a man be to be buried with military honors?"
"Would-be Officer—'Dead, sir!'"—The Victorian.

WHEN BROADWAY TOOK A DUCKING

Broadway got good and wet and thousands of subway passengers were delayed for an hour or so when a water main burst under New York's famous thoroughfare. This picture shows firemen working to pump away the water from the subways.

DR. O. B. PRICE IS NOMINATED

Will Contest Westmorland
Seat for Conservatives in
Federal Election.

Tells Convention He Will Al-
ways Fight for Maritime
Rights.

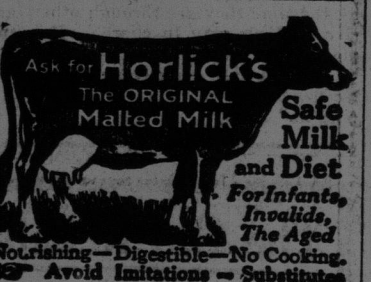

SACKVILLE, Sept. 21.—Dr. O. B. Price, of Moncton, was today nominated to contest the County of Westmorland in the federal election on Oct. 29, when about 600 persons, including 200 delegates, were present at an enthusiastic convention of the Westmorland County Liberal-Conservative Association held in the Imperial Theatre. The names of Dr. Price, W. F. Humphrey and Major George O. Price, of Moncton, and H. M. Wood, of Sackville, were placed in nomination in open convention. Mayor J. F. Edgett, of Moncton, was also mentioned as a candidate, but Mr. Edgett stated that he could not possibly run at present. He might possibly accept the honor of some future time.

Dr. Price was elected on the first ballot, receiving 142 votes; H. M. Wood, 89; W. F. Humphrey, 46 and Major George Price, 16. On motion of H. M. Wood the nomination was made unanimous.

CANDIDATE SPEAKS.

At the close Dr. Price was called to the platform and given a rousing reception. He expressed his appreciation of the honor conferred on him. He said he had not canvassed for support, but had accepted the wishes of his friends that his name be again placed in nomination. He stood for "Maritime Rights" and would give voice to that sentiment regardless of who the leader of the House might be.

The following were appointed as an

More Than One-Eighth Of Vienna People Foreigners

VIENNA, Sept. 22.—Vienna is a recently made public, 119,000 of these city of foreigners. Almost a quarter of a million, or more than one-eighth of her entire resident population owe their first allegiance to some other country than Austria.

Most of these foreigners are citizens of the new European countries which in pre-war days were part of the Austro-Hungarian monarchy.

According to official statistics re-

POOR MAN

(New York Times.)

The news from Kansas that Lyon County Chapter of the W. C. T. U. desires to censor the carol about the habits of Old King Cole, and would banish the mention of tobacco from song and story, must not be received with incredulity. Even here in the graceless East there are people who are ready to go to equal lengths. It is curious that in this age of one reform after another for women the regulation of man's habits and amusements should be advocated as never before by organizations that women control.

Man's ale has been taken from him; his cigar and pipe are to go next. Such is the intention of organized reformers, not in Kansas alone. Men in some cases are their allies and accomplices.

WORLD WHEAT CROP TOPS 1924 BY 8 P. C.

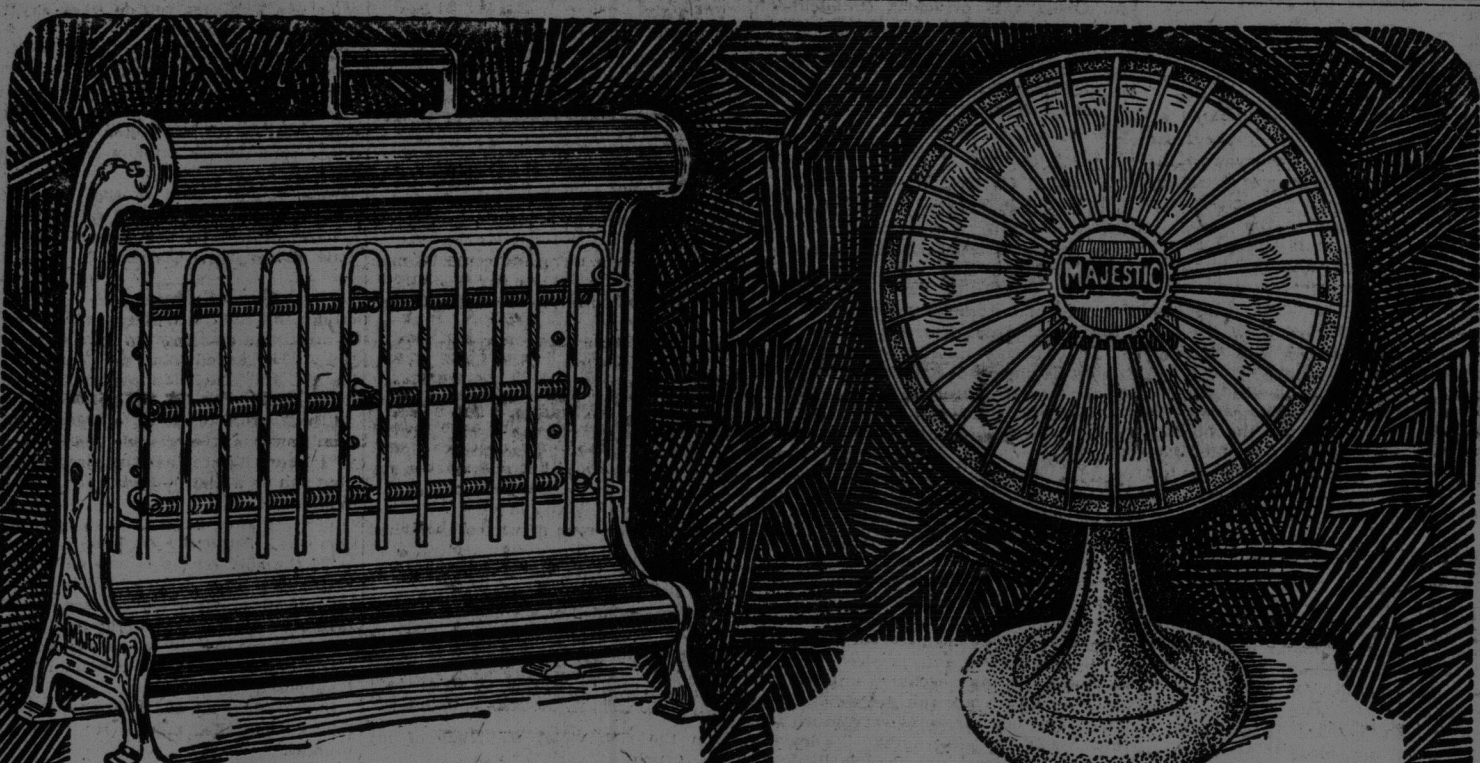

Harvests in Canada, Europe,
North Africa Make up For
U. S., India Slump.

WASHINGTON, Sept. 21.—Reports made public by the Department of Agriculture today from 29 countries representing 85 per cent of the world's wheat crop showed an 8 per cent increase in production this year over last year.

Estimates of the production for these countries are placed at 2,852,000,000 bushels this year against 2,634,000,000 bushels last year.

The outstanding feature of the world wheat situation," the department said, "are the abundant harvests in Canada, Europe and North Africa, which have more than made up the deficit caused by the short crop of India and the United States."

Tremendously Popular

INTRODUCED a year ago, these grate-type, portable Majestic Electric Heaters have sold by the thousand. Their unique beauty of appearance pleased everybody, while their power to throw out heat, like a grate fire, caught the fancy very strongly.

Many people now own both types, the above for "grate fire" heat, the reflector-type Majestic for concentrated heat.

This heater has a double back, which keeps the handle cool, the outer back being enamelled and the ends a two-tone bronze finish. It stands firmly and securely on the floor.

It Spreads Heat in All Directions

Observe the arrangement of the heating elements. They diffuse the heat in all directions, quickly taking the chill or dampness from a room. Makes a cosy companion when reading or for the nursery, living-room or sick-room.

There are six separate elements, well protected, easily removable and can be replaced at trifling cost.

Mass production makes the low prices possible—\$9.00 to \$10.80. See Majestic Heaters at any store.

The Most Powerful Heater Made

The twin-coil Majestic Electric Heater pictured above is without doubt the most powerful and effective electric heater manufactured in the world to-day. It generates and casts a powerful ray of concentrated heat that rapidly warms up a room, dissipating the cold or dampness.

Directs the Heat Where Needed

Note how the spool-shaped elements lie in the very back of the bowl-like copper reflector. Heat is intensified by reflection. This is an exclusive Majestic arrangement of elements. The tilting arrangement enables you to direct the heat where it is needed, which is, after all, the chief beauty of a portable electric heater.

The Majestic Heater has a double back, with air space in between, which makes the back and handle cool to the touch. It is strongly made of selected materials and is absolutely trouble-proof.

In the chill days of Fall and Spring one of these heaters is invaluable in the home. The prices are low, from only \$9.50 to \$12.50. Ask any dealer for a demonstration.
