# ONE GETS \$20,000.00 ANOTHER \$5,000.00

In Prince William Street Office.

A man walked into the office of W. E. A. Lawton and asked for \$20,000.00; a few days later another man came in and asked for \$5,000.00; Mr. Lawton was able to negotiate a loan on their properties, which was gilt edge security, and they went away satisfied.

If you have money to loan advise me and I will put you in direct touch with the people requiring money, with good security.

If you want to buy or sell Real Estate see me.

W. E. A. LAWTON, 93 Prince Wm. St. Tel. 2333.

# A LARGE EXPORT OF AUTOMOBILES

Exports of passenger automobiles from the United States for the year 1920 far surpass all records, say the National Bank of Commerce in New York. The January number of its magazine, Commerce Monthly. In the first ten months 112,276 were sent abroad as compared with 67,145 in 1919, the highest previous year, and 28,806 in the fiscal year ending June 30, 1914, the highest pre-war year. "Shipments to all parts of the world showed remarkable gains, the numbers sent to the United Kingdom and British India being especially noteworthy." It is pointed out. "These sales have not only benefited American industry but the widespread use of these cars will also facilitate the development of further trade in American automobiles, accessories and parts."

The largest exports were to the following countries, the bank's figures show:—United Kingdom, 18,154 cars; British India, 10,881; Canada, 7,391; British South Africa, 5,510; Cuba, 5,295; New Zealand, 5,269; Brazil, 4,908; Sweden, 4,887; Dutch East Indies, 3,439; Argentina, 3,272; Uruguay, 3,287; Norway, 3,000.

ONTARIO'S METAL OUTPUT NEARLY SIX HUNDRED MILLION

Misses Still Perennially Youthful, Especially the Gold and Nickel Mines—Great Industry Has Risen Above Many Serious Obstacles.

Cobalt, Ont., Dec. 31.—It has been officially announced by the Department of Mines, Ontario had produced metallic to the spot value of \$397,851.48. Of that grand aggregate, about \$210,000,000 came from the remarkable silver-cobalt-nickel mines of Cobalt and other districts. By the end of this year the silver mines will have yielded something like 310,000,000 ounces, besides the Cobalt, nickel and arsenic contents. Out of the profits they have distributed about 80,000,000 in dividends—and several of them are still vigorously in the running. The silver industry of Ontario has provided \$7,500,000 per annum to date—and "the end is not yet."

Next in order of merit is the nickel industry. The nickel copper takes precedence, for the grand total value of its production at the expiry of 1920 will be about \$334,000,000. Adding to this the hypothetical valuation of the rare metals accretion to this section of Ontario's mineral industries, the figures rise to between \$325,000,000 and \$295,000,000. Anyhow, nickel, copper, silver, cobalt, and a minor factor of rare metals have bequeathed no less than \$445,000,000 to the wealth of the province, or will have bequeathed that much on January 1.

Public ingenuity, bush fires and the Great War have retarded the development of the Ontario gold industry, notwithstanding which the total gold production on January 1, will have amounted to about \$70,000,000—and at least there is as much more assured in known ore reserves—possibly the most venturesome would place the value of the gold ore reserves at around \$100,000,000.

DOUGHTY SENT UP FOR TRIAL (Canadian Press Despatch)

Toronto, Dec. 30.—John Doughty, charged with the theft of \$100,000 in Victory bonds and also conspiracy to kidnap Ambrose J. Small, missing theatrical millionaire, pleaded not guilty at a preliminary hearing in the police court this afternoon. He was subsequently committed to trial by Magistrate G. Denison, on the charge of theft.

HICCUGHS IN MONTREAL. Strange Epidemic From the United States Puzzles People.

(Montreal Herald.) Are you suffering from the hiccoughs? That strange epidemic which has been travelling around the United States has reached Montreal, and many people are suffering from hiccoughs for which they can find no relief.

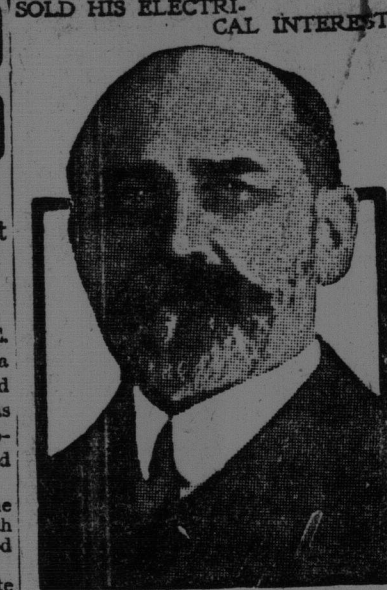

"Thirty per cent. of our business," said one downtown druggist today, "is from people who come asking for a remedy for the hiccoughs."

In the United States many theories have been put forward by radical men to account for this strange complaint. "The latest theory is that it is a worm of nervous influence."

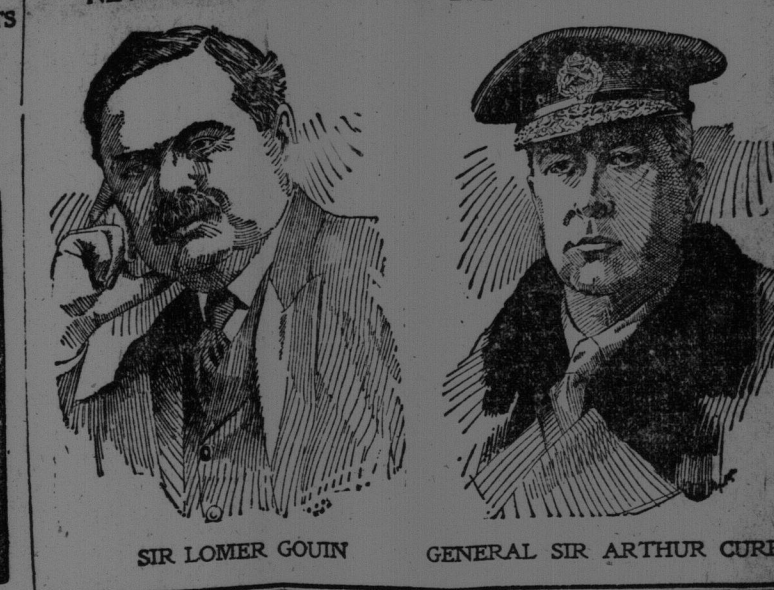

A Montreal medical man today said it was a trouble brought on through nervous dyspepsia. "Many people all over the continent have been much worried over business and financial matters lately," he said, "and worry always makes itself felt in dyspepsia and stomach troubles. I think this epidemic of hiccoughs can be attributed to a nervous condition brought on by general anxiety. It is not serious, but it illustrates the harmful effects of worry."

Minard's Liniment for Colds, etc.

Less than a century and a quarter ago the workers in the coal mines and salt mines of Scotland were legally bound to the places in which they were employed, were bought and sold with them, and when they attempted to escape were pursued, arrested and returned. Their children, if once employed became subject to the same servitude.

Sir William Mackenzie who has disposed of his plants at Niagara Falls for \$32,735,000 to the Ontario Hydro Electric Commission. The deal was negotiated by Sir Adam Beck and consummated by Sir William by cable from England where he was on a private mission.

BURNED TO DEATH ON CHRISTMAS DAY

Find Mother's Charred Body Lying Beside Stove.

Bellville, Dec. 31.—Mrs. Farrell, widow, aged about 50 years, and a resident of Deseronto, met a shocking death on Christmas Day. The unfortunate lady had been living alone for some time, but her two sons, Vincent of Toronto and Albert of Deseronto arrived at Deseronto to spend the holiday with her. In the morning the sons went down town to do some shopping, and upon returning were met with a gruesome sight as the charred body of their mother was found lying near a stove. It is surmised that Mrs. Farrell's clothing caught fire and she was burned to death without any alarm being sounded.

# WEALTH DWINDLED IN TWELVE MONTHS TO ONE-TENTH OF ORIGINAL AMOUNT.

Chicago, December 31.—Although able to administer efficiently the affairs of his corporation, George F. Steger, treasurer of the Steger & Sons Piano Company, told the Probate Court that he was unable to conserve his own fortune. He told Probate Judge Horner he was "spendthrift." He told how within less than twelve months his personal wealth had dwindled from \$1,500,000 to \$150,000.

Judge Horner appointed his brother, Chris G. Steger, president of the company conservator of George F. Steger's estate. The latter's fortune is valued at \$2,000,000. He gave bonds of \$500,000. George F. Steger's story began with the details of the litigation begun a year ago over the estate of John V. Steger, father of the present members of the firm and founder of the corporation.

Mrs. Louise Steger, the widow, received her dower right of one-third of the estate, valued at \$2,115,000. The two sons received the residue, which amounted to nearly \$4,000,000.

"I can't tell what became of my part of the estate," George Steger testified. "It just slipped through my fingers. I will be content with the appointment of my brother as conservator of what I have left." Mrs. George Steger approved.

Polish President IS TO VISIT PARIS

Warsaw, Dec. 31.—General Joseph Pilsudski, president of Poland, has accepted an invitation of the French government to visit Paris. He will leave after January 15, accompanied by the ministers of foreign affairs, war and finance and other officials. The trip is generally regarded here as a step toward furthering the proposed Franco-Polish treaty and military agreement.

MRS. PANKHURST MEANS TO FIGHT THE REDS

English Suffragist Declares Growth of Bolshevism in America Astonishes Her.

(N. Y. Times.) Mrs. Emmeline Pankhurst, English suffragist, arrived at the Hotel Pennsylvania yesterday and announced that she was here this time not to propagate suffrage ideas but to smite Bolshevism wherever and whenever it appears. Incidentally, Mrs. Pankhurst stated that as an Englishwoman she did not favor separating Ireland from the rest of the empire.

"I am over here," she said, "to help teach and propagate closer relations between the United States and Great Britain. I am not to speak in New York at this time, but my one desire is to aid in any manner I may the cementing of the bonds that bind our two countries."

"I am fighting what you may call Bolshevism, for lack of a better word. You would be amazed at the spread of the doctrines of jealousy and discontent in your own country. In mine we know it is ever present and must be fought to a finish, if not its very existence. But I was astounded, in going about in your Southern States, to find this insidious doctrine of the destruction of society among the less educated people in those states."

On Ireland Mrs. Pankhurst has this to offer:—"No, there is no real separation, only a little bit of water hardly wider than some of your rivers. It probably was not there at one time, the land being joined by nature and separated by the same means. There were other portions of the people who objected to British rule, but in the end they found it to their own interests and submitted gracefully. As an Englishwoman, I see no reason for any separation."

Mrs. Pankhurst has finished a tour of Canada and the Southern States. She will carry her campaign next to the Middle West.

**VALUE OF FROZEN FISH**

The value of frozen fish as food is generally appreciated by the people of Canada. Experiments have recently been conducted by Dr. Clark, investigator in the United States Bureau of Chemistry, which prove that the food constituents undergo no change in freezing, and the food value of fish is the same a year after it is frozen, as when landed. Care should be taken, however, in thawing out, if the fish is thawed out in not water, it loses some of its food value, and also its flavour. The fish should be allowed to thaw out gradually by placing it in a cool place.

The frozen fish industry is becoming very valuable to the country, as it provides a means of conserving fish which would otherwise go to waste, fish being caught greatly in excess of the demand at certain seasons of the year. It is the only method at present known of preserving fresh or mildly cured fish in transit to remote markets, and it seems that until some other method of shipping fish is discovered the Canadian people inland must depend on the supply of frozen fish. They must be brought to realize that fish preserved in this way is as valuable as food, and just as palatable as fish used fresh. The one important distinction is that frozen fish can be supplied much more cheaply.

**ENGAGEMENT.**
