id can be

seen in fair weather in rounding Cape St. Francis or crossing Con-  
ception Bay, on the intervening space between N., and S.W. and  
by W.; on the land side the light is more feeble. It is situated in  
lat 47.42 N., and in lon. 53.05, W..

*Cape Bonavista Light.*—Situated in lat. 48.42 N., lon. 52.59 W;  
is a Revolving Light, shewing alternately every two minutes a  
White and a Red Light. It is produced by sixteen argand burn-  
ers and reflectors, burns at an elevation above the sea of 150  
feet, and in favourable weather can be seen 30 miles. For some  
years the Light apparatus was in use at the Bell Rock, East coast  
of Scotland. By keeping this Light open with Cape Largent, it  
will carry you clear of the Flowers Rocks; first exhibited 11th  
September, 1843.

*Cape Pine Light.*—This tower is of iron, built by the Imperial  
Government in 1849-50, and first put in requisition on the 1st Janu-  
ary 1851. It is revolving, and shews a bright flash every 30 se-  
conds—has 12 argand burners and reflectors—elevated above the  
level of the sea 314 feet—situated in lat. 46.37 N., and in lon. 53.30  
W. In a favourable state of the atmosphere it can be seen 36  
miles.

*Harbor Grace Beach Beacon and Light.*—First exhibited 11th  
September, 1854; stands on the Point of Beach at the entrance  
of Harbor Grace. It is a double Light, as a distinction from Har-  
bor Grace Island Light, one being placed above the other, preserv-  
ing that appearance for six miles; exceeding this distance up to  
ten miles, the two Lights appear blended into one. In sailing into  
Harbor Grace with a fair or leading wind, bring the Beach Beacon  
to bear W., or W. by S., and by keeping the Light or building a  
little on the starboard bow it will carry you clear of the Bar, on  
which at low water there is not more than 8 feet of water.
