## EMPIRE LINE OF QUALITY CREAM SEPARATORS

You know there are two standard methods of cream separation—the cone and the disc. Each differs considerably from the other. The cone has some special features that make it peculiarly suitable for the requirements of some people, while the disc has features that make it more suitable for others. You see, it all depends on your requirements what method is best for you. So go to our agent and tell him your requirements—and he will tell you the method that is best for you.

where others have one, generally two. Easiest-to-turn, easiest-to-clean, closest-skimmer. No other cone separator in the same class.

The Empire Disc is the champion separator of Europe, with addition of several Empire patented improvements. The bowl weighs twenty per cent. less than any other disc bowl of same capacity with central distribution feed. Discs are easily cleaned. It runs easily. It is best value on the market of any disc machine.

But you will want to read our Free Dairy Book, which explains both machines in detail, so get your pen right now and write us a post card for your copy. It also tells about a guarantee as good as a government bond, and a generous Free Trial Offer.
