J.E.C. lashes out at critic

Dear Editor:

Last week a nerd (Brian G. Steeves) complained about the word 'shit' in my reviews. This buffoon is obviously behind the times. Anyone who is offended by this word must have the mental capacity of peanut. I mean, this is 1978, where have you been? This atrocious person is probably the type that would get offended by seeing Saturday Night Fever. Ritchie York, one of Canada's best rock contributors uses this word you; F ---- you!!!

Now that your meesly little play all top 40 by the way. And complain about what I said about radio! Can't you tell sarcasm when you see it! Your mental path is obviously a straight line. Any human being knows that this is not the definition of a hit. Tell me, does somebody wind you up in the morning?

What's this about "A.M. Top 40" syndrome. It's obviously something in your head. What makes an quite frequently in some of his artist popular? Why do you think articles. So here's a new work for so many people listen to the

brain is offended, read on! You what do you listen to; Freddie and the Vibrators? Do you call this art? 'a hit being something that you How old do you think people are have heard more than once on a that listen to CIHI or CJCM or CHUM in Toronto? I do believe from anywhere to past 35. You don't obviously have the foggiest idea how the top 40 is made up. Who buys these records dummy and why did Mull of Kyntre sell 2,500,000 copies in Britain alone. Normal people also listen to jazz, blues, and other forms of music too you know! There are artists whose musical talents are not heard on the radio but their record radio? The radio in fact does not sales will show who they are,

groups like Led Zepellin, ELP, and

a 'shitty' Greatest Hit album is 1) where where the selections 500,000 copy sellers or not single will you buy it? extensively played on the radio. Anyway, to conclude this, the

Bruns gives mistaken identity

Dear Sir:

I would like to take exception to the unfortunate lead on Page 10 of the March 24th issue of the Brunswickan. The lead reads "Counselling Service Failure", while the article which followed reported on the failure of the Peer Contraceptive Group to achieve the response they expected from students.

University was not involved in that

project. The Counselling Service serves between 600 and 700 students a year and attempts to assist them in regard to personal, social, emotional, educational and career problems.

It would be unrealistic to claim that we are always successful. However, we feel some students who might profit from contact with the Counseling Service may be directed by this unfortunate lead. I would, therefore, request that you The Counselling Service of the clarify the difference between the two services in your next issue.

In conclusion, I would like to say that the Counselling Service endorses and supports the efforts of the Health Service to provide information about conception and birth control. I regret that this particular project was not entirely successful, but I am confident that the Health Service will continue to seek ways to convey such information to the student body.

Yours sincerely, K.T. Fuller, Director, Counselling Services
