In this new volume Professors Ogg and Beard give us a fuller realization of the bearings of governmental organization and practice upon public well-being, a better knowledge of the political experience and problems of other peoples, and a new enthusiasm for national and international reconstruction on lines such as will conserve the dearly bought gains of the recent conflict. In dealing, as it does, mainly with a comparative exposition of political institutions, ideals and practices — national and international — this work will enable us to trace their power in contributing to or detracting from human welfare.

A good part of the book undertakes to show what the heritage and genius of the principal peoples lately engaged in the World War have meant in the shaping of contemporary political institutions and ideas. The great changes wrought in governmental organization and procedure during the war are carefully described, beside pointing out clearly the major political problems that remain for settlement during the early years of peace.
