

MEDICINAL COMPATIBILITY

is a principle belonging to us, and is the basis of our system of medicine. In strict accordance with principle, we unite ingredients so as to secure perfect harmony of chemical composition and medicinal action that they may contribute an assisting power to the curative properties of each other, thereby acquiring cumulative virtues, whereas medicines compounded after the ordinary methods, containing INCOMPATIBLES, not only often destroy themselves chemically, but neutralize the specific virtues of each ingredient medicinally, because of their want of compatibility.

Our success in reducing this principle to practice is most beautifully illustrated in that wonderful remedy—RADWAY'S READY RELIEF. Who has ever heard of this medicine SPOILING? None! As a chemical composition it is perfect.

In its action on the system each of its ingredients possess single and special curative properties, none of them conflict; each aids the other, giving a combination of HARMONIZED MEDICINAL POWER NEVER BEFORE ATTAINED.

This is the offspring of our system, and all our own; and this is the grand secret of the success of our RELIEF, in not only with electrical velocity stopping the most excruciating and agonizing pains, cramps, spasms, aches, and in fact the most distressing agony of NEURALGIA and all other pains—either inside or outside, of man, woman, or child—but curing with singular rapidity the most malignant and frightful forms of Asiatic Cholera, Yellow Fever, Small Pox, Diphtheria, and such diseases that strike terror to people when it is known that a visitation of these scourges are threatened. This is claiming great and wonderful merit for this simple remedy; yet we do not claim one jot or tittle more than it has done and will do. There is no such medicine in vogue as the Ready Relief, for the cure and prevention of the class of diseases it is recommended for.

People who for a quarter of a century have used it, and cured themselves of all kinds of pains, aches, and infirmities, know but very little of its truly great power in the more dangerous diseases. In all cases where an external embrocation or liniment is required, or where there is pain, inflammation, congestion—or where there is a disturbance inwardly, such as cramps, spasms, diarrhoea, sickness at stomach, headache, and other simple ailments, they know very well that the Ready Relief will remove all those difficulties in a few seconds; but in the more fatal diseases, such as Small Pox, Yellow Fever, Asiatic Cholera, Typhoid Fever, and the class of diseases that terminate fatally in a few hours, they little know that in RADWAY'S READY RELIEF they have a life-preserver that will cure them, and protect them against attacks of those fatal diseases, and yet this is true, and it is the only remedial agent in existence that will absolutely CURE and PREVENT these diseases.

The solution of this great medical problem is plain and simple, for in the READY RELIEF we have a Counter-Irritant; a Disinfectant; a Diffusive Stimulant; an Anti-Acid; a Diaphoretic; an Anti-Spasmodic; a Rubifacient; an Anti-Septic; a Sudorific; an Anodyne; a Nervine and Tonic. Each of these properties are so harmoniously combined and associated, that each performs, with singular and marvellous rapidity, its independent duty, and each, as a part, assists the other; and when the symptoms of the disease indicate their united influence, the Ready Relief instantly supplies this important requisite.

In Asiatic Cholera—and the same properties are called for in Yellow Fever, and other malignant malarie—an ANODYNE is called for to assuage the pain, stop the vomiting and purging; a DISINFECTANT, to kill, destroy, or neutralize the poison or acid of Cholera; an ANTI-SPASMODIC, to allay the spasms and cramps, vomiting and purging; ANTI SEPTIC, to prevent mortification, and to
