

THE TELEPHONE SAVES YOU

TIME

TROUBLE

MONEY

—AND PAYS YOU

INTEREST IN THE SHAPE OF INCREASED LEISURE AND FREEDOM FROM ANXIETY

The telephone, the time saver, has never been so indispensable on the farm as today, when farm hands are difficult to secure and when higher prices for farm products are so general.

This human-like little instrument has completely transformed farm life. It has banished isolation and distance, and brought to the farmer a city facility—the means of direct communication.

Though it be half-a-day's journey to the village, the telephone brings you within "speaking distance" of the man you want. It enables you to transact business or make social calls at a remarkable saving of time, no matter how far away.

OUR FREE BOOK—"How The Telephone Helps The Farmer" tells all about the telephone in a most complete and concise form. Have you received your copy?

If not, write your name and address on the coupon and return to us. It's FREE and without obligation—DO IT TODAY.

We supply everything a Telephone Company needs from the organization of a Company to the Complete Plant—inside apparatus and batteries as well as poles, crossarms, wire, and other line construction material and tools. Our business is the telephone business.
