EVERY BABY IS WORTH WHILE.

Some thoroughly paganized people of the present day would have so man lately to a woman to whom he ciety do away with all who are not physically "fit." Dr. Thomas Morgan Rotch, who lectured the other day at Harvard Medical School, is flatly opposed to any such theory. He says:

"No matter how severely a child may be attacked, it is important that the physician be called in just as when your house catches fire you summon the firemen to save what But is it worth while 'to they can. save a little crippled child? Is 'it worth while to save a little miserable baby that looks as if it could be no good in the world? I am frequently asked that. "Take care of the baby. It

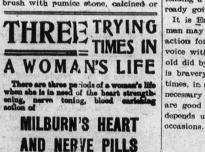

the brain in the end, after all, that does the work in the world. How do you know but you have the brain of a great man in this little baby? Even one prematurely born may turn out to be an athlete. We are not n a position to determine what an individual human being at birth may become later. Again and again all over the world the question is asked

about crippled children, and Sparts is cited where all the cripples were killed. But the brain is of more use than the body. A combination of both makes the perfect human being."
