To Builders

The several failures of concrete buildings does not prove that this method of construction is useless or experimental. The reinforced concrete failure can be traced, as a rule, to carelessness. Carelessness is a vice which is never allowed to retard commercial progress. If every man, who contemplates a new building, will take the trouble to look into the merits of this form of construction, he will materially assist in reducing the appalling fire losses on this continent. He cannot fail to see that the reinforced concrete building is, on its merits, the best. It is absolutely fireproof.

¶ The *Canadian Cement and Concrete Review* is a new illustrated monthly devoted to the great and growing industry. It is the only journal of its kind published in Canada, is printed on fine art paper, and profusely illustrated. "There is lots of room," says one of its numerous readers, "and particularly at the top—for first-class publications in this special line. We wish you every success, and from the appearance of the initial number of the *Canadian Cement and Concrete Review*, we have no doubt you will secure it."

¶ The seventh number is now ready and contains, amongst others, the following articles:

¶ The Cement Industry of Ontario.

¶ Reinforced Concrete Failures.

¶ Cement Publications Reviewed.

¶ Brockville Cement Industry

¶ Specimen copies sent on request. Cement & Concrete Publishing Co., 18 Court St., Toronto.

¶ Subscription Rate \$1 per annum.
